Type of Applicant 2: Select Applicant Type: <input checked="" type="checkbox"/>								
Type of Applicant 3: Select Applicant Type: <input checked="" type="checkbox"/>								
*Other (specify):								

*10. Name of Federal Agency:

Passenger and Freight Railroad Programs

11. Catalog of Federal Domestic Assistance Number:

20.319 - High-Speed Rail/Intercity Passenger Rail Program

*12. Funding Opportunity number:

FR-HSR-11-001

*Title:

High-Speed Intercity Passenger Rail (HSIPR) Program

13. Competition Identification Number:

FR-HSR-11-001-012341

Title

High-Speed Intercity Passenger Rail (HSIPR) Program

14. Areas Affected by Project (Cities, Counties, States, etc. - limit to 200 characters):

Illinois

* 15. Descriptive Title of Applicant's Project: - limit to 150 characters

IL-Chicago-St. Louis Corridor Supplement

Attach supporting documents as specified in agency instructions.

16. Congressional Districts Of:

*a. Applicant IL-11 & 15

*b. Program/Project IL 11-19

Attach an additional list of Program/Project Congressional Districts if needed.

17. Proposed Project:

*a. Start Date: (MM/DD/YYYY) 10/01/2011

*b. End Date: (MM/DD/YYYY) 12/31/2015

18. Estimated Funding (\$):

*a. Federal	186400000
*b. Applicant	42400000
*c. State	0
*d. Local	15700000
*e. Other	4000000
*f. Program Income	0
*g. TOTAL	248500000

* 19. Is Application Subject to Review By State Under Executive Order 12372 Process?

- ☐ a. This application was made available to the State under the Executive Order 12372 Process for review on (MM/DD/YYYY)
- ☐ b. Program is subject to E.O. 12372 but has not been selected by the State for review.
- ☒ c. Program is not covered by E.O. 12372

* 20. Is the Applicant Delinquent On Any Federal Debt ? (If "Yes", enter explanation in the text box below.)

☐ Yes ☒ No

* 21. By signing this application, I certify (1) to the statements contained in the list of certifications** and (2) that the statements herein are true, complete and accurate to the best of my knowledge. I also provide the required assurances** and agree to comply with any resulting terms if I accept an award. I am aware that any false, fictitious, or fraudulent statements or claims may subject me to criminal, civil, or administrative penalties. (U.S. Code, Title 218, Section 1001)

☒ **I AGREE

** The list of certifications and assurances, or an internet site where you may obtain this list, is contained in the announcement or agency specific instructions.

Authorized Representative:

Prefix: Mr

*First Name: George

Middle Name: E

*Last Name: Weber

Suffix: Title: *Telephone Number: Fax Number: *Email: *Signature of Authorized Representative: *Date Signed: (MM/DD/YYYY) *** Applicant Federal Debt Delinquency Explanation**

The following field should contain an explanation if the Applicant organization is delinquent on any Federal Debt. Maximum number of characters that can be entered is 4,000. Try and avoid extra spaces and carriage returns to maximize the availability of space.

Application Status Confirmation

Grants has marked the following application as submitted....

*Please submit signed copies of forms if you have been instructed by your program or grant office.

[Application Control Checklist](#)

Applicant: State of Illinois - Illinois Department of Transportation
Application Number: HSR2011000498
Program: PFP – Passenger and Freight Railroad Programs
Announcement: High-Speed Intercity Passenger Rail (HSIPR) Program:
Project Title: **IL- Chicago – St Louis Corridor Supplement SDP**
Status: Submitted 4/4/2011

Document Title:
HSIPR Narrative Application Form Part I – Service Development Program
(upload #1)

Narrative Application Form – Service Development Program Part I

High-Speed Intercity Passenger Rail (HSIPR) Program

Applicants interested in applying for funding under the March 2011 Notice of Funding Availability (NOFA) are required to submit the narrative application forms, parts I and II, and other required documents according to the checklist contained in Section 4.2 of the NOFA and the Application Package Instructions available on FRA's website. All supporting documentation submitted for this Service Development Program should be listed and described in Section H of this form. Questions about the HSIPR program or this application should be directed to the Federal Railroad Administration (FRA) at HSIPR@dot.gov.

Applicants must enter the required information in the gray narrative fields, check boxes, or drop-down menus of this form. Submit this completed form and the statement of work, along with all supporting documentation, electronically by uploading it into www.GrantSolutions.gov by 8:00 p.m. EDT on April 4, 2011.

A. Point of Contact and Applicant Information

Applicant must ensure that the information provided in this section matches the information provided on the SF-424 forms.

(1) Name the submitting agency: Illinois Department of Transportation		Provide the submitting agency Authorized Representative name and title: . George Weber, Acting Deputy Director Department of Public and Intermodal Transportation		
Address 1: .JRTC, Suite 6-600, 100 W. Randolph Street	City: Chicago	State: IL	Zip Code: 60601-3229	Authorized Representative telephone: (312)793-4222 ext. Authorized Representative email: george.weber@illinois.gov
Address 2:				
Provide the submitting agency Point of Contact (POC) name and title (if different from Authorized Representative): Name, Title		Submitting agency POC telephone: (312)793-4222 ext. Submitting agency POC email: George.Weber@illinois.gov		
(2) List out the name(s) of additional State(s) applying (if applicable): None				

B. Eligibility Information

Complete the following section to satisfy requirements for application eligibility.

- (1) Select the appropriate box from the list below to identify applicant type.** Eligible applicants are listed in Section 3.1 of the NOFA.

- ☒ State
☐ Amtrak
☐ Group of States
☐ Amtrak in cooperation with a State or States

If selecting one of the applicant types below, additional documentation is required to establish applicant eligibility. Please select the appropriate box and submit supporting documentation to demonstrate applicant eligibility, as described in Section 3.2 of the NOFA, to GrantSolutions.gov and list the supporting documentation under “Additional Information” in Section H.2 of this application.

- ☐ Interstate Compact
☐ Public Agency established by one or more States

- (2) Indicate the status of eligibility documentation including the date of issue and how documentation can be verified by FRA.**

Verify any completed Environmental Assessment (EA) or Final Environmental Impact Statement (EIS) document that demonstrates satisfaction of “Service NEPA” for the proposed Service Development Program by indicating if documents are submitted through GrantSolutions.gov or referenced through an active public URL. Refer to the Service Development Program Application Package Instructions and Section 5.2 of the NOFA for more information. Project-level NEPA documents for component projects within the Service Development Program may also be included.

A NEPA decision document (Finding of No Significant Impact, Record of Decision, or Categorical Exclusion concurrence) is not required at the time of application, but must be issued by FRA prior to award of a construction grant. Applications that are accompanied by a final NEPA determination will be looked upon favorably during the application review and selection process. Any document not available online should be submitted with the application package and listed in Section H.2 of this application. If more rows are required, please provide the same information for additional documentation in a separate supporting document and list it in Section H.2 of this application.

(3) Indicate the operational independence of the proposed Service Development Program.¹ Refer to Sections 3.5.2 and 3.4.4 of the NOFA for more information about operational independence and applications related to previously-selected projects.

- ☒ This program is operationally independent.
- ☐ This program is operationally independent when considered in conjunction with previously selected or awarded HSIPR program project(s) (identify previously selected or awarded projects below).
- ☐ This program is not operationally independent.

Briefly clarify the response:

Each of the proposed improvements included in this application can be completed and be of benefit to the existing passenger and freight services independent of the Record of Decision (ROD) 2A Package of Improvements (which funded improvements on the Corridor from Dwight to the East St. Louis area) included in the current Grant Agreement (FR-HSR-0015-11-01-01, hereinafter 2010 Grant"). The benefits will be detailed later in this document, but include a nine minute reduction in travel time which is expected to generate about 21,300 more annual riders starting in 2014. This application includes the following major tasks, (which will be referred to throughout the remainder of this application): Task 1) New Siding and Extended Second Main Track - consists of the construction of a new 2-mile siding near Mazonia, IL and construction of 7 miles of extended second main track between Elwood and Joliet, IL; Task 2) Track Upgrades. The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (not ALL improvements) for the Corridor area from MP42.8 to MP72.8. The statement of work never contemplated that all first main track upgrades from 42.8 to 72.8 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP36.7 to MP 42.8. Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds

¹ A Service Development Program is considered to have operational independence if, upon being implemented, it will have tangible and measurable benefits, either independently of other investments or cumulatively with projects selected to receive awards under previous HSIPR program solicitations. Additionally, a Service Development Program may demonstrate operational independence by resulting in tangible and measurable progress in implementing new or substantially improved high-speed or intercity passenger rail service.

will allow some of the upgrades between MP 72.8 and MP 54 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 72.8 and 54 and for main track upgrades on the remainder of the Corridor, 18 miles from MP 54 to MP 36.7 (between approximately Wilmington and Joliet IL). Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet IL. Task 3) PTC - The 2010 Grant includes funds for PTC improvements from MP 72 to MP 281. This application seeks funding to equip the existing first main track and proposed second tracks with PTC between Dwight and Joliet, IL (37 miles from MP 36.7 to 72.8); Task 4) Private and Farm Crossings - is the additional upgrade of the private crossings and the farm crossings (33 total) between Dwight and East St. Louis beyond the basic upgrades included in the 2010 Grant. This funding is requested to comply with recent local agreements and FRA direction which now includes quad gates and other additional enhancements; Task 5) ROD Study - is the conduct of a "lessons learned" documentation/study on the work included in the 2010 Grant and related IDOT-funded high-speed rail projects by RTEC/University of Illinois-Urbana-Champaign; and, Task 6) Program Management/Construction Administration - provides for the IDOT Program Management Consultant (PMC) team and other consultants to manage the design, construction and implementation of the discrete projects included in this application for Chicago-St. Louis Corridor Supplement program. This task also provides for additional QA/QC oversight of construction and the concrete ties (including continuation of the sampling, testing and analysis process) to be used in the track construction projects between Joliet and Dwight, as listed above.

C. Corridor Service Overview

Respond to the following questions to help put this application into the context of the long-term vision and related work for the HSIPR corridor service.

- (1) Provide a brief narrative explaining how this Service Development Program relates to the long-term vision of the HSIPR corridor.** If the narrative includes acronyms, the first frequency should be spelled out.

The proposed improvements included in this application are consistent with, and are of significant benefit to, the current Service Development Plan (SDP) for the corridor. Design and construction work is currently under way to deliver the ROD/2A Package of Improvements as included in the current Grant Agreement (FR-HSR-0015-11-01-01, hereinafter "2010 Grant"). The benefits of the work of this application include an increase in reliability to 85% and 9 minute reduction in travel time which is expected to generate about 21,300 more annual riders starting in 2014. This application includes the following major tasks, (which will be referred to throughout the remainder of this application): Task 1) New Siding and Extended Second Main Track - consists of the construction of a new 2-mile siding near Mazonia, IL and construction of 7 miles of extended second main track between Elwood and Joliet, IL, which is immediately adjacent to the 2010 Grant segment;

Task 2) Track Upgrades – This task is a key requirement for the ability to extend increased speeds further north beyond the limits of the 2010 Grant at Dwight (MP 72.8), and is completely consistent with the SDP. The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (not ALL improvements) for the Corridor area from MP42.8 to MP72.8. The statement of work never contemplated that all first main track upgrades from 42.8 to 72.8 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP36.7 to MP 42.8. Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds will allow some of the upgrades between MP 72.8 and MP 54 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 72.8 and 54 and for main track upgrades on the remainder of the Corridor, 18 miles from MP 54 to MP 36.7 (between approximately Wilmington and Joliet, IL). Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet, IL.

Task 3) PTC – A key objective of the SDP is to provide speeds of up to 110mph over the entire Chicago – St. Louis corridor. The 2010 Grant includes funds for PTC improvements from MP 72 to MP 281. This application seeks funding to equip the existing first main track and proposed second tracks with PTC between Dwight and Joliet, IL (37 miles from MP 36.7 to 72.8);

Task 4) Private/Farm Crossings – The SDP includes improved crossing warning devices and systems at all crossings on the corridor. This task provides an additional upgrade of the private crossings and the farm crossings (33 total) between Dwight and East St. Louis beyond the basic upgrades included in the 2010 Grant. This funding is requested to comply with recent local agreements and FRA direction which now includes quad gates and other additional enhancements;

Task 5) ROD Study – This is the conduct of a "lessons learned" documentation/study on the work included in the SDP and in this application as well as the 2010 Grant and related IDOT-funded high-speed rail projects by RTEC/University of Illinois-Urbana-Champaign; and,

Task 6) Program Management/Construction Administration – This provides for the IDOT Program Management Consultant (PMC) team and other consultants to manage the design, construction and implementation of the discrete projects included in this application for Chicago-St. Louis Corridor Supplement program. This management approach is the same as described by the SDP, and implemented and in use now. This task also provides for additional QA/QC oversight of construction and the concrete ties (including continuation of the sampling, testing and analysis process) to be used in the track construction projects between Joliet and Dwight, as listed above and described in the SDP.

- (2) List other HSIPR projects or activities related to this Service Development Program application.** This includes any pending, selected, or awarded planning, PE/NEPA, FD/Construction, Service Development Programs or projects, and other FRA funded programs. The purpose of this list is to identify overlapping or complementary applications, projects, or programs. Click on the gray boxes to select from the list of choices for FRA Solicitation and Status. If the Solicitation is not included in the prepopulated list, select "Other" and type the name in the adjacent gray box within that field.

Project, Activity, or Service Development Program Name ²	FRA Solicitation	Federal Funding Amount ³	Status	GrantSolutions Number and/or Award	Does the project contain activities or scope also
---	------------------	-------------------------------------	--------	------------------------------------	---

² If an applicant is submitting an Individual Project application proposing the same or similar scope as a component project contained in this Service Development Program application, the Individual Project application should be listed.

³ Depending on the status of the Project, Activity, or Program record the amount obligated, awarded, or requested.

D. Executive Summary

Answer the following questions about the proposed program.

- (1) Provide a clear, concise, and descriptive project name.** The Service Development Program name must consist of the following elements, each separated by a hyphen: (1) the State abbreviation; (2) the route or corridor name; and (3) a Service Development Program descriptor that will concisely identify the program's focus (e.g., HI-Fast Corridor-Main Stem). Please limit the response to 100 characters.

IL-Chicago-St. Louis Corridor Supplement SDP

- (2) If an application containing the proposed scope was previously submitted for consideration and was not selected, indicate the solicitation under which that application was submitted.** Check all that apply.

- | | |
|--|--|
| <input type="checkbox"/> ARRA – Track 1 | <input type="checkbox"/> FY 2010 Service Development Program |
| <input checked="" type="checkbox"/> ARRA – Track 2 | <input type="checkbox"/> FY 2010 Individual Project – PE/NEPA |
| <input type="checkbox"/> FY 2009 – Track 4 | <input checked="" type="checkbox"/> FY 2010 Individual Project – FD/Construction |
| <input type="checkbox"/> FY 2009 Residual | <input type="checkbox"/> N/A |

- (3) Indicate the anticipated duration, in months, for the proposed Service Development Program.** Consider that American Recovery and Reinvestment Act funding must be obligated by September 30, 2017, while FY 2010 funding does not have a deadline.

Number of Months: 55

- (4) Specify the anticipated HSIPR funding information for the proposed Service Development Program.** This information must match the SF-424 documents, and dollar figures must be rounded to the nearest whole dollar. All applicants are encouraged to contribute non-Federal matching funds. FRA will consider matching funds in evaluating the merit of the application. See Section 3.3 of the NOFA for further information regarding cost sharing.

HSIPR Federal Funding Request	Non-Federal Match Amount	Total Program Cost	Non-Federal Match Percentage of Total
\$186,380,000	\$62,130,000	\$248,510,000	25 %

(5) Indicate the source, amount, and percentage of non-Federal match for the proposed Service Development Program (if applicable). The sum of figures below should equal the amount provided in Section D.4. Click on the gray boxes to select the appropriate response from the lists provided in type of source, status of funding, and type of funds. Dollar figures must be rounded to the nearest whole dollar. Also, list the percentage of the total program cost represented by each non-Federal funding source. Provide supporting documentation that will allow FRA to verify each funding source. Any required verification documentation not available online should be submitted with the application package and listed in Section H.2 of this application.

Non-Federal Match Funding Sources	Type of Source	Status of Funding ⁴	Type of Funds	Dollar Amount	% of Total Program Cost	Describe Any Supporting Documentation to Help FRA Verify Funding Source
"Illinois Jobs Now!" Capital Bill	Existing	Committed	Cash	\$ 4,430,000	17 %	http://www.illinois.gov.com/upload/New647.pdf
Union Pacific Railroad	Existing	Committed	Cash	\$ 15,700,000	6 %	
Union Pacific Railroad	Existing	Committed	In-Kind	\$ 4,000,000	2 %	
				\$	%	
				\$	%	
Sum of Non-Federal Funding Sources				\$ 62,130,000	25 %	N/A

(6) Indicate the name of the corridor where the proposed Service Development Program is located and identify the start and end points as well as major integral cities along the route.

Chicago-St. Louis HSR Corridor - corridor name identifies the endpoints of the corridor; major on-line cities include Joliet, Dwight, Pontiac, Bloomington-Normal, Lincoln, Springfield, Carlinville and Alton.

(7) Describe the project location, using municipal names, mileposts, control points, or other identifiable features such as longitude and latitude coordinates. If available, please provide a project GIS shapefile (.shp) as supporting documentation. This document must be listed in Section H.2 of this application.

The proposed projects are located on the Union Pacific Railroad's (UPRR's) Joliet and Springfield Subdivisions in the State of Illinois. Key operating locations (control points) on this section of the UPRR are: Joliet Union Depot (UD) - MP 37.3; Dwight - MP 72.78; Chenoa - MP 102.30; BN Target - MP 126.50; CN Xing - MP 155.68; I&M Jct. - MP 182.87; Hazel Dell - MP 188.90; Girard - MP 210.57; Godfrey - MP 252.11; Wann - MP 262.10; Lenox - MP 269.70; WR Tower - MP 275.50; and , Q Tower - MP 281.00. A project map is included in the submittal package.

Limits for the projects in this application are as follows:

Task 1) - the new siding will be located between MP 55.0 and MP 57.13, while the extended second main would run from MP 36.8 to MP 44.69;

Task 2) - first main track reconstruction project limits are between MP 36.7 (in Joliet, IL) and approximately MP 54 (near Wilmington);

Task 3) - PTC installation project limits are between MP 36.7 and MP 72.78; and,

⁴ The following categories and definitions are applied to funding sources:

Committed: Committed sources are programmed capital funds that have all the necessary approvals (e.g., statutory authority) to be used to fund the proposed project without any additional action. These capital funds have been formally programmed in the State Rail Plan and/or any related local, regional, or state capital investment program or appropriation guidance. Examples include dedicated or approved tax revenues, state capital grants that have been approved by all required legislative bodies, cash reserves that have been dedicated to the proposed project, and additional debt capacity that requires no further approvals and has been dedicated by the sponsoring agency to the proposed project.

Budgeted: This category is for funds that have been budgeted and/or programmed for use on the proposed project but remain uncommitted (i.e., the funds have not yet received statutory approval). Examples include debt financing in an agency-adopted capital investment program that has yet to be committed in the near future. Funds will be classified as budgeted when available funding cannot be committed until the grant is executed or due to the local practices outside of the project sponsors' control (e.g., the project development schedule extends beyond the State Rail Program period).

Planned: This category is for funds that are identified and have a reasonable chance of being committed, but are neither committed nor budgeted. Examples include proposed sources that require a scheduled referendum, requests for state/local capital grants, and proposed debt financing that has not yet been adopted in the agency's capital investment program.

Task 4) - private/farm crossing additional improvements funded by this task are located between MP 72.78 and MP 281.00. Similar improvements for crossings located between MP 36.7 and 72.78 are included in tasks 1 and 2.

Tasks 5) and 6) - These tasks have no geographic limits. In general, they will cover the complete Chicago-St. Louis ROD project (MP 72.78 to MP 281.00) and the geographic span of the tasks included in this application (MP 36.7 to MP 72.78).

(8) Provide an abstract outlining the proposed Service Development Program. Briefly summarize the narrative provided in the Statement of Work in 4-6 sentences. Capture the major milestones, outcomes, and anticipated benefits that will result from implementing the Service Development Program. For any acronyms, spell out the first frequency with the acronym in parentheses. If this application is divided into phases or groupings of component projects⁵, provide a brief abstract of 4-6 sentences for each phase or group of component projects.

The projects comprising this application will increase operational flexibility, reduce running times, increase operational reliability, enhance safety, increase accessibility, improve ridership and in general can be expected to enhance the attractiveness of the high-speed rail service as well as passenger rail service in general. The project will complement the current corridor Service Development Plan and the Chicago-St. Louis 2A/ROD improvements previously funded through the 2010 Grant.

Task 1) New Siding and Extended Second Main Track - consists of the construction of a new 2-mile siding near Mazonia, IL and construction of 7 miles of extended second main track between Elwood and Joliet, IL, which is immediately adjacent to the 2010 Grant segment and a part of the SDP;

Task 2) Track Upgrades – This task is a key requirement for the ability to extend increased speeds further north beyond the limits of the 2010 Grant at Dwight (MP 72.8), and is completely consistent with the SDP. The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (not ALL improvements) for the Corridor area from MP42.8 to MP72.8. The statement of work never contemplated that all first main track upgrades from 42.8 to 72.8 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP36.7 to MP 42.8. Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds will allow some of the upgrades between MP 72.8 and MP 54 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 72.8 and 54 and for main track upgrades on the remainder of the Corridor, 18 miles from MP 54 to MP 36.7 (between approximately Wilmington and Joliet, IL). Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet, IL.

Task 3) PTC – A key objective of the SDP is to provide speeds of up to 110mph over the entire Chicago – St. Louis corridor. The 2010 Grant includes funds for PTC improvements from MP 72 to MP 281. This application seeks funding to equip the existing first main track and proposed second tracks with PTC between Dwight and Joliet, IL (37 miles from MP 36.7 to 72.8);

Task 4) Private/Farm Crossings – The SDP includes improved crossing warning devices and systems at all crossings on the corridor. This task provides an additional upgrade of the private crossings and the farm crossings (33 total) between Dwight and East St. Louis beyond the basic upgrades included in the 2010 Grant. This funding is requested to comply with recent local agreements and FRA direction which now includes quad gates and other additional enhancements;

With regard to Tasks 1) through 4) of this application, the major milestones for each include completion of final design, issuance of construction bid packages, award of the construction contracts, completion of construction and the testing/acceptance phases of each of the individual tasks and promote intermodal connections.

Task 5) ROD Study – This is the conduct of a "lessons learned" documentation/study on the work included in the SDP and in this application as well as the 2010 Grant and related IDOT-funded high-speed rail projects by RTEC/University of Illinois-Urbana-Champaign; Deliverables include: a project overview; detailed report on the outcomes and lessons-learned of the three phases as identified in the previous sentence; a presentation summarizing the outcomes/lessons-learned; and, a project website where on-going and completed work will be posted for access by interested parties.

Task 6) Program Mgmt/Construction Admin – This provides for the IDOT Program Management Consultant (PMC) team and other consultants to manage the design, construction and implementation of the discrete projects included in this application for Chicago-St. Louis Corridor Supplement program. This management approach is the same as described by the SDP, and implemented and in use now. This task also provides for enhanced QA/QC oversight of construction and the concrete ties (including continuation of the sampling, testing and analysis process) to be used in the construction projects between Joliet and Dwight, as listed above and described in the SDP. This QA/QC program is beyond the original scope included in the 2010 Grant, and per the QA/QC plan reviewed by FRA.

⁵ An application's competitiveness may be improved by demonstrating how a proposed project could be divided into discrete phases, each with operational independence, based on geographic section, type of activity, discrete benefits and costs, or other appropriate criteria.

(9) Indicate the type of expected capital investments included in the proposed Service Development Program. Check all that apply.

- | | |
|---|--|
| <input checked="" type="checkbox"/> Additional main-line tracks | <input type="checkbox"/> Rolling stock acquisition |
| <input checked="" type="checkbox"/> Communication, signaling, and control | <input type="checkbox"/> Rolling stock refurbishments |
| <input type="checkbox"/> Electric traction | <input type="checkbox"/> Station(s) |
| <input checked="" type="checkbox"/> Grade crossing improvements | <input checked="" type="checkbox"/> Structures (bridges, tunnels, etc.) |
| <input checked="" type="checkbox"/> Major interlockings | <input type="checkbox"/> Support facilities (yards, shops, administrative buildings) |
| <input type="checkbox"/> New rail lines | <input checked="" type="checkbox"/> Track rehabilitation |
| <input checked="" type="checkbox"/> Positive Train Control | <input type="checkbox"/> Other (please describe): |

(10) Indicate the anticipated service outcomes for the proposed Service Development Program. Check all that apply.

- | | |
|--|---|
| <input type="checkbox"/> Additional service frequencies | <input type="checkbox"/> New service on existing IPR route |
| <input checked="" type="checkbox"/> Increased average speeds/shorter trip times | <input type="checkbox"/> New service on new route |
| <input checked="" type="checkbox"/> Increases in operational reliability | <input type="checkbox"/> Reroute existing service |
| <input checked="" type="checkbox"/> Increases in ridership | <input type="checkbox"/> Service quality improvements |
| <input checked="" type="checkbox"/> Improved on-time performance of passenger trains | <input checked="" type="checkbox"/> Other (please describe): Enhanced safety, increased accessibility |

Briefly clarify the response(s) if needed:

The package of projects included in this application will reduce travel time by 9 minutes as compared to the 2010 Grant provisions, and increase reliability from 80% to 85%, assuming a modification to the Service Outcomes Agreement related to the 2010 Grant. This modification is a minor increase in the delay ceiling of 2 additional minutes.

The individual tasks included in the project each contribute in different ways. For example, Task 1) the new siding and extended second main track will increase operational flexibility and improve operational reliability for both the freight and passenger trains operating on the corridor. Completion of this Task will improve reliability of operations on the corridor to 85%, and support ridership increases noted in the next task. Tasks 2) and 3) reconstructing the main track for 110 mph operation and installing PTC between Dwight and Joliet will serve to reduce running times by 9 minutes and be primary support for the expected ridership increase of 21,300 ridership annually. Task 4) the upgrade of the proposed installations at private and farm crossings will enhance safety for both train operations and for area residents and should lead to increased project acceptance. Task 5 does not provide specific quantifiable immediate changes to service outcomes, but the identified lessons learned will benefit future projects delivered as part of the SDP on this and other corridors by capturing project experiences and lessons learned and by widely disseminating these to other persons/projects to benefit their project conception and execution. Task 6) Program Management and Construction Administration services will provide consistent processes and procedures to ensure that the tasks in this application are completed in a timely and efficient and effective manner, supporting the listed service outcomes in this application. Extending the working relationship of IDOT, its PMC and the UPRR over these tasks will also increase the effectiveness of the project delivery for these tasks. In addition, this component will have a project safety-related aspect by virtue of the enhancement of the QA/QC effort related to the concrete ties and construction. This will include the sampling, testing and analysis process, which has been used in the course of the 2010 and 2011 construction work and the implementation of a general QA/QC program for the Project.

(11) Describe the rolling stock type (if applicable). Describe the fleet of locomotives, cars, self-powered cars, and/or train sets that are intended to provide service upon completion of the Service Development Program. Note if the equipment is already owned or needs to be acquired.

No equipment is proposed to be provided as part of this application. Equipment information for the corridor is contained in the Service Development Plan.

(12) Provide information about job creation through the life of the proposed Service Development Program. Please consider construction, maintenance, and operations jobs.

Anticipated number of onsite and other direct jobs

FD/ Construction

First full year

Fifth full year

Tenth full year

created (on a 2080 work-hour per year, full-time equivalent basis).		Period	of operation	of operation	of operation						
		475	31	31	31						
Indicate the anticipated fiscal year.		N/A	2015	2019	2025						
(13) Divide the Service Development Program into discrete phases (groups of component projects) and identify each phase on a separate row of the table, if possible.⁶ Detail the service benefits to be realized after completion of each phase on the corresponding row. At the bottom of the table, provide the anticipated service benefits upon completion of the entire Service Development Program. Use as many rows as necessary; if the Service Development Program cannot be subdivided, summarize the information for the entire Service Development Program in the first row. Refer to Section 4.2.1 of the NOFA for additional information about phasing Service Development Programs.											
Phase	Title ⁷	Frequencies ⁸		Scheduled Trip Time (in minutes)		Average Speed (mph)		Top Speed (mph)		Reliability – Provide Either On-Time Performance Percentage or Delay Minutes	
		Current	Future	Current	Future	Current	Future	Current	Future	Current	Future
I.	New siding and extended second main track	3	3	292	292	58	60	110	110	80	85
II.	Track upgrades	3	3	292	283	58	60	110	110	80	80
III.	PTC	3	3	292	283	58	60	110	110	80	80
IV.	Private/Farm Crossings										
V.	ROD Study										
VI.	Program Management / Construction Administration										
VII.											
VIII.											
Provide the Cumulative Service Outcome (Aggregate Benefits of all Phases)		3	3	292	283	58	60	110	110	80	85

⁶ An application's competitiveness may be improved by demonstrating how a proposed project could be divided into discrete phases, each with operational independence, based on geographic section, type of activity, discrete benefits and costs, or other appropriate criteria.

⁷ Title should be a brief descriptive name for the phase.

⁸ Frequency is measured in daily round-trip train operations. One daily round-trip operation should be counted as one frequency.

(14) Provide information on the component projects within each phase of the proposed Service Development Program identified in Section D.14 above. For each phase, please list all component projects in the sequence they will be completed. If this application is not phased, include all component projects within the Phase I table. The sum of Phase Total Costs should equal the Total Program Cost indicated in Section D.4. This section is unlocked – the applicant can add rows and adjust column widths as needed for additional projects and phases.

PHASE I.		<i>New siding and extending second main track</i>
Component Project Name	Short Project Description	Project Cost
1 <i>New siding and extending second main track</i>	New siding will be located between MP 55.0 and MP 57.13, while the extended second main would run from MP 36.8 to MP 44.69	\$ 102.4 M
2		\$
3		\$
Phase I. Total Cost		\$ 102.4 M

PHASE II.		<i>Track Upgrades</i>
1 <i>Track Upgrades</i>	Reconstruction and upgrade of existing main track between MP 36.7 (in Joliet, IL) and approximately MP 54 (near Wilmington). This item also includes completion of similar track upgrade between MP 54 and MP 72.8 (Dwight), which was partially but not completely provided in the 2010 Grant (2A/ROD project).	\$ 76.2 M
2		\$
3		\$
Phase II. Total Cost		\$ 76.2 M

PHASE III.		<i>PTC</i>
1 <i>PTC</i>	PTC installation project limits are between MP 36.7 and MP 72.78	\$6.5 M
2		\$
3		\$
Phase III. Total Cost		\$ 6.5 M

PHASE IV.		<i>Private / Farm Crossings</i>
1 <i>Private / Farm Crossings</i>	Private/farm crossing improvements (enhancements beyond the 2010 Grant) are located between MP 72.78 and MP 281.00. Similar improvements for crossings located between MP 36.7 and 72.78 are included in phases 1 and 2.	\$ 23.0 M
2		\$
3		\$
Phase IV. Total Cost		\$ 23.0 M

PHASE V.		ROD Study
1	ROD Study Conduct of a "lessons learned" documentation/study on the work included in the 2010 Grant and related IDOT-funded high-speed rail projects by RTEC/University of Illinois-Urbana-Champaign. This task will cover the complete Chicago-St. Louis ROD project (MP 72.78 to MP 281.00) and the geographic span of the tasks included in this application (MP 36.7 to MP 72.78).	\$ 0.9 M
2		\$
3		\$
Phase V. Total Cost		\$ 0.9 M

PHASE VI.		Program Management / Construction Administration
1	Program Management / Construction Administration Program Management/Construction Administration - provides for the IDOT Program Management Consultant (PMC) team and other consultants to manage the design, construction and implementation of the discrete projects included in this application for Chicago-St. Louis Corridor Supplement program. This task also provides for additional QA/QC oversight of construction and the concrete ties (including enhancement of the sampling, testing and analysis process) to be used in the track construction projects between Joliet and Dwight.	\$ 39.5 M
2		\$
3		\$
Phase VI. Total Cost		\$ 39.5 M

E. Infrastructure Owner(s) and Operator(s)

Address the sections below with information regarding railroad infrastructure owners and operators of the proposed Service Development Program. Applicants that own and/or control the infrastructure to be improved by the project or have a service outcomes agreement in place with the infrastructure owning railroad for the proposed project, or an executed agreement that could be amended with the infrastructure owning railroad for a project(s) located on the same corridor as the proposed project, will be looked upon favorably during the application review and selection process.

- (1) Provide information regarding Right-of-Way Owner(s).** Where railroads currently share ownership, identify the primary owner. Click on the gray boxes to select the appropriate response from the lists of railroad type, right-of-way owner, and status of agreement. If the Right-of-Way Owner is not included in the prepopulated list, select “Other” and type the name in the adjacent text box within that field. Should this application have more than five owners, please provide the same information for additional owners in a separate supporting document and list it in Section H.2 of this application.

Type of Railroad	Railroad Right-of-Way Owner	Route-Miles	Track-Miles	Status of Agreements to Implement Projects
Class 1 Freight	UPRR	244	300	Preliminary Executed Agreement/MOU
Class 1 Freight	Other: KCS	32	32	Preliminary Executed Agreement/MOU
Amtrak				Preliminary Executed Agreement/MOU

- (2) Name the Intercity Passenger Rail Operator and provide the status of the agreement.** If applicable, provide the status of agreement with the entity that will operate the planned passenger rail service (e.g., Amtrak). Click on the gray box to select the appropriate response from the list of choices for Status of Agreement. Should the proposed service have more than three operators, please provide the same information for additional operators in a separate supporting document and list it in Section H.2 of this application.

Name of Operating Partner	Status of Agreement
Amtrak	Preliminary executed agreement/MOU

- (3) Provide information about the existing rail services within the proposed Service Development Program area (i.e., freight, commuter, and intercity passenger).** Click on the gray box to select the appropriate response from the list of type of service and name of operator. If the Name of Operator is not included in the prepopulated list, select “Other” and type the name in the adjacent text box within that field.

Type of Service	Name of Operator	Top Speed Within Project Boundaries (mph)		Number of Route-Miles Within Project Boundaries (miles)	Average Number of Daily One-Way Train Operations ⁹
		Passenger	Freight		
Freight	UPRR	0	60	244	10
Intercity Passenger	Amtrak	79	0	244	10
Freight	Other: KCS	0	60	32	4

⁹ One daily round-trip operation should be counted as two daily one-way train operations.

(4) Estimate the share of benefits that will be realized by non-intercity rail services and select the approximate cost share provided by the beneficiary.¹⁰ Click on the gray boxes to select the appropriate response from the lists of type of beneficiary, expected share of benefits and approximate cost share. If more than three types of non-intercity passenger rail are beneficiaries, please provide additional information in a separate supporting document, and list it in Section H.2 of this application.

Type of Non-Intercity Passenger Rail	Expected Share of Benefits	Approximate Cost Share
Freight	Less than 50%	1-25%

¹⁰ Benefits include service improvements such as increased speed or on-time performance, improved reliability, and other service quality improvements.

F. Response to Evaluation Criteria

Respond to each of the following evaluation criteria in the gray text boxes provided to demonstrate how the proposed Service Development Program will achieve each criterion.

(1) Project Readiness

Describe the feasibility of the proposed Service Development Program to proceed promptly to award, including addressing:

- The applicant's progress, at the time of application, in reaching compliance with NEPA for the proposed project. Although a NEPA decision document (Record of Decision, Finding of No Significant Impact, Categorical Exclusion determination) is not required at the time of application, applications for Service Development Programs that are accompanied by a final NEPA determination will be looked upon favorably during the application review and selection process;
- The applicant's progress, at the time of application, in reaching final service outcomes agreements (where necessary) with key project partners. Applicants that own and/or control the infrastructure to be improved by the project or have a service outcomes agreement in place with the infrastructure owning railroad for the proposed project, or an executed agreement that could be amended with the infrastructure owning railroad for a project(s) located on the same corridor as the proposed project, will be looked upon favorably during the application review and selection process; and
- The quality and completeness of the project's Statement of Work, including whether the Statement of Work provides a sufficient level of detail regarding scope, schedule, and budget to immediately advance the project to award.

An environmental assessment (EA) was previously prepared for the Task 1) portion of this project and submitted with the August 2010 application. FRA provided comments on that EA. An updated EA has been prepared and is included with this application. This new EA addresses the work of Tasks 1), 2) and 3). For the work of Task 4), no work will occur outside the limits of the 2004 ROD or the railroad right-of-way, so this work requires only a Categorical Exclusion (CE), which is included with this application. No environmental impacts are associated with the work to be done in Tasks 5) or 6). IDOT has always followed a rigorous process in the preparation and filing of environmental documentation on prior high-speed rail work tasks and will follow this same process with regard to the tasks making up the Chicago-St. Louis Corridor Supplement Package.

IDOT and UPRR executed a 2010 construction agreement (July 16, 2010), a 2011 construction agreement (March 4, 2011) and a service outcomes agreement (December 20, 2010). They are in the process of negotiating a maintenance agreement for the corridor and a QA/QC plan for the 2011 construction; these agreements will be finalized in the near future.

Preliminary Engineering documents for the tasks comprising this application are listed in response to Section B, Question 3. This application describes scope, schedule, and budget for the proposed work.

(2a) Transportation Benefits

Describe the transportation benefits that will result from the proposed Service Development Program and how they will be achieved in a cost efficient manner, including addressing:

- Generating improvements to existing high-speed and intercity passenger rail service, as reflected by estimated increases in ridership, increases in operational reliability, reductions in trip times, additional service frequencies to meet anticipated or existing demand, and other related factors;
- Generating cross-modal benefits, including anticipated favorable impacts on air or highway traffic congestion, capacity, or safety, and cost avoidance or deferral of planned investments in aviation and highway systems;
- Creating an integrated high-speed and intercity passenger rail network;
- Encouragement of intermodal connectivity and integration, including a focus on convenient connection to local transit and street networks, as well as coordination with local land use and station area development;
- Ensuring a state of good repair of key intercity passenger rail assets;
- Promoting standardized rolling stock, signaling, communications, and power equipment;
- Improved freight or commuter rail operations, in relation to proportional cost-sharing (including donated property) by those other benefiting rail users;

- Equitable financial participation from benefiting entities in the project's financing;
- Encouragement of the implementation of positive train control (PTC) technologies (with the understanding that 49 U.S.C. 20147 requires all Class I railroads and entities that provide regularly scheduled intercity or commuter rail passenger services to fully institute interoperable PTC systems by December 31, 2015); and
- Incorporating private investment in the financing of capital projects or service operations.

Construction of the new siding and extended second main on the Dwight-Joliet line section (Task 1) will increase operational flexibility and enhance operational reliability for freight and passenger trains on the corridor. Upgrade of approximately 18 miles of the first main track (suitable for 110 mph passenger train operation) between Wilmington and Joliet (Task 2) and the equipping of the full 37 miles (Dwight-Joliet) of the first main track with PTC (Task 3) will serve to reduce running times by an estimated 9 minutes and will enhance operational safety for train crews, passengers and area residents. A preliminary ridership estimate indicates this reduction in running time will result in an annual ridership increase of 21,300, and revenue increase of about \$600,000.

Incorporation of four-quadrant gates with exit-gate management systems and vehicle detection loops at the 10 private crossings between Dwight and East St. Louis (Task 4) will enhance both train and vehicle safety at these crossings. Incorporation of the farmer control panel, specialty control system and hazard detection equipment at the 23 farm or field crossings between Dwight and East St. Louis (also a part of Task 4) will serve to increase both train and vehicle safety at these locations.

The Task 6 work will include oversight as well as a general QA/QC construction plan and on-going concrete tie QA/QC efforts, including the sampling, testing and analysis of these components, which is expected to improve project performance and enhance safety, as well as contributing to the industry's knowledge base on this subject. In this context, this task may have direct bearing on the outcome of the ROD study in Task 5.

The project will generate cross-modal benefits by making the passenger service more attractive, in particular to the service area of stations such as Joliet. Improvements in Task 1) will support independent but related IDOT investments of about \$32 million in the Joliet multimodal station. This station includes significant provisions for intermodal bus and local transit connections which will be more attractive as a result of Tasks 1), 2) and 3).

The project Tasks 1), 2), 3), 4), and 6) enhance standardization of signals, track upgrades, and crossing warning devices, which will match that provided by the work of the 2A Grant agreement. The work of Task 5) will enhance standardization of high speed rail projects within Illinois, but also in particular in other states and locations that will benefit from these lessons learned.

The work of Task 1) will improve freight operations by providing additional track and signal capacity on the Dwight-Joliet segment, and Union Pacific is providing a commensurate funding match for this task that reason. In addition, the railroad is contributing its right-of-way at no additional cost to the project.

IDOT continues to commit to the sustainability of the HSIPR by ensuring that an on-going funding stream will exist for on-going maintenance expenses incurred. As a result, the facilities will be kept in a state of good repair. IDOT is cognizant of the benefits of standardized designs and practices. Work done on the Dwight-Joliet line section will benefit from experience gained in the 2010 and 2011 construction programs on the Dwight-East St. Louis section, and will employ identical design standards and practices to expedite this effort. This will also ensure that maintenance and operating personnel will find consistent arrangements and equipment along the corridor, which will promote ease of operation and maintenance. Nothing in the design of the physical plant on the Dwight-Joliet line section will require any unique equipment or modifications in terms of rolling stock types, signaling, communications or power equipment.

Task 3 of this package extends the equipping of PTC per Federal regulation over a 37-mile section of line, between Dwight and Joliet. This task, together with the work undertaken in Task 2, is essential to implementing 110 mph passenger train operation on this portion of the line.

(2b) Other Public Benefits

Describe the other public benefits that will result from the proposed Service Development Program and how they will be achieved in a cost-effective manner, including addressing:

- The extent to which the project is expected to create and preserve jobs and stimulate increases in economic activity;
- Promoting environmental quality, energy efficiency, and reduction in dependence on oil, including the use of renewable

energy sources, energy savings from traffic diversions from other modes, employment of green building and manufacturing methods, reductions in key emissions types, and the purchase and use of environmentally sensitive, fuel-efficient, and cost-effective passenger rail equipment; and

- Promoting coordination between the planning and investment in transportation, housing, economic development, and other infrastructure decisions along the corridor, as identified in the six livability principles developed by DOT with the Department of Housing and Urban Development and the Environmental Protection Agency as part of the Partnership for Sustainable Communities, which are listed fully at <http://www.dot.gov/affairs/2009/dot8009.htm>.

The response to Section C, Question 13 enumerates the anticipated job creation benefit of the tasks included in the Chicago-St. Louis Corridor Supplement Project.

Each of the tasks included in this application will make the Chicago-St. Louis high-speed rail service more attractive, by virtue of reducing travel times by 9 minutes and enhancing on-time performance to 85%. This can also be expected to result in a diversion of travelers of about 21,300 riders annually starting in 2014 away from less-environmentally-friendly modes in the corridor, including auto, bus and airplane. Facilities and equipment design will employ green manufacturing and construction methods wherever possible. Although no new rolling stock is required as part of this application (the service requirements were covered in the previously-selected ROD Package of Improvements), the new, purpose-built high-speed rail rolling stock will comply with the latest environmental standards (as specified in the PRIIA Section 305 specifications) and can be expected to improve fuel-efficiency and cause less environmental impact compared to the existing equipment.

None of the work performed in any of the tasks included in this application will work against the promotion of coordination between the planning and investment in transportation, housing, economic development and other infrastructure decisions along the corridor.

(3) Project Delivery Approach

Describe the risk associated with delivery of the proposed Service Development Program within budget, on time, and as designed, including addressing:

- The timeliness of project completion and the realization of the project's benefits;
- The applicant's financial, legal, and technical capacity to implement the project;
- The applicant's experience in administering similar grants and projects;
- The soundness and thoroughness of the cost methodologies, assumptions, and estimates;
- The thoroughness and quality of the Project Management Plan;
- The timing and amount of the project's future noncommitted investments;
- The adequacy of any completed engineering work to assess and manage/mitigate the proposed project's engineering and constructability risks; and
- The sufficiency of system safety and security planning.

IDOT has the authority to accept funds granted by the FRA and to expend those funds. IDOT has previously received funds from the USDOT and the FRA. With the approval of "Illinois Jobs Now!" a \$31 billion capital bill enacted in 2009, IDOT has received a commitment from the State of Illinois for the high-speed rail project. The State of Illinois' FY2011 Capital Budget (covering the period July 1, 2010 to June 30, 2011) contains \$400 million in appropriations for high-speed rail projects.

Based on the early experience with the high-speed rail project, IDOT will be able to complete the final design and construction in a timely manner. An example of IDOT's ability to complete a project timely occurred in 2010 construction season on the high-speed rail corridor. IDOT and UPRR agreed that the construction needed to begin in 2010 in order to timely implement high-speed rail service. A construction agreement was executed on July 16, 2010 and major construction work began on the site on September 1, 2010. Eighty-five miles of track were scheduled; 77 miles were completed in less than 16 weeks. Work stopped on December 18, 2010 prior to completing the remaining eight miles, not because of contract or personnel issues, but due to poor weather conditions. The 2010 project was completed under budget. This rapid rate of progress will start again with the 2011 construction season; work will start on April 2, 2011. IDOT will ensure that the 2011 season is timely completed. It will add this same degree of management skill to the current application.

IDOT has experience in administering large projects of similar complexity. In addition to large highway projects, IDOT is currently administering the high-speed rail project with a total value of \$1.2 billion. To this end, IDOT was successful in

effectuating the 2010 construction agreement for high-speed rail. IDOT and UPRR have executed and begun preliminary work for the 2011 construction season which will begin on or about April 5, 2011. IDOT has even been successful with negotiating and executing a service outcomes agreement with UPRR and Amtrak. Task 6 includes the extension of the services of the Program Management Consultant (the PMC, which also includes construction administration services) for each of the other tasks making up the Chicago-St. Louis Corridor Supplemental Package. This can be expected to result in economies and benefits for the entire project, since the PMC has already developed and adopted numerous procedures and plans which govern the management and administration of similar services to those required for this package. Another aspect of Task 6 which can be expected to reduce project risk is the proposed continuation of the concrete tie QA/QC effort, which will extend the sampling, testing and analysis efforts to the ties used in the reconstruction of the Joliet-Dwight line section.

The success of the construction activities to date, including cost savings realized in the 2010 construction program, further demonstrate that UPRR and IDOT can work efficiently and effectively on major rail construction projects. In addition, the PMC has been fully capable of adapting to changing conditions, which are inevitable on a project of the magnitude of high-speed rail.

IDOT is in the process of developing a system safety program plan (SSPP) for high-speed rail. It will be reviewed by UPRR and Amtrak prior to adoption. The SSPP demonstrates that IDOT and the project management team considers system safety as an important element in its programs. In addition, the construction safety record during the 2010 construction season was exemplary, indicating that both IDOT and UPRR have a substantial commitment to workplace safety.

(4) Sustainability of Benefits

Identify the likelihood of realizing the proposed Service Development Program's benefits, including addressing:

- The applicant's financial contribution to the project;
- The quality of a Financial Plan that analyzes the financial viability of the proposed rail service;
- The quality and reasonableness of revenue, operating, and maintenance cost forecasts;
- The availability of any required operating financial support, preferably from dedicated funding sources;
- The quality and adequacy of project identification and planning;
- The reasonableness of estimates for user and non-user benefits for the project; and
- The reasonableness of the operating service plan.

IDOT and the State of Illinois have demonstrated a substantial commitment to the implementation of the high-speed rail project, including committing resources from "Illinois Jobs Now!" (previously discussed in this application). It has also taken steps in prior applications and in this application to ensure that the local share meets or exceeds the requirements whenever possible. IDOT has further demonstrated a substantial commitment to supporting Amtrak operations, both on the Chicago-St. Louis route and other IDOT-supported corridors in the State. The State has committed to cover any future operating and maintenance funding needs in each of the previous HSIPR funding applications. Each of the tasks included in this application will benefit from IDOT's commitment to ensuring that all high-speed rail assets are kept in a state of good repair over the life of the project. IDOT is living this commitment through its current negotiations with UPRR for the maintenance of the corridor. Any resulting agreement will provide maintenance that meets or exceeds FRA's requirements, in addition to railroad best practices.

A financial plan is an exhibit to this application.

IDOT and the PMC, along with the UPRR, have always set the highest standards in terms of project identification, planning and preliminary engineering efforts/work products. Through the 2010 Grant Agreement, the key parties have developed a continually-improving process of developing and reviewing plans and documents including costs and benefits. The tasks included in this application went through a vetting process wherein it was assured that all project partners were committed to the success and timely completion of the planning and preliminary engineering work.

G. Statement of Work

The Statement of Work (SOW) is a required document. This must be submitted using the Narrative Application Form Part II. Statement of Work available on FRA's website to provide the required information. The quality and completeness of this document will be measured as a Project Readiness evaluation criterion, as outlined in Section 5.2.1 of the NOFA.

Please provide the SOW as a separate document and list it in Section H.2 of this application.

The SOW is a description of the work that will be completed under the grant agreement and must address the background, scope, and schedule, and include a high-level budget for the proposed Service Development Program.

- (1) The SOW is required for a complete application package.
- (2) The SOW should contain sufficient detail so that both FRA and the applicant can:
 - a. Understand the expected outcomes of the work to be performed by the applicant, and
 - b. Track applicant progress toward completing key project tasks and deliverables during the period of performance.
- (3) The SOW should clearly describe project objectives, but allow for a reasonable amount of flexibility regarding how the objectives will be accomplished. It is important to describe the overall approach to and expectations for project/activity completion.
- (4) If the SOW describes work for phases and/or groups of component projects, the larger program should be explained in the background section of the SOW. The remainder of the SOW should be limited to describing the activities that directly contribute to the combined FRA and applicant effort which is funded under the grant agreement.

H. Optional Supporting Information

Provide a response to the following, as necessary, for the Service Development Program.

(1) Please provide any additional information, comments, or clarifications and indicate the section and question number that being addressed (e.g., Section E. 2). Completing this question is optional.

Section B, Question 2 - additional documents demonstrating completion of PE-NEPA activities include:

- a) Curve Re-Engineering MP 52.7
- b) Curve Re-Engineering MP 37.8
- c) Curve Re-Engineering MP 38.9
- d) Signed Straightlines 033011
- e) 1A Estimate 033011
- f) Joliet Transit Center Trackage
- g) Joliet Track and Signal Concept Plan
- h) Joliet Track and Signal Layout
- i) Joliet-Dwight CTC Estimate 033111
- j) Mazonia Siding Signal Estimate 033111
- k) Amtrak Support Letter
- l) Design Sprial Table
- m) Curve Re-Engineering MP 45.72
- n) Curve Re-Engineering MP 48.15
- o) Signed UP-Amtrak Straightlines 033111
- p) Task 5 Project Information
- q) Amtrak Ridership-Revenue Increase Estimate

Section B, Question 2 - an updated Environmental Assessment is provided covering the work to be done under Tasks 1), 2) and 3). Since no work will be done outside the right-of-way under Task 4), a Categorical Exclusion has been prepared and is submitted as part of this application. Tasks 5) and 6) will have no environmental impacts.

Section D, Question 2 - in August 2010, IDOT applied for funding for the IL-Chicago-St. Louis IPR-Joliet-Dwight Cap[acity] Improve[ment] project. This application was not selected for funding. The projects included in that application are the ones which now constitute Task 1 of this Application.

Section D, Questions 4 & 5 - all dollar amounts are in FY2011 dollars.

Section D, Question 5 - the UPRR "in-kind" contribution consists of right-of-way, which will be provided at no additional cost to the project.

Section D, Question 12 - Average annual jobs created are 475 per year; total over final design and construction tasks are around 1910 jobs. Tasks in this application are not expected to effect operations-phase job creation. Numbers included are from 2009 ROD package of improvements application. IDOT and UPRR are currently negotiating maintenance requirements.

Section D, Question 13 - number of round trip are IDOT-supported "Lincoln Service" trains only. One-way time is shown and is for a trip between Chicago and St. Louis and is the weighted average of the three round trips. Current case is on completion of ROD package of improvements, future statistics reflect completion of ROD with Supplemental projects completed. Total expected run time, average speed and reliability impacts are for completion of new main and extended second main tracks, track upgrades, and PTC projects cumulatively. The 9 minute travel time reduction shown for tasks 2 & 3 assume that tasks 2 & 3 are both constructed. Private / farm crossing, ROD study, and PM/CA tasks do not affect operating results.

Section E, Question 1 - UPRR route-miles and track-miles are for Dwight-East St. Louis line section on completion of ROD package of improvements.

Section E, Question 3 - number of freight train movements varies by line section.

(2) Please provide a document title, filename, and description for all optional supporting documents. Ensure that these documents are uploaded to GrantSolutions.gov with the narrative application form and use a logical naming convention.

Document Title	Filename	Description and Purpose
Service Development Plan	IL-Chicago-St. Louis Supplement SDP 1 Serv Dev Plan	FRA Requirement; presents project information and expected benefits in a systematic way which allows FRA analysis and comparison with other projects.

Amtrak Support Letter	IL-Chicago-St. Louis Supplement SDP 16 Amtrak Support Ltr	Demonstrates existing Passenger Service Operator's commitment to projects and support for continuing corridor improvement program.
Design Spiral Table	IL-Chicago-St. Louis Supplement SDP 17 Des Spiral Table	Tabular presentation of possible curve re-engineering on Tasks 1 and 2 projects to increase passenger train speeds in this section of line; also shows curves where re-engineering is not possible or not practical.
Curve Re-Engineering at MP 45.72	IL-Chicago-St. Louis Supplement SDP 18 Curve Re-Engrg MP 45.72	Possible re-engineering of the curve to increase passenger train speeds on this section of line.
Curve Re-Engineering at MP 48.15	IL-Chicago-St. Louis Supplement SDP 19 Curve Re-Engrg MP 48.15	Possible re-engineering of the curve to increase passenger train speeds on this section of line.
Signed UP-Amtrak Straightlines	IL-Chicago-St. Louis Supplement SDP 20 Signed UP-Amtrak Straightlines 033111	Cover sheet (only) of UPRR project drawings; signed by UPRR and Amtrak to indicate concurrence of both stakeholders with the proposed improvement program.
Task 5 Project Information	IL-Chicago-St. Louis Supplement SDP 21 Task 5 Info	Presentation materials on the process, deliverables, budget and schedule for the proposed lessons-learned (ROD Study) in Task 5. Demonstrates advanced-state of project concept and concurrence between IDOT and a major University/Rail Research Facility to conduct this task.
Amtrak Ridership-Revenue Increase Estimates	IL-Chicago-St. Louis Supplement SDP 22 Amtrak Ridership-Rev Est	Sensitivity-testing by the existing Passenger Service Operator, which estimates anticipated ridership and revenue benefits of the operational improvements possible under this program; also demonstrates stakeholder support of the proposed program.
Environmental Assessment	IL-Chicago-St. Louis Supplement SDP 23 EA	FRA and PE requirement; demonstrates that program has considered all environmental aspects and developed a reasonable mitigation program for each of these aspects.
Categorical Exclusion	IL-Chicago-St. Louis	FRA and PE requirement; demonstrates that the aspects of the program included in this document

	Supplement SDP 24 CE	will not have any environmental impacts.
Final Environmental Impact Statement (EIS)	IL-Chicago-St. Louis Supplement SDP 25 EIS	FRA and PE requirement; demonstrates that the aspects of the program included in this document will not have any environmental impacts.
Record of Decision (ROD)	IL-Chicago-St. Louis Supplement SDP 26 ROD	FRA and PE requirement; demonstrates that the aspects of the program included in this document will not have any environmental impacts.
UPRR Support Letter	IL-Chicago-St. Louis Supplement SDP 27 UP Support Ltr	Demonstrates existing corridor owner and key stakeholder's commitment to projects and support for continuing corridor improvement program.
Draft System Safety Program Plan Outline	IL-Chicago-St. Louis Supplement SDP 28 SSPP Outline	FRA and PE requirement; demonstrates that IDOT places emphasis on safety in all aspects of the HSR improvement program; draft document to be reviewed by UPRR and Amtrak prior to adoption.
Financial Plan	IL-Chicago-St. Louis Supplement SDP 29 Financial Plan	FRA Requirement; summarizes program development costs and funding, including IDOT and UPRR's commitment to the project.
Program Management Plan	IL-Chicago-St. Louis Supplement SDP 30 PMP	FRA Requirement; summarizes corridor development and construction, including processes and procedures to be followed to ensure expeditious implementation and timely completion.

Applicant: State of Illinois - Illinois Department of Transportation
Application Number: HSR2011000498
Program: PFP – Passenger and Freight Railroad Programs
Announcement: High-Speed Intercity Passenger Rail (HSIPR) Program:
Project Title: **IL- Chicago – St Louis Corridor Supplement SDP**
Status: Submitted 4/4/2011

Document Title:

HSIPR Narrative Application Form Part II SOW – Service Development Program
(upload #2)

Narrative Application Form – Service Development Program Part II Statement of Work

High-Speed Intercity Passenger Rail (HSIPR) Program

Statement of Work

The quality and completeness of this document will be measured as a Project Readiness evaluation criterion, as outlined in Section 5.2.1 of the NOFA. The applicant must provide a sufficient level of detail regarding scope, schedule, and budget that demonstrates the project is ready to immediately advance to award. Tables have been provided as illustrative examples for capturing data however, applicants can delete or adjust the tables as necessary. This form must be listed in Section H.2 of the Narrative Application Form Part I.

- (1) **Background.** Briefly describe the events that led to the development of this Service Development Program and the issue the program will address. Also describe the transparent, inclusive planning process used to analyze the investment needs and service objectives of the full corridor on which the Service Development Program is located.

Each of the proposed improvements included in this application can be completed and be of benefit to the existing passenger and freight services independent of the ROD/2A Package of Improvements included in the current Grant Agreement (FR-HSR-0015-11-01-01, hereinafter “2010 Grant”). This application includes the following major tasks, (which will be referred to throughout the remainder of this application):

Planning and Development Process

Task 1: The proposed physical plant improvements included in these tasks were originally identified during a UPRR/Amtrak operations analysis, and have been refined by the continuing planning and design process. This task will permit trains to more expeditiously pass or overtake one another in the Joliet-Dwight line section. These improvements are a logical and necessary step in the incremental development of improved passenger service on this Corridor and they will also provide critical capacity enhancements and improved on-time performance for both freight and passenger trains. IDOT and the UPRR have continued to explore projects that can increase the operational flexibility on the Corridor, and to identify projects which can make a positive contribution to the on-time performance and/or running time reductions for the Corridor passenger trains.

Task 2: The proposed physical plant improvements included in these tasks were identified as a result of the Task 1 operations analysis process. This task will permit trains to operate at speeds of up to 110 mph. These improvements are a logical and necessary step in the incremental development of improved passenger service on this Corridor. IDOT and the UPRR have continued to explore projects that can make a positive contribution to running time reductions for the Corridor passenger trains.

Task 3: – In response to the Federal mandate that a PTC system be installed on lines including this one, and as part of the 2A 2010 Grant Agreement work, an ongoing development process has been implemented by IDOT, including representatives of UPRR, IDOT, Amtrak, ICC, and FRA. Meetings have been held regularly to identify issues and propose resolutions. Proposals have been made to FRA for reaction and approval. This process will continue. The work of this task will provide installation of PTC on the Dwight-Joliet segment.

Task 4: A treatment method for the private and farm crossings was included in the Environmental Impact Statement (EIS) of January 2003 and approved by the FRA’s Record of Decision (ROD) in January 2004. The approach taken with regard to the private and farm crossings in these documents was that they would receive two-quadrant gate installations with no vehicle detection loops. This design concept was also the basis on which the costs included in the October 2009 HSIPR Funding Application were developed.

When the Chicago-St. Louis HSR project began in early 2010, an aggressive, transparent, collaborative grade crossing diagnostic program was adopted. Team members included IDOT, the UPRR and the Illinois Commerce Commission (ICC). The team looked at each grade crossing on the Corridor and created a recommended approach for dealing with the crossing

issues. This field diagnostic effort was followed up by scheduled design review teleconferences involving representatives of each of the previously-listed stakeholders, as well as the FRA. On the basis of these teleconferences, the design requirements for the private and farm crossings were modified to include four-quadrant gates (two each, entrance and exit gates), the exit gate management system, vehicle detection loops and additional equipment housings as required to accommodate the augmented installations at each of the 10 private crossings and the 23 farm crossings between Dwight and East St. Louis. The objective of these modified private and farm crossings is to enhance the safety at these crossings. Public acceptance of the overall HSR project is likely to increase with these enhanced safety efforts.

Tasks 5 and 6: The successful track record IDOT and the UPRR have towards reaching mutual agreement, completing construction activities within schedule/budget and in establishing the framework for ensuring the sustainability of the project is recognized as being of benefit to other HSR projects throughout the country. Task 5 provides a systematic approach for making that process, the lessons-learned and recommendations for future HSR implementation processes available to others. Task 6 covers the cost of continuing the Program Management and Construction Administration services over the projects included in this application. Maintaining this arrangement into the supplemental project is considered to be the most cost-effective way of providing these services, since it takes advantage of the experience IDOT's Program Management Consultant (PMC) has gained in the administration of the design program to-date and in the course of the 2010 and 2011 construction programs. The PMC possesses the proper mix of personnel and experience to adjust to the changing needs of the HSR program, and keeping the team in place for the supplemental project will avoid any learning-curves or other delays due to bringing a new team on-board. The extension of the concrete tie QA/QC program proposed under this supplementary program provides a link between the Tasks 5 and 6 work by continuing the sampling, testing and analysis process begun in the 2010 construction work and continuing into the 2011 construction. The QA/QC effort will further extend the industry's knowledge base, and the Task 5 effort provides a means by which this knowledge can be shared to a wider audience.

- (2) Scope of Activities.** Clearly describe the scope of the proposed Service Development Program and identify the general objective and key deliverables.

Task 1 New Siding and Extended Second Main

Scope:

This task include the final design and construction of a new 2.1-mile passing siding near Mazonia and the construction of 7.9 miles of new 2nd main track, each including accompanying bridge and road crossing work. The lack of a siding near Mazonia and limited sections of 2nd main track between Joliet and Dwight seriously undermines current rail operations. Some of the existing sidings on this line are severely limited in terms of speed and/or access (being single-ended, etc.). causing inefficient use of crews and increasing times and requiring additional pad in the schedule to protect reliability. To correct this problem, Task 1 includes the installation of centralized traffic control (CTC) on the segment from Mazonia to North Joliet (beginning of CN double-track) and the addition of power-operated crossovers/switches north and south of the Joliet Union Depot (UD) Tower limits, including crossovers between the UPRR main tracks (two locations) and crossovers or power-operated switches connecting into BNSF and CN track in Joliet. New track, signal and other components will be used in all aspects of the proposed projects. These will allow the railroad to achieve and to maintain a state of good repair for these rail assets.

These measures will provide increased reliability in the operation of existing Amtrak passenger and UPRR freight service on the Corridor, by reducing delay times and increasing average speeds on the line section between Joliet and Dwight, IL. The projects will also complement the Chicago-St. Louis ROD improvements selected by FRA for funding, which will be constructed between Dwight and East St. Louis, IL. The proposed projects will enhance train operations in the section of line immediately to the north of the ROD package of improvements and will serve to further enhance the on-time performance of trains on the Corridor. Both improvements are located on the UPRR Joliet Subdivision.

Key deliverables:

Key deliverables for Task 1 include final design drawings, the issued-for-bid procurement package and the as-built drawings on completion of the project.

Task 2 Track Upgrades

Scope:

The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (not ALL improvements) for the Corridor area from MP42.8 to MP72.8. The statement of work never contemplated that all first main track upgrades from

42.8 to 72.8 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP36.7 to MP 42.8. Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds will allow some of the upgrades between MP 72.8 and MP 54 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 72.8 and 54 and for main track upgrades on the remainder of the Corridor, 18 miles from MP 54 to MP 36.7 (between approximately Wilmington and Joliet, IL). Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet, IL.

Together with the work described in Task 3 (below), this project will extend the distance over which passenger trains can run at 110 mph (where safe/practical). New track, signal and other components will be used in all aspects of the proposed projects. These will allow the railroad to achieve and maintain a state of good repair for these rail assets.

Key deliverables:

Key deliverables for this task will be the final design drawings, the issued-for-bid procurement package and the as-built drawings on completion of the project.

Task 3 PTC

Scope:

The 2010 Grant includes funds for PTC improvements from MP 72 to MP 281. This application seeks funding to equip the existing first main track and proposed second tracks with PTC between Dwight and Joliet, IL (37 miles from MP 36.7 to 72.8); This task includes final design and construction of the Positive Train Control (PTC) system on the main track(s) and sidings between Dwight (MP 72.78) and Joliet (MP 36.7). It will add to the Chicago-St. Louis 2010 Grant improvements, and will serve to reduce passenger train running times on this section of the UPRR Joliet Subdivision. The task also includes additional signaling work, details to be determined through refinement of engineering design, that could support 110 mph operations on an advanced schedule more cost-effectively. New components will be used in all aspects of this project, allowing the railroad to achieve and maintain a state of good repair for these rail assets.

Key deliverables:

Key deliverables for this task include the final design drawings, the issued-for-bid procurement package and the as-built drawings on completion of the project.

Task 4 Private/Farm Crossings

Scope:

This task includes the additional upgrade of the private crossings and the farm crossings (33 total) between Dwight and East St. Louis. Basic upgrades were included in the 2010 Grant, in the form of dual-gate warning systems. However, as a result of crossing diagnostics and the collaborative planning process involving IDOT, UPRR, ICC, FRA, and others, recent local agreements and FRA direction now assumes quad gates and other additional enhancements. This task includes design and construction of the additional enhancements.

The additional final design and construction of the enhanced private and farm crossing warning systems installations on the line section between East St. Louis (MP 281.00) and Dwight (MP 72.78) is included in this task. There are a total of 10 private crossings and 23 farm crossings on this section of line. Safety for train crews and passengers, as well as area residents will be enhanced on completion of this task. Increased public acceptance of the project is also an objective of this work. New components will be used in all aspects of the proposed projects, allowing the railroad to achieve and maintain a state of good repair for these rail assets.

Key deliverables:

Key deliverables for Task 4 include final design drawings, the issued-for-bid procurement package and the as-built drawings on completion of the project.

Task 5 ROD Study

Scope:

Documentation of the planning, construction and operations experience gained on the 2010 Grant improvements and the entire Corridor will be accomplished in this task. These materials will be used to educate faculty and students, planners, engineering professionals, public officials, other States, and public and private agencies about the lessons-learned during the

Chicago-St. Louis HSR project. The objective of this program is to contribute to the national knowledge base on how to develop HSR in the U.S.

Key deliverables:

Key deliverables for Task 5 include include: an overview document summarizing all aspects of the IDOT project; a report/books describing the planning, construction and operational phases of the 2010 Grant project, as well as identifying challenges and lessons-learned on this project; comprehensive set of presentation files complementing each of the books; and, a website for the organization and dissemination of on-going and completed work.

Task 6 Program Management/Construction Administration

Scope:

Task 6 provides for the IDOT Program Management Consultant (PMC) team and other consultants to manage the design, construction and implementation of the discrete projects included in this application for Chicago-St. Louis Corridor Supplement program. This task also provides for additional QA/QC oversight of construction and the concrete ties (including continuation of the sampling, testing and analysis process) to be used in the track construction projects between Joliet and Dwight, as listed above. Consistency in personnel and practices will benefit the overall high speed rail program by building on the record of achievement the PMC has established in the 2010 and 2011 design and construction activities. This task also includes extension of the construction QA/QC and concrete tie QA/QC effort to cover those components used in the construction provided for in Tasks 1 and 2 of this program. The on-going sampling, testing and analysis efforts include the services of independent firms to provide expert review of concrete tie manufacturing facilities for production and QA/QC compliance with UPRR specifications. Samples of ties used throughout the production process for Tasks 1 and 2 will be sent to an independent testing laboratory for analysis to determine conformance to pre-production and structural/material standards. These QA/QC processes must be repeated for each concrete tie manufacturer and plant location involved. The previously-developed (by IDOT's Program Management Consultant) QA Manual and QA Procedures will be used to guide this work. These are living documents, which may be updated as necessary.

Key deliverables:

The key deliverables for Task 6 include grant reporting, updates to the financial plan, updated budgets and schedules, construction oversight reports and QA/QC reports.

(2a) General Objectives. Provide a general description of the work to be accomplished through this grant, including program work effort, location, and other parties involved. Describe the end-state of the program, how it will address the need identified in Background (above), and the outcomes that will be achieved as a result of the program, such as;

- Service(s) that would benefit from the Service Development Program, the stations that would be served, and the State(s) where the service operates;
- Anticipated service design of the corridor or route with specific attention to any important changes that the Service Development Program would bring to the fleet plan, schedules, classes of service, fare policies, service quality standards, train and station amenities, etc.; and
- Other rail services, such as commuter rail and freight rail that will make use of, benefit from, or otherwise be affected by, the Service Development Program.

Task 1 will be carried through final design, construction and implementation phases in this application. The additional capacity and enhancements included in this task will increase the attractiveness of the HSR services and enhance public acceptance of the HSR project by enhancing the reliability of the HSR service. The additional siding and extended second main track will increase operational flexibility on this section of line, which is also of benefit to UPRR freight operations.

Task 2 will be carried through final design, construction and implementation phases in this application. This will allow track and infrastructure to support HSR trains operating at 110 mph (where safe/practical) on an additional 37 miles of the Corridor, thereby adding to the 2010 Grant improvements and leading to reductions in running times and enhancing the reliability of the HSR service.

Task 3 will be carried through final design, construction and implementation phases in this application. On completion, this will provide necessary signal/PTC installation to allow HSR trains to operate at 110 mph (where safe/practical) on an additional 37 miles of the Corridor, thereby adding to the 2010 Grant improvements and leading to reductions in running times and enhancing the reliability of the HSR service.

Task 4 the scope of this task includes the final design, manufacture, installation, testing and implementation of the enhanced private and farm crossings between Dwight and East St. Louis, IL. This section of the line includes 10 private crossings and 23 farm crossings. It is IDOT's position that, due to the timing of this application, the activities associated with the enhancement of these crossings can be undertaken in synch with the parallel activities for the private and farm crossing designs previously funded by the 2010 Grant (which funded two-quad gates at the private crossings and pre-dated the current design concept for the farm crossings). Therefore, these enhanced designs will not delay the completion of the overall project on the Corridor.

Other parties to Task 4 include the UPRR and its contractors who will be engaged in design work construction-related activities and the testing/implementation effort. A yet-to-be-identified signal contractor will be responsible for the manufacture of the additional equipment required for each of the crossings. IDOT and the ICC will participate in the testing and implementation phase activities. FRA will be advised on completion of each project milestone and copied on each project deliverable, as required by the previously-executed Cooperative Agreement for the ROD Package of Improvements (dated December 2010).

The high-speed and conventional passenger trains operating on the Corridor will benefit due to enhanced safety for their operation. Similarly, UPRR and KCS freight trains should also benefit from this task, again due to enhanced safety of operation through the private and farm crossings on the sections of line over which their trains operate.

Task 5 will allow future IDOT or other State's HSR projects to tap into the lessons-learned in the conduct of the ROD projects, and will increase the national knowledge base with regard to HSR implementation. This task is composed of three phases: Planning (e.g., capacity analysis and route analysis, financial overview an plan, alternatives analysis and program management); design and construction (e.g., review of the rail system, the equipment, maintenance strategy of stations, signaling and grade crossing development)' and operations (e.g., an analysis of ridership, train schedule development, FRA coordination). Ideally, the outcome of this task will allow other interested parties to more quickly reach their HSR project objectives, reducing the implementation costs for the USDOT and other stakeholders.

Task 6 has the objective of reducing the overall program implementation cost for the IDOT HSR program by extending the working relationship of the PMC to cover the projects in this application. The PMC will oversee final design, construction and implementation phases for each of the preceding tasks.

In the case of the extended construction and concrete tie QA/QC effort, this work has the objective of ensuring that the safety, reliability and maintainability of these key components in the HSR project are continued. The objective will be attained through the development and implementation of a comprehensive QA/QC program to support the HSR project. The results of this extended program will increase the industry's knowledge base and in concert with the Task 5 effort will provide a means by which this knowledge can be shared over a broader range of interested parties, etc.

(2b) Description of Work. Provide a detailed description of the work to be accomplished through this grant by phase, component project, or major task (e.g., FD and Construction) including the geographical and physical boundaries of the program. Address the work in a logical sequence that would lead to the anticipated outcomes and the end state of the activities.

- Include a description of the activities and the measurable outcomes of each phase or group of activities
- Substantive activities of the Service Development Program (e.g., specific capital investments proposed);
- The location(s) of the Service Development Program's component projects, including name of rail line(s), State(s), and relevant jurisdiction(s) (include a map in supporting documentation);
- Any use of new or innovative technologies; and
- Any use of railroad assets or rights-of-way, and potential use of public lands and property.

Task 1 – this task will be performed in Illinois on a segment of the Chicago-St. Louis rail Corridor. A new 2.1 mile siding will be installed near Mazonia, IL (MP 55.0 to MP 57.13), 7.9 miles of extended 2nd main track will be built between MP 36.7 (in Joliet) and MP 44.69 (in Elwood, IL). Signal work will be performed in the Joliet area in support of this.

Task 2 - this task of track and infrastructure upgrades will be performed between MP 72.8 and MP 36.7. The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (not ALL improvements) for the Corridor area from MP42.8 to MP72.8. The statement of work never contemplated that all first main track upgrades from 42.8 to 72.8 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP36.7 to MP 42.8. Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds will

allow some of the upgrades between MP 72.8 and MP 54 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 72.8 and 54 and for main track upgrades on the remainder of the Corridor, 18 miles from MP 54 to MP 36.7 (between approximately Wilmington and Joliet IL). Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet. The principal segments of work on both these tasks include: Final Design and Construction. Final Design will be completed prior to construction.

For both Task 1 and Task 2, Final Design (FD) activities will be relevant to the applicable construction, including:

- a) Survey work
- b) Final horizontal and vertical designs for civil engineering, track and drainage structures required to complete the projects
- c) Identification of the location and nature of utilities in or adjacent to the project work area
- d) Development of a utility protection plan
- e) Advance all designs to 100% level of completion
- f) Systematic development and refinement of specification documents
- g) Property acquisition, where required (for example, re-design of some curves to allow higher trains speeds may require this)
- h) Environmental permitting requirements will be identified and this process will be advanced to ensure that the necessary permitting and approvals are in place to allow construction to begin immediately
- i) Perform grade crossing diagnostics, and
- j) Other tasks as may be required to complete the FD work for these tasks.

Task 1 Construction activities include:

- a) Secure the materials required for the proposed projects, some of which may come from UPRR stock
- b) Grading work required for the new or extended tracks
- c) Construction of drainage structures where required
- d) Install sub-ballast for track roadbed followed by the ballast, track and other track materials installation
- e) Turnout/switch installation and powering-up of the switches. New switches will be installed at either end of the siding, while intermediate crossovers will be installed at several locations along the extended 2nd main track. These will include sets of crossovers between the UPRR main tracks, a connection to the BNSF tracks and a power-operated switch connecting to the CN at Jackson Street in Joliet. Testing of the projects will be done prior to turning these over for revenue service
- f) Installation of required signal and communications equipment
- g) Verify that the installations meet all operational and safety requirements prior to initiation of revenue service, and
- h) Other tasks as may be required to complete the construction work for these tasks.

Task 2 Construction activities include:

- i) Secure the materials required for the proposed projects, some of which may come from UPRR stock
- j) Construction of drainage structures where required
- k) Turnout/switch installation and powering-up of the Task 2 switches
- l) Installation of required signal and communications equipment
- m) Verify that the installations meet all operational and safety requirements prior to initiation of revenue service, and
- n) Other tasks as may be required to complete the construction work for these tasks.

Task 3 – final design work will be performed by the UPRR and its contractors. The construction work will be conducted on the Joliet Subdivision of the UPRR between Joliet (MP 36.7) and Dwight, IL (MP 72.78). The Final Design work will be completed prior to the construction period.

Final Design (FD) activities include:

- a) Complete final design requirements for components and materials, including radio frequency requirements
- b) Identification of locomotive-borne equipment requirements based on final field equipment design
- c) Advance 30% level design to 100% level for construction
- d) Final review of construction activities
- e) Property acquisition, where required
- f) Secure environmental permits, as required by final design
- g) Governmental permitting, as required by final design
- h) Other tasks as may be required to complete the final design

Construction activities include:

- a) Acquire and/or secure required materials, as based on design requirements
- b) Perform grading and other location preparatory work
- c) Construction of radio transmission structures as necessary by design requirements
- d) Installation of required signal equipment and materials
- e) Installation of all equipment (locomotive and/or cab car)-borne materials as required by final design
- f) Test and verify all materials and equipment meet all operational and safety requirements prior to initiation of revenue service, including regulatory review and approval
- g) Other tasks as may be required to complete the construction activities
- h) Final review of construction activities (punch-list, etc.)
- i) Complete as-built drawings for PTC system

Task 4 – this task will be performed in Illinois on a segment of the Chicago-St. Louis rail corridor. A total of ten private crossings and 23 farm crossings on the Dwight-East St. Louis, IL segment will be improved through the addition of exit gates, exit gate management system and vehicle detection loops. The Final Design work will be completed prior to the construction period.

Final Design (FD) activities include:

- a) Final horizontal and vertical designs for civil engineering, including track at crossing locations
- b) Identification of all utilities affected by construction activities
- c) Development of a utility protection/mediation plan
- d) Advance 30% level design to 100% level for construction
- e) Final review of construction activities
- f) Property acquisition, if required
- g) Secure environmental permits, as required by final design
- h) Governmental permitting, as required by final design
- i) Other tasks as required to complete final design

Construction activities include:

- a) Acquire and/or secure required materials, as based on design requirements
- b) Perform grading and other location preparatory work
- c) Construction of drainage or underground structures as necessary by design requirements
- d) Installation of required signal equipment and materials
- e) Installation of all roadway improvements as required by final design
- f) Test and verify all materials and equipment meet all operational and safety requirements prior to initiation of revenue service, including regulatory review and approval
- g) Other tasks as may be required to complete the construction activities
- h) Final review of construction activities (punch-list, etc.)
- i) Complete as-built drawings for grade crossing warning system

Task 5 – activities include the following:

- a) In Phase I – Planning portion of the ROD Study, a service development feasibility study will be conducted along with a financial plan review, environmental review and program management review.
- b) In Phase II – Design and Construction in the Record of Decision (ROD) Study, the consultant will conduct a review of the key physical components of the IDOT HSR project, including track work, the rolling stock, signaling, grade crossings and stations
- c) In Phase III – Operations portion of the ROD Study, review the process followed with regard to ridership forecasting, schedule development, coordination with UPRR, Amtrak and the FRA, consistency with the MWRRI planning process, documentation of the initial operating results and an assessment of the operating economics
- d) Develop draft and final versions of the project overview document
- e) Prepare preliminary and final versions of the detailed report and topic-specific books
- f) Develop draft and final versions of the instructional PowerPoint files
- g) Prepare preliminary and final versions of the project information-dissemination website

Task 6 Program Management and Construction Administration – In this task, the PMC and other consultants and professionals will manage and perform the design, construction and implementation of the discrete projects included in this

application. This task also involves QA/QC oversight of construction and the concrete ties. For the extended concrete tie QA/QC effort, the activities will include:

- a) Review of design, contract and procurement documents, as well as testing, operating and maintenance procedures to verify that quality aspects have been considered
- b) Surveillance and/or witness of manufacturing, construction, installation and integrated testing activities for adherence to design, contract and operational requirements
- c) Audits of Quality Management Systems for adequacy and compliance with requirements
- d) Preparation of draft and final reports on the QA/QC process
- e) Draft and final versions of the laboratory testing results report will be prepared
- f) Preparation of draft and final reports of the overall concrete tie QA/QC effort

(2c) Deliverables. Describe the work products of the program that were provided to FRA during the application process or will be completed as a part of this grant. In the table provided, list the deliverables, both interim and final, that are the outcomes of the phases and/or component projects. The table below should match the information provided in Sections D.14 and D.15 of the Narrative Application Form Part I.

DELIVERABLES by TASK

TASK	DELIVERABLE
Task 1 Siding and Extended Main	
PE/NEPA	Refinement of preliminary engineering materials and any revision/refinement to NEPA documents as requested by FRA
FD	Final horizontal and vertical designs
	Utility identification, location and protection measures
	100% design drawings
	Developed and refined project specifications
	Property Acquisition
Construction	Completed construction, including punch list items
Task 2 Track Upgrades	
PE/NEPA	Refinement of preliminary engineering materials and any revision/refinement to NEPA documents as requested by FRA
FD	Final horizontal and vertical designs
	Utility identification, location and protection measures
	100% design drawings
	Developed and refined project specifications
	Property acquisition
	Permits
Construction	Completed construction, including punch list items
	As-built drawings

Task 3 PTC	
PE/NEPA	Refinement of preliminary engineering materials and any revision/refinement to NEPA documents as requested by FRA
FD	Final horizontal and vertical designs
	Developed and refined project specifications
	Property acquisition
	Permits
Construction	Completed construction, including punch list items
	As-built drawings
Task 4. Private and Farm Crossings	
PE/NEPA	Refinement of preliminary engineering materials and any revision/refinement to NEPA documents as requested by FRA
FD	Developed and refined project specifications
	Property acquisition
	Permits
Construction	Completed construction, including punch list items
	As-built drawings
Task 5 ROD Study (PE/NEPA, FD and Construction do not apply to this phase)	IDOT project phases overview document
	Report/books detailing project phases, challenges and lessons learned
	Comprehensive set of presentation files
	IDOT high speed rail information web site
Task 6 Program Management and Construction Administration	
PE/NEPA	Oversight of refinement of preliminary engineering materials and NEPA documents as requested by FRA
FD	None at this time
Construction	Construction oversight final report
	Final and Summary reports on concrete QA/QC process
	Grant reporting
	Updates to budgets and schedules
	Updates to the Financial Plan

- (3) **Project Schedule.** In the table below, estimate the approximate schedule for completing each phase. If there is only one phase, estimate the duration for each component task. For total project duration, reference Section D.3 of the Narrative Application Form Part I.

	Phase or Component Project	Duration		
		Start Month	to	End Month
1	New siding and extended second main track	01/2013	to	12/2014
2	Track upgrades	04/2012	to	6/2015
3	PTC	Immediately	to	12/2015
4	Private / Farm Crossings	Immediately	to	12/2014
5	ROD Study	04/2011	to	03/2014
6	Program Management & Construction Administration	Immediately	to	12/2015
	Total Duration	Immediately to 12/2015		

- (4) **Project Cost Estimate/Budget.** Provide a high-level cost summary for the phases, if applicable, of Service Development Program work in this section, using the Service Development Application Package Instructions, Narrative Application Form Part I, and the HSIPR Service Development Program Budget and Schedule form as references. The figures in this section of the Statement of Work should match exactly with the funding amounts requested in the SF-424 form, the HSIPR Service Development Program Budget and Schedule form, and in Section D of the Service Development Program Narrative Application Form. If there is any discrepancy between the Federal funding amounts requested in this section, the SF-424 form, the HSIPR Service Development Program Budget and Schedule form, or Section D of the Narrative Application Form Part I, the lesser amount will be considered as the Federal funding request. Round to the nearest whole dollar when estimating costs.

The total estimated cost for the proposed Service Development Program is provided below, for which the FRA grant will contribute no more than the Federal funding request amount indicated. Any additional expense required beyond that provided in this grant to complete the Service Development Program project shall be borne by the Grantee.

Service Development Program Overall Cost Summary			
#	Phase		Cost in FY11 Dollars
1	New siding and extended second main track		\$ 102.4 M
2	Track upgrades		\$ 76.2 M
3	Private / Farm Crossings		\$ 6.5 M
4	PTC		\$ 23.0 M
5	ROD Study		\$ 0.9 M
6	Program Management / Construction Administration		\$ 39.5 M
	Total program cost		\$ 248.5 M
Federal/Non-Federal Funding			
		Cost in FY11 Dollars	Percentage of Total Program Cost
	HSIPR Federal funding request	\$ 168,380,000	75 %
	Non-Federal match amount	\$ 62,130,000	25 %
	Total program cost	\$ 248,510,000	100 %

With regard to the project capital costs, the State and UPRR are prepared to provide a local (non-Federal) match of 25%, significantly exceeding the requirement for participation in this funding program. This amount includes \$42.43 million from the State, provided through the budgeted “Illinois Jobs Now!” Capital Plan (a \$31 billion capital bill). The local match also includes a considerable contribution by the UPRR, including \$4 million in ROW valuation, provided at no additional cost to the project and a contribution of \$15.7 million.

To: All Concerned

Date: April 5, 2011

Subject: Notice of typographical errors

**IL-Chicago-St.-Louis Supplement - Service Development Program (SDP)
Application**

Memo

This memo was created subsequent to the application filing and was not part of the application documents.

The narrative application form - part 1 - for IL-Chicago-St.-Louis Supplement SDP application contained a typographical error at section D(5) (see below). The dollar amount in the "Illinois Jobs Now!" Capital bill portion of the application was incorrectly stated. Instead of \$4,430,000, the number should have been \$42,430,000. However, the percent of total program cost is correctly stated (17%) as is the sum of non-Federal sources (\$62,130,000, 25%). The Illinois share is also correctly stated on Application form SF424. A comment noting this typographic error was added to the on-line comment section of the application prior to the filing deadline.

As submitted - Narrative application form – SDP – part I – Section D(5)

(5) Indicate the source, amount, and percentage of non-Federal match for the proposed Service Development Program (if applicable). The sum of figures below should equal the amount provided in Section D.4. Click on the gray boxes to select the appropriate response from the lists provided in type of source, status of funding, and type of funds. Dollar figures must be rounded to the nearest whole dollar. Also, list the percentage of the total program cost represented by each non-Federal funding source. Provide supporting documentation that will allow FRA to verify each funding source. Any required verification documentation not available online should be submitted with the application package and listed in Section H.2 of this application.						
Non-Federal Match Funding Sources	Type of Source	Status of Funding ⁴	Type of Funds	Dollar Amount	% of Total Program Cost	Describe Any Supporting Documentation to Help FRA Verify Funding Source
"Illinois Jobs Now!" Capital Bill	Existing	Committed	Cash	\$ 4,430,000	17 %	http://www.illinois.gov.com/upload/New647.pdf
Union Pacific Railroad	Existing	Committed	Cash	\$ 15,700,000	6 %	
Union Pacific Railroad	Existing	Committed	In-Kind	\$ 4,000,000	2 %	
				\$	%	
				\$	%	
Sum of Non-Federal Funding Sources				\$ 62,130,000	25 %	N/A

There is a typographical error in the narrative application form - SDP - part II Statement of Work, section 4. The Federal Funding request states \$168,380,000 (see below). A number was transposed. The correct number is \$186,380,000. The HSIPR Federal funding request is correctly stated on the Application form SF424.

As Submitted – Statement of Work - SDP – Part 2 – Section 4

Service Development Program Overall Cost Summary			
#	Phase	Cost in FY11 Dollars	
1	New siding and extended second main track	\$ 102.4 M	
2	Track upgrades	\$ 76.2 M	
3	Private / Farm Crossings	\$ 6.5 M	
4	PTC	\$ 23.0 M	
5	ROD Study	\$ 0.9 M	
6	Program Management / Construction Administration	\$ 39.5 M	
	Total program cost	\$ 248.5 M	
Federal/Non-Federal Funding			
		Cost in FY11 Dollars	Percentage of Total Program Cost
	HSIPR Federal funding request	\$ 168,380,000	75 %
	Non-Federal match amount	\$ 62,130,000	25 %
	Total program cost	\$ 248,510,000	100 %

IL-Chicago-St. Louis Corridor Supplement Projects SDP

Application Assumptions

1. Please use this section to capture two separate sets of assumptions that will affect the costs shown in subsequent sheets. The contingency rate is the allowance for uncertainties in projected costs. The Annual Inflation Rate will be used to convert between 2011 constant dollars and Year of Expenditure dollars. Enter the assumed annual inflation rate for each category for each year, with the exception of 2011. Inflation rates for 2011 are not used in Year of Expenditure calculations in other sections of this form.

10 TRACK STRUCTURES & TRACK		
10.01	Track structure: Viaduct	Include elevated track structure of significant length consisting of multiple spans of generally equal length
10.02	Track structure: Major/Movable bridge	Include all elevated track structures with a movable span, and/or with a span of significant length (generally of approximately 400' or longer)
10.03	Track structure: Undergrade Bridges	Include elevated track structure of greater than 20 feet that does not fall into 10.01 and 10.02
10.04	Track structure: Culverts and drainage structures	Include all minor undergrade passageways (generally of 20 feet or less in width)
10.05	Track structure: Cut and Fill (> 4' height/depth)	Include grading and subgrade stabilization of roadbed
10.06	Track structure: At-grade (grading and subgrade stabilization)	All grading and subgrade stabilization of roadbed not included under cost categories 10.01 through 10.05 and 10.07
10.07	Track structure: Tunnel	Definition self-explanatory
10.08	Track structure: Retaining walls and systems	Definition self-explanatory
10.09	Track new construction: Conventional ballasted	Include all ballasted track construction on prepared subgrade, on new or existing rights-of-way
10.10	Track new construction: Non-ballasted	Include all slab, direct fixation, embedded, and other non-ballasted track construction on prepared subgrade, on new or existing rights-of-way
10.11	Track rehabilitation: Ballast and surfacing	Include undercutting, ballast cleaning, tamping, and surfacing not associated with new track construction
10.12	Track rehabilitation: Ditching and drainage	Definition self-explanatory
10.13	Track rehabilitation: Component replacement (rail, ties, etc)	Definition self-explanatory
10.14	Track: Special track work (switches, turnouts, insulated joints)	Include minor turnouts and interlocking, such as crossovers and turnouts at the ends of passing tracks
10.15	Track: Major interlockings	Significant interlockings at major stations and where routes converge from three or more directions
10.16	Track: Switch heaters (with power and control)	Include cost of power distribution equipment from commercial power source to interlocking location
10.17	Track: Vibration and noise dampening	Definition self-explanatory
10.18	Other linear structures including fencing, sound walls	Definition self-explanatory
20 STATIONS, TERMINALS, INTERMODAL		
		As associated with stations, include costs for rough grading, excavation, station structures, enclosures, finishes, equipment; mechanical and electrical components including HVAC, ventilation shafts and equipment, station power, lighting, public address/customer information systems; safety systems such as fire detection and prevention, security surveillance, access control, life safety systems, etc. Include all construction materials and labor regardless of who is performing the work.
20.01	Station buildings: Intercity passenger rail only	Definition self-explanatory
20.02	Station buildings: Joint use (commuter rail, intercity bus)	Definition self-explanatory
20.03	Platforms	Definition self-explanatory
20.04	Elevators, escalators	Definition self-explanatory
20.05	Joint commercial development	Construction at station sites intended to support non-transportation commercial activities (shopping, restaurants, residential, office space). Do not include cost of incidental commercial use of station space intended for use by passengers (newsstands, snack bar, etc). Costs may not be allowable for Federal reimbursement
20.06	Pedestrian / bike access and accommodation, landscaping, parking lots	Include sidewalks, paths, plazas, landscape, site and station furniture, site lighting, signage, public artwork, bike facilities, permanent fencing
20.07	Automobile, bus, van accessways including roads	Include all on-grade paving
20.08	Fare collection systems and equipment	Include fare sales and swipe machines, fare counting equipment
20.09	Station security	Definition self-explanatory
30 SUPPORT FACILITIES: YARDS, SHOPS, ADMIN. BLDGS		
30.01	Administration building: Office, sales, storage, revenue counting	Definition self-explanatory
30.02	Light maintenance facility	Include service, inspection, and storage facilities and equipment
30.03	Heavy maintenance facility	Include heavy maintenance and overhaul facilities and equipment
30.04	Storage or maintenance-of-way building/bases	Definition Self-explanatory
30.05	Yard and yard track	Include yard construction and track associated with yard
40 SITEWORK, RIGHT OF WAY, LAND, EXISTING IMPROVEMENTS		
		Include all construction materials and labor regardless of who is performing the work.
40.01	Demolition, clearing, site preparation	Include project/program-wide clearing, demolition and fine grading
40.02	Site utilities, utility relocation	Include all site utilities-storm, sewer, water, gas, electric
40.03	Hazardous material, contaminated soil removal/mitigation, ground water treatments	Include underground storage tanks, fuel tanks, other hazardous materials and treatments, etc.
40.04	Environmental mitigation: wetlands, historic/archeology, parks	Include other environmental mitigation not listed
40.05	Site structures including retaining walls, sound walls	Definition self-explanatory
40.06	Temporary facilities and other indirect costs during construction	Definition self-explanatory
40.07	Purchase or lease of real estate	If the value of right-of-way, land, and existing improvements is to be used as in-kind local match to the Federal funding of the project/program, include the total cost on this line item. In backup documentation, separate cost for land from cost for improvements. Identify whether items are leased, purchased or acquired through payment or for free. Include the costs for permanent surface and subsurface easements, trackage rights, etc.
40.08	Highway/pedestrian overpass/grade separations	Other than the grade separations included in this line item, highway-rail grade crossing safety enhancements generally fall under 50.06.

FRA Standard Cost Categories for Capital Projects/Programs*		Notes
40.09	Relocation of existing households and businesses	In compliance with Uniform Relocation Act

FRA Standard Cost Categories for Capital Projects/Programs*		Notes
50 COMMUNICATIONS & SIGNALING		
50.01	Wayside signaling equipment	Definition Self-explanatory
50.02	Signal power access and distribution	Definition Self-explanatory
50.03	On-board signaling equipment	Include on-board cab signal, Automatic Train Control (ATC), and Positive Train Control (PTC) related equipment
50.04	Traffic control and dispatching systems	Definition self-explanatory
50.05	Communications	Definition self-explanatory
50.06	Grade crossing protection	Includes all types of highway-rail grade crossing safety enhancements except for grade separation projects, which fall under 40.08.
50.07	Hazard detectors: dragging equipment high water, slide, etc.	Definition self-explanatory
50.08	Station train approach warning system	Definition self-explanatory
60 ELECTRIC TRACTION		
60.01	Traction power transmission: High voltage	Definition self-explanatory
60.02	Traction power supply: Substations	Definition self-explanatory
60.03	Traction power distribution: Catenary and third rail	Definition self-explanatory
60.04	Traction power control	Definition self-explanatory
70 VEHICLES		
		Include professional services associated with the vehicle component of the project/program. These costs may include agency staff oversight and administration, vehicle consultants, design and manufacturing contractors, legal counsel, warranty and insurance costs, etc.
70.00	Vehicle acquisition: Electric locomotive	Definition self-explanatory
70.01	Vehicle acquisition: Non-electric locomotive	Definition self-explanatory
70.02	Vehicle acquisition: Electric multiple unit	Definition self-explanatory
70.03	Vehicle acquisition: Diesel multiple unit	Definition self-explanatory
70.04	Veh acq: Loco-hauled passenger cars w/ ticketed space	Include cars with coach space, sleeping compartments, etc.
70.05	Veh acq: Loco-hauled passenger cars w/o ticketed space	Include dedicated food service, lounge, baggage and other service support cars
70.06	Vehicle acquisition: Maintenance of way vehicles	Definition self-explanatory
70.07	Vehicle acquisition: Non-railroad support vehicles	Include hi-rail bucket trucks, and other highway vehicles
70.08	Vehicle refurbishment: Electric locomotive	Definition self-explanatory
70.09	Vehicle refurbishment: Non-electric locomotive	Definition self-explanatory
70.10	Vehicle refurbishment: Electric multiple unit	Definition self-explanatory
70.11	Vehicle refurbishment: Diesel multiple unit	Definition self-explanatory
70.12	Veh refurb: Passeng. loco-hauled car w/ ticketed space	Include coaches, sleeping cars, etc.
70.13	Veh refurb: Non-passeng loco-hauled car w/o ticketed space	Include food service, lounge, baggage and other service support cars
70.14	Vehicle refurbishment: Maintenance of way vehicles	Definition self-explanatory
70.15	Spare parts	Definition self-explanatory
80 PROFESSIONAL SERVICES (applies to Cats. 10-60)		
80.01	Service Development Plan/Service Environmental	Cat. 80 applies to Cats. 10-60. Cat. 80 includes all professional, technical and management services related to the design and construction of infrastructure (Cats. 10 - 60) during the preliminary engineering, final design, and construction phases of the project/program (as applicable). This includes environmental work, design, engineering and architectural services; specialty services such as safety or security analyses; value engineering, risk assessment, cost estimating, scheduling, ridership modeling and analyses, auditing, legal services, administration and management, etc. by agency staff or outside consultants.
80.02	Preliminary Engineering/Project Environmental	
80.03	Final design	
80.04	Project management for design and construction	
80.05	Construction administration & management	
80.06	Professional liability and other non-construction insurance	
80.07	Legal; Permits; Review Fees by other agencies, cities, etc.	
80.08	Surveys, testing, investigation	
80.09	Engineering inspection	Include professional liability insurance and other non-construction insurance on 80.05 unless
80.10	Start up	Definition self-explanatory
90 UNALLOCATED CONTINGENCY		
		Includes unallocated contingency, project/program reserves. Document allocated contingencies for individual line items on Detailed Capital Cost Budget.
100 FINANCE CHARGES		
		Include finance charges expected to be paid by the project/program sponsor/grantee prior to either the completion of the project or the fulfillment of the FRA funding commitment, whichever occurs later in time. Finance charges incurred after this date should not be included in Total Project Cost. Derive finance charges from the project's financial plan, based on an analysis of the sources and uses of funds.
<p>*NOTE: To help evaluate and compare the costs of different applications FRA has developed 10 main Standardized Capital Cost Categories. These are provided to establish consistency in the use of the worksheets. The SCC cost breakdown is based on a traditional Design Bid Build model. If your project is Design Build, to the best of your ability, separate construction costs from design, administration, testing, etc. Put all construction costs in 10 through 60. Put design, administration, testing, etc. in "80 Professional Services." If you are not sure where to put a certain element of the project, consider the issue in general terms, using this sheet as a guide.</p>		

[Return to the Main Page](#)

Detailed Capital Cost Budget

Instructions:

To assist FRA in comparing projects, this form provides a breakdown of capital cost using Standard Cost Categories (SCCs). Definitions of FRA's SCCs can be found in the "Capital Cost Info" tab of this workbook. The data you enter in this form should be drawn from budget estimates or analysis you have available for your project.

1. Enter values in the yellow cells below. You should only provide data for those costs categories associated with this project; leave other cells blank.

2. The light blue cells will auto-populate based on the Contingency rates entered in "General Info."

3. Explain any large discrete, identifiable and/or unique capital investments in the space provided at the bottom of this form. Where an explanation is appropriate, place an asterisk in the far right column to denote that an explanation is provided. Please include the reference to the Cost Category number in your explanation. Example: "10.07: Tunnel at [location], #.# miles in length, consists of one twin-tube New Austrian Tunneling Method tunnel with cross-passages located every .25 miles."

4. For purposes of this application "Base Year Dollars" are Fiscal Year (FY) 2011 Dollars.

Program Name: IL-Chicago-St. Louis Corridor Supplement Projects SDP

	Applicant Inputs				Total Allocated Cost (Thousands of Base Yr FY11 Dollars)	Allocated Contingency (Thousands of Base Yr/FY 11 Dollars)	TOTAL COST (Thousands of Base Yr/FY 11 Dollars)	Explanation Provided? (If so use *)
	Unit	Quantity	Unit Cost (Thousands of Base Yr/FY 11 Dollars)	Non-Unit Based Costs

Subtotal (10-80)					\$ 191,161	\$ 57,348	\$ 248,509	
90 UNALLOCATED CONTINGENCY							\$ -	
Subtotal (10-90)							\$ 248,509	
100 FINANCE CHARGES							\$ -	
TOTAL CAPITAL COSTS (10-100)							\$ 248,509	
Space provided for additional descriptions of capital costs. See Example under "Instructions" above. Please include references to specific Cost Category numbers.								

Line 10.01 - bridge construction on 1A Project (MP 45 to 36.7), 1B Project Segment A (MP 42 to 72) and 1B Segment B (MP 42 to 36); Line 10.04 - drainage structures (culverts, headwalls, extensions, etc.) on 1A Project and Mazonia Siding (MP 55 to 57.13); Line 10.09 - includes track construction on 1A Project, 1B Project Segments A and B and Mazonia Siding; Line 10.10 - includes BNSF track modifications in vicinity of Joliet Union Depot; Line 10.11 - includes road crossing surfaces on 1A Project, 1B Project Segments A and B and Mazonia Siding; Line 10.14 - includes turnouts, switches, crossovers and derails on 1A Project, 1B Project Segments A and B and Mazonia Siding; Line 40.01 - includes track removal, clearing and grubbing, grading, sub-excavation, geotextile fabric, fill cleaning, lime stabilization and aggregate sub-ballast for Project 1A, Project 1B Segments A and B and Mazonia Siding; Line 40.02 - includes utility relocations for Project 1A and Mazonia Siding; Line 40.04 - includes wetland mitigation for Project 1A and Mazonia Siding; Line 40.05 - includes removal of old fence and installation of new on Project 1A and Mazonia Siding; Line 40.06 - includes temporary arrangements on-site (constr. trailer, etc.) for Project 1A, Project 1B Segments A and B and Mazonia Siding, also \$100k for each of 19 locations that have been included for approach adjustment at private crossings, plus \$350k for each of 27 public crossings; Line 40.07 - is right-of-way acquisition for Project 1A and Mazonia Siding; Line 50.01 - includes 36 miles of PTC (Dwight-Joliet), also includes \$900k for advance- and post-TRT signal removal and restoration/testing work; Line 50.04 - includes BNSF and UP modifications to UD Interlocking in Joliet plus modifications to Jackson Street grade crossing to support additional interlocking devices; Line 50.06 - includes 40 locations (14 private crossings and 26 farm crossings) on the Joliet-East St. Louis section of the corridor; avg. cost per location is \$135k. Also includes 35 grade crossings on Dwight-Joliet line section, where average cost is \$500k each; Line 80.04 - includes 1% for line items 10-70 plus \$500,000 base cost for concrete tie testing and analysis on Dwight-Joliet Line Section; Line 80.08 - includes 1% for line items 10-70 and \$900,000 for Task 5 ROD Study.

Annual Capital Cost Budget

Instructions:

This form provides a breakdown by year of the capital costs entered in the previous "Detailed Capital Cost Budget". The data you enter in this form should be drawn from budget estimates or analyses you have available for your project.

1. In the yellow cells in the "Base Year/ FY 2011 Dollars" table, enter the annual dollar figures for each cost category in thousands of Base Year/FY 2011 Dollars.
2. In the "Base Year/ FY 2011 Dollars" table, the numbers in the "Double Check Total" column will auto-populate from the "Detailed Capital Cost Budget" in the previous tab. The numbers in the "Base Yr/FY 11 Total" column will be the sum of the annual data entered to the left. The two columns should match for each Standard Cost Category. If the entries in the "Double Check Total" column are not identical, the Base Year/FY 11 values you entered in the previous tab do not match the values entered in this tab.
3. The light blue cells in the Year of Expenditure (YOE) table will auto-populate using Inflation rates from the "General Info" tab.

Program Name: IL-Chicago-St. Louis Corridor Supplement Projects SDP

BASE YEAR FY 2011 DOLLARS (Thousands)	2011	2012	2013	2014	2015	2016	2017	2018	2019	Total in Base Yr /FY 11 Dollars*	Check Figures Taken from Detailed Budget†

* For the purpose of this application, base year dollars are considered FY 2011 dollars.

**Year-of-Expenditure(YOE) dollars are inflated Base Year dollars. Applicants must determine their own inflation rate and enter it on the "General Info" tab. Applicants should also explain their proposed inflation assumptions (and methodology, if applicable) in the Application Form.

‡ As a convenience to applicants in cross-checking their figures, this column shows the "Total Costs" by category in FY 2011 dollars carried over from the "Detailed Capital Cost Budget" sheet.

If not using the FRA-provided formulas, please describe your methodology in the space provided below as well as listing any supporting documentation.

Instructions for Operating and Financial Sheets

Service Development Program applicants are required to project their corridor service's operating and financial performance at least through the tenth full year of operation (a longer period is required for the capital asset renewal charge -- see below).

The sheet "Operating & Maintenance Info." lays out an approach to passenger rail cost accounting and projection that accords with that employed by Amtrak in its recently-implemented "APT" system. The O&M cost categories in the "Operating and Financial Perf." sheet draw on the cost categories in the "Operating & Maintenance Info." sheet. If you have employed other approaches to O&M cost estimation, show the totals in the red-shaded cells for Year 1, Year 5, and Year 10 and provide supporting documentation describing your O&M cost projection methods. Otherwise, if your O&M projections support the O&M line items detailed in the form, enter your data and the total O&M expense will auto-calculate.

With respect to the "Capital Asset Renewal Charge" (CARC): please note that this is not a charge for the use of assets initially provided or renewed under the HSIPR program. Instead, it is an annualized allowance for future asset replacement, refurbishment, and expansion. Categories that would describe investments that together make up the CARC are shown in the lower section of the Operating and Financial Performance form. If your method of projecting future capital asset renewals and costs does not support the categories shown in the form, enter your totals in the red-shaded cells labeled "Total capital asset renewal charge (annualized amounts)." If your methodology supports the line items on the form, please fill in the individual category entries and the total will auto-populate. In either case, you will need to explain your methodology and procedures in supporting documentation.

An illustrative methodology for estimating the CARC follows. It can be applied to the total CARC, or to its constituent line items.

- Develop a schedule for the nature and expected cost (in FY 2011 dollars) of capital asset renewals, expansions, and additions for years 1 through 30 of the program's operation. Assign projected costs to the years in which they are expected to occur.
- Calculate the present value of the future expenditures thus assigned, based on the OMB-approved discount rate of 7 percent.
- Annualize the present value by calculating the equal annual payments over 30 years that would equate to the present value at the approved discount rate.
- The annualized number will be the CARC, and should be entered on the appropriate row(s) of the Operating and Financial Performance Spreadsheet.

Operating and Maintenance Information (Standard O&M Cost Categories for Reference)		
Category/Subcategory		Definition
100 Maintenance of Way (MoW)		
101 MoW Track		Maintenance work on track assets along the right-of-way, including the roadbed, rails, cross-ties, ballast, and grade crossings.
102 MoW Communications & Signal		Maintenance work on Communications & Signal assets, including telegraph, telephone, radio systems; train signal and interlocking systems; and buildings, right-of-way, or other facilities supporting and housing these assets and systems.
103 MoW Electric Traction		Operation of electric propulsion systems and maintenance work on electric transmission assets, including catenary and support apparatuses; transmission systems; power substations; and building and structures housing these systems.
104 MoW Bridges & Buildings		Maintenance work on physical assets, including tunnels, bridges, culverts, overhead highway bridges, signs, and ancillary buildings.
105 MoW Support		General support for front-line MoW activities (Track, Communications & Signal, Electric Traction and Buildings & Bridges), including management and supervision; training; material control and procurement; support for capital projects; and other general support.
200 Maintenance of Equipment (MoE)		
201 MoE Turnaround		Cleaning, inspection, and minor repairs of rolling stock both prior to departure and en-route.
202 Loco Maintenance		Maintenance of train locomotives, including both preventive/scheduled maintenance and as-needed maintenance due to locomotive failures, bad orders, freeze damage, wrecks, and so on. Does not include major repairs and overhauls or other capital work.
203 Car Maintenance		Maintenance of train cars, including passenger coaches, dining cars, sleeping cars, and baggage cars. Includes both preventive/scheduled maintenance and as-needed maintenance due to car failures, bad orders, freeze damage, wrecks, and so on.
204 Major Repairs - Expensed		Repairs to rolling stock, components or equipments performed in major overhaul facilities or backshops that are not capitalizable.
205 MoE Support		General support for front-line MoE activities, including managerial, administrative, material control, and other activities in support of turnaround servicing, rolling stock maintenance and repair, and component work.
300 Transportation		
301 Onboard Services (OBS)		Services provided to customers onboard trains, including food and beverage, entertainment, sleeping car services, and so on. Included are direct and indirect labor charges of OBS employees providing services onboard trains; commissary management and support.
302 Trainmen & Enginemen (T&E)		Direct labor and indirect labor-related costs of enginemen (train engineers who operate locomotives) and trainmen (conductors in overall control of trains) as well as general support for and management of T&E employees and crew bases.
303 Yard		Activities required to support the movement of train equipment in preparation for revenue service, including moving trains between the yard and station, train makeup and breakup, moving equipment to and from mechanical facilities, and managerial costs.
304 Fuel		Diesel fuel costs for trains used in passenger service. Includes fuel costs only.
305 Power - Electric Traction		Electric power costs for trains used in passenger service. Includes power costs only.
306 Train Movement		Activities associated with moving passengers from endpoint to endpoint, including train dispatching, signal or interlocking operations, and the operations of any control or operations center(s).
307 Train Movement-Railroad Services		Costs for services provided by other railroads, including infrastructure access, leasing of equipment, purchased fuel, equipment maintenance or repairs, dispatching and signal services, and station costs.
308 Transportation Support		Support and management of front-line train operations activities, including the costs of general and assistant superintendents, railroad foremen and assistant foremen, and other transportation operations-related activities.
400 Sales and Marketing		
401 Sales		Field sales and sales administration, travel agent services, and commercial account services, including expenditures for travel agency commissions, credit card commissions, and airline system access fees.
402 Information & Reservations		Reservation services to both the general public other distribution channels, such as travel agencies, including the costs of call centers and information systems required to support reservation services.
403 Marketing		Marketing and sales support activities, including market research, customer relations, advertising, production of timetables, and sales promotions.
500 Stations		
501 Stations		Station service activities, including ticketing, cleaning and maintenance, lounge operation, red cap and porter services, baggage services, stationmaster and usher activities, snow and ice removal, and training and supervision of staff.

<i>Operating and Maintenance Information</i> <i>(Standard O&M Cost Categories for Reference)</i>	
Category/Subcategory	Definition
600 Police, Security & Environmental Safety	
601 Police and Security	Traditional police patrolling activities and surveillance, intelligence, and counterterrorism efforts in support of train service, facilities, and right-of-way.
602 Environmental & Safety	Activities to ensure and oversee environmental, health, and safety of employees and customers, including environmental and safety compliance.
700 General and Administrative	
701 Corporate Administration	Managerial and administrative activities that are enterprise-wide in scope and support all operations of the project or enterprise.
702 Centralized Services	Services that are enterprise-wide in scope, including IT, payroll operations, human resources, accounting, procurement, and so on.
Total Operating and Maintenance Costs – for Purposes of HSIPR Program Application	Note: Does not include charges for return on, or return of, capital.

Operating Information and Financial Performance

Instructions:

1. Input the operating and financial information in the yellow cells. (Dollar values are in millions of 2011 constant dollars except as noted.)
2. Ensure the light blue cells have auto populated with data based on the imbedded equations.
3. Do not input information in cells with hatch marks.
4. If there is no "Comparable Existing Service," leave the FY 2011 and FY 2012 columns blank.

		Service Development Program Name	IL-Chicago-St. Louis Corridor Supplement Projects SDP

*** Explanation of "Status of Funding"**

Committed: Committed sources are programmed capital funds that have all the necessary approvals (e.g. statutory authority) to be used to fund the proposed project without any additional action. These capital funds have been formally programmed in the State Rail Plan and/or any related local, regional, or state capital investment program or appropriation guidance. Examples include dedicated or approved tax revenues, state capital grants that have been approved by all required legislative bodies, cash reserves that have been dedicated to the proposed project, and additional debt capacity that requires no further approvals and has been dedicated by the sponsoring agency to the proposed project..

Budgeted: This category is for funds that have been budgeted and/or programmed for use in the proposed project but remain uncommitted (i.e., the funds have not yet received statutory approval). Examples include debt financing in an agency-adopted capital investment program that has yet to be committed in the near future. Funds will be classified as budgeted when available funding cannot be committed until the grant is executed or due to the local practices outside of the project sponsors' control (e.g., the project development schedule extends beyond the State Rail Program period).

Planned: This category is for funds that are identified and have a reasonable chance of being committed, but are neither committed nor budgeted. Examples include proposed sources that require a scheduled referendum, requests for state/local capital grants, and proposed debt financing that has not yet been adopted in the agency's capital investment program.

These examples are illustrative. Applicants are free to provide other substantiated approaches to meeting the funding requirements to offset projections of both operating deficits and capital asset renewal charges.

Schedule- Service Development Program

Instructions:

1. In the yellow cells below, enter the anticipated "Start Date" and "End Date" for each high level activity (e.g., Final Design, Construction, Service Ops).

2. Illustrate the anticipated timing and duration of each task item on the chart below. Shade the quarters for each corresponding year in which work will take place on a task. Shade all cells in the corresponding row in which an activity will take place. Enter an 'X' in a cell to shade that cell. The quarters represent calendar year quarters (Jan - Dec).

3. Complete this process for all of the tasks, both high-level tasks (e.g., Final Design) and subtasks (e.g., Issue request for bids, make awards of FD contracts).

ASSURANCES - CONSTRUCTION PROGRAMS

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0042), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the Awarding Agency. Further, certain Federal assistance awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the assistance; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will not dispose of, modify the use of, or change the terms of the real property title, or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the Federal interest in the title of real property in accordance with awarding agency directives and will include a covenant in the title of real property acquired in whole or in part with Federal assistance funds to assure non-discrimination during the useful life of the project.
4. Will comply with the requirements of the assistance awarding agency with regard to the drafting, review and approval of construction plans and specifications.
5. Will provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progress reports and such other information as may be required by the assistance awarding agency or State.
6. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
7. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
8. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards for merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
9. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
10. Will comply with all Federal statutes relating to non-discrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and, (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

11. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal and federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
12. Will comply with the provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
13. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327-333) regarding labor standards for federally-assisted construction subagreements.
14. Will comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
15. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).
16. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
17. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq.).
18. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
19. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.

Federal Railroad Administration Assurances & Certifications (upload #6)

**U.S. Department of Transportation
Federal Railroad Administration**

**Certifications Regarding Debarment, Suspension and Other Responsibility Matters,
Drug-Free Workplace Requirements and Lobbying**

**PART A: Certification Regarding Debarment, Suspension and Other Responsibility Matters – Primary Covered Transactions
(Pursuant to 2 CFR Part 180)**

- (1) The grantee certifies to the best of its knowledge and belief, that it and its principles:
 - (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any Federal department or agency;
 - (b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal of State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - (c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and
 - (d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State or local) terminated for cause or default.
- (2) Where the grantee is unable to certify to any of the statements of this certification, he or she shall attach an explanation to this application.

PART B: Certification Regarding Drug-Free Workplace Requirements (Pursuant to 49 CFR Part 32)

- A. The grantee certifies that it will or continue to provide a drug-free workplace by:
 - (a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;
 - (b) Establishing an ongoing drug-free awareness program to inform employees about—
 - (1) The dangers of drug abuse in the workplace;
 - (2) The grantee's policy of maintaining a drug-free workplace;
 - (3) Any available drug counseling, rehabilitation, and employee assistance programs; and
 - (4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;
 - (c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

- (d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will—
 - (1) Abide by the terms of the statement; and
 - (2) Notify the employer in writing of his or her conviction for a violation of criminal drug statute occurring in the workplace no later than five calendar days after such conviction;
- (e) Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to every grant officer on whose grant activity the convicted employee was working, unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;
- (f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee is so convicted—
 - (1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or
 - (2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;
- (g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (e) and (f).

B. The grantee may insert in the space below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

Check ☐ if there are workplaces on file that are not identified here.

PART C: Certification Regarding Lobbying (Pursuant to 49 CFR Part 20)

CHECK ☐ IF APPLICABLE
 CERTIFICATION IS FOR THE AWARD OF A GRANT OR COOPERATIVE AGREEMENT EXCEEDING
 \$100,000
 OR
 A FEDERAL LOAN EXCEEDING \$150,000

The undersigned certifies, to the best of his or her knowledge and belief, that:

- (1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

- (2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award document for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 USC 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

As the authorized certifying official, I hereby certify that the certifications in Parts A, B, and C (if C is applicable) are true.

1. PROJECT RATIONALE

The Chicago - St. Louis route has been designated as a 110-mph Corridor route (Corridor). The project is located primarily within the State of Illinois between the cities of Chicago and St. Louis, MO on the Canadian National's Joliet Subdivision (CN) and the Union Pacific Railroad's Joliet and Springfield Subdivisions (UPRR). Final approach to St. Louis, MO, is made over the tracks of the Gateway Eastern Railway (KCS) and the Terminal Railroad Association of St. Louis (TRRA). Figure 1.1 provides a map of the corridor and the proposed Chicago - St. Louis route.

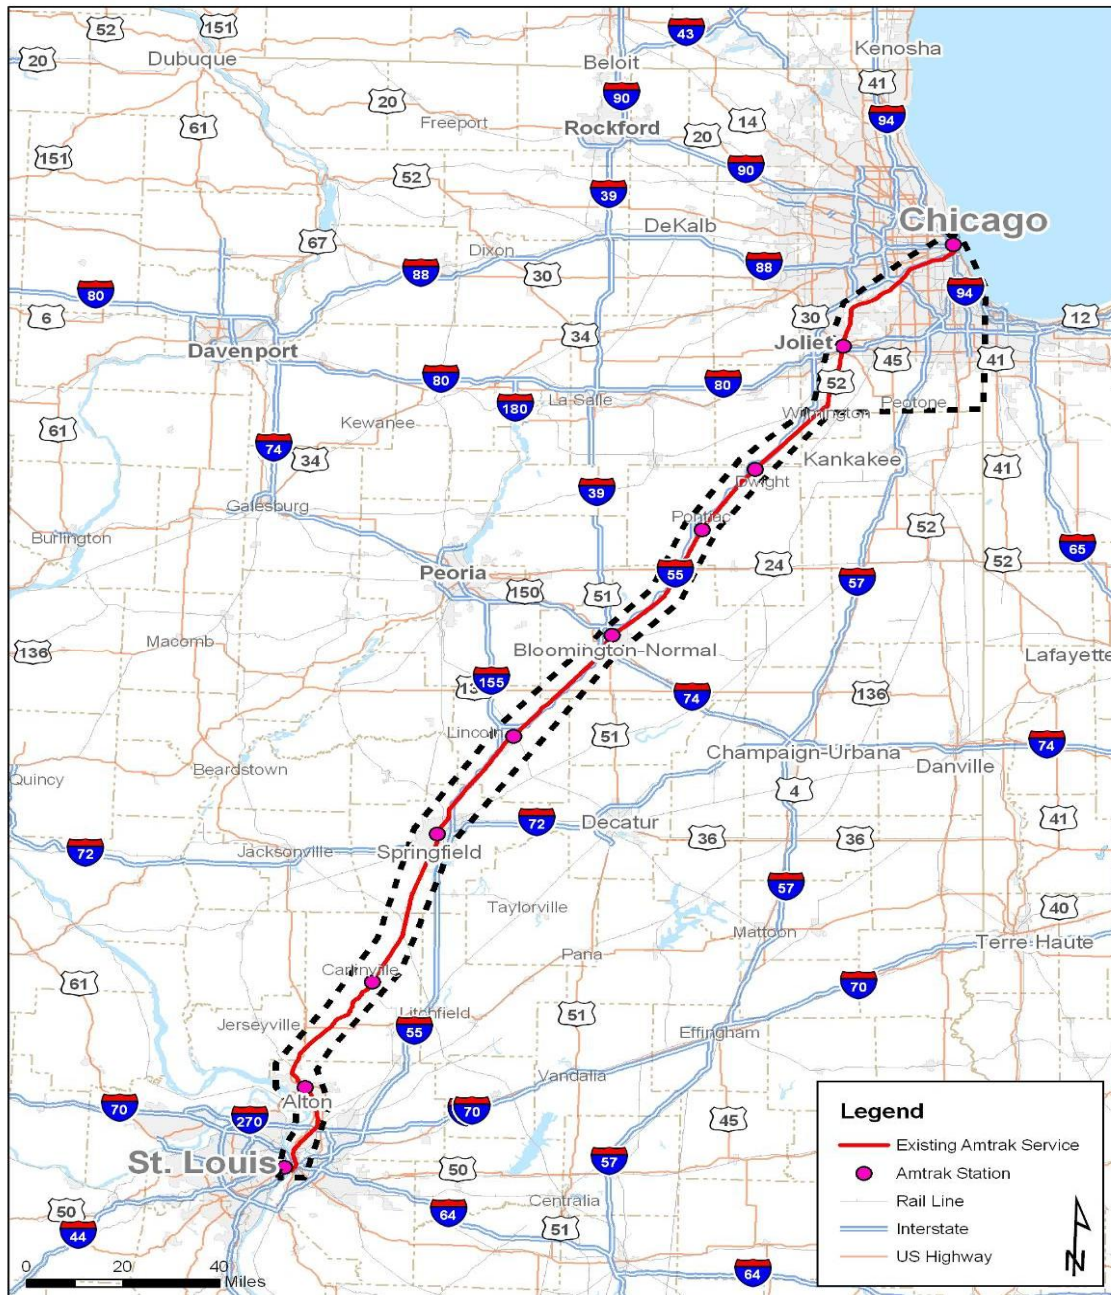

In 1992, the U.S. Secretary of Transportation designated the Corridor as part of the Chicago Hub Network high-speed rail corridor. A National Environmental Policy Act (NEPA) environmental assessment followed, resulting in the completion of a Final Environmental Impact Statement (EIS) for the Chicago–St. Louis High-Speed Rail Project in 2003. The Federal Railroad Administration (FRA) issued a Record of Decision (ROD) in 2004. The ROD selected the preferred alternative as described in the final EIS which would use the current Chicago–St. Louis Amtrak route and involve high-speed rail service consisting of three round trips per day, with estimated one-way end-to-end travel times between 4 hours and 4 hours 30 minutes. To this point, the State of Illinois had previously invested \$143 million in this corridor.

On June 23, 2009, FRA issued a Notice of Funding Availability for the High-Speed Intercity Passenger Rail (HSIPR) program. In response, the Illinois Department of Transportation (IDOT or Grantee) submitted a Track 2 Application for Service Development Programs to implement the improvements and service program outlined under the ROD Preferred Alternative (Corridor Improvement Program). Subsequently, FRA selected Illinois for an award for up to \$1.2 billion in American Recovery and Reinvestment Act funding for the work.

A Grant/Cooperative Agreement (Cooperative Agreement) between the FRA and IDOT for the Chicago-St. Louis Corridor Program was approved on December 9, 2010 and subsequently amended on December 22, 2010 to provide funding for the improvements proposed in Corridor Improvement Program (grant number FR-HSR-0015-01-00 dated December 9, 2010 and amendment number one dated December 22, 2010). This work began in May 2010 and is scheduled for completion in December 2015.

The Corridor Improvement Program will allow high-speed passenger rail service to operate at a maximum speed of 110 mph on the Corridor, with a reduction in trip times to 4 hours 45 minutes or less. Improved trip time will enhance the marketability of intercity passenger rail service and will support a more regionally and modally balanced transportation system.

Figure 1.1 – Chicago-St. Louis Corridor and Alignment

1.1. IL-Chicago-St. Louis Corridor Supplemental Projects Summary

The current April 4, 2011 FRA Funding Application for which this Service Development Plan supports is intended to provide for additional funding to support track, grade crossing, signal and other upgrades in the Corridor that build upon the work performed within the Cooperative Agreement. The proposed additional work is collectively termed the IL-Chicago-St. Louis Corridor Supplemental Projects ("Supplemental Projects"). The Supplemental Projects will further support high speed rail service within the Chicago-St. Louis Corridor, but are beyond the scope of the work currently approved within the existing Cooperative Agreement.

The Supplemental Projects include six tasks which are designed to enhance the ROD package of improvements previously approved by the FRA:

- Task 1 – Siding and Extended Main Track
- Task 2 – Track Upgrades
- Task 3 – PTC
- Task 4 – Private and Farm Crossings
- Task 5 – ROD Study
- Task 6 – Program Management and Construction Administration

Supplemental Projects Tasks 1, 2, 3, 4 and 5 are each distinct projects in that each Task can be performed independently of other Tasks. Each of these tasks will provide a benefit to the development and improvement of rail service within the Chicago-St. Louis Corridor. However, each task also complements the other tasks, resulting in an additive effect for improvements to the Chicago-St. Louis Corridor rail service. Task 6 is required to provide for program support to enable successful completion of Tasks 1-5.

The Supplemental Projects Tasks include the following work:

Task 1 – Passenger Siding and Main

Task 1 provides for track improvements within the Corridor by constructing a new 2.1-mile passing siding near Mazonia, Illinois (between MP 55.00 and 57.13), and the construction of 7.9 miles of extended second main track between Elwood and Joliet, Illinois (between MP 36.80 and MP 44.69). The new siding and second main will be equipped with Centralized Traffic Control (CTC) signaling as part of this task. These improvements will increase operational flexibility for both passenger and freight operations, reduce the potential for train delays, and enhance train operational safety.

The work to be performed within Task 1 includes potential refinement preliminary engineering (PE)/National Environmental Policy Act (NEPA), final design (FD), and construction of railroad upgrades between Dwight and Joliet.

Figure 1.2 at the end of this section provides a map of the locations of the proposed Supplemental Project Task 1 – Passenger Siding and Main.

Task 2 – Track Upgrades

This task includes upgrades of the existing main track. The 2010 Grant statement of work stated that IDOT will perform a limited set of improvements (i.e., not all improvements) for the Corridor area from MP 42.80 to MP 72.80. The statement of work never contemplated that all first main track upgrades from MP 42.80 to MP 72.80 would be constructed with the 2010 Grant funds; nor did it contemplate any improvements from MP 36.70 to MP 42.80.

Upon receipt of revised estimates from the Union Pacific Railroad (UPRR), IDOT has determined that the 2010 Grant funds will allow some of the upgrades between MP 54.00 and MP 72.80 to be completed. Consequently, this application seeks funding for the completion of first main track upgrades between MP 54.00 and MP 72.80 and for full main track upgrades on the remainder of the Corridor from MP 36.70 to MP 54.00, between approximately Wilmington and Joliet IL.

Completing this task will allow track readiness for increased speeds up to 110 mph operation between approximately Dwight and Joliet IL, thus reducing passenger train running time in this segment of the Corridor.

Figure 1.3 at the end of this section provides a map of the location of the proposed Supplemental Project Task 2 – Track Upgrades.

Task 3 – PTC

The 2010 Grant includes funds for Positive Train Control (PTC) improvements from MP 72.80 to MP 281.00. Task 3 consists of equipping the existing and proposed tracks with PTC between Dwight and Joliet, IL (approximately 37 miles from MP 36.70 to MP 72.80).

Implementation of a state-of-the-art signal and communications system is integral to the implementation of 110 MPH operations. Improved signaling will increase track throughput and raise the efficiency, productivity and safety of the track as well as meet regulatory requirements that will soon take effect. On 110 MPH rail, overlay of state-of-the-art signal and communications system on the existing signal system is required. A state-of-the-art system is necessary to coordinate freight and passenger operations and permit joint service to share the same track.

Subject to acceptance by the FRA and freight railroads, it is assumed that PTC system technology will be applied to all routes with speeds over 80 MPH during this phase. PTC provides for a higher level of train protection from collisions with other trains than is possible with conventional wayside and/or train cab signaling systems.

PTC is proposed to be installed in the Dwight to Joliet segment to complement the track upgrades proposed under Task 2 and will provide consistency with other sections of the Corridor that will receive PTC under the current Cooperative Agreement.

Figure 1.4 at the end of this section provides a map of the location of the proposed Supplemental Project Task 3 – PTC.

Task 4 – Private and Farm Crossings

The 2010 Grant for the HSIPR funds a dual gate crossing system at private crossings from Dwight to the East St. Louis area. After a study by the Corridor stakeholders and input from the Federal Railroad Administration (FRA), a conclusion was reached that 4-quadrant gates were more appropriate for private crossings at the 2010 Grant funded locations. This application seeks additional funding to achieve a 4-quadrant gate system at private crossings from Dwight to the East St. Louis area. It also seeks funding for extra control enhancements in the farm crossing system which was not included in the 2010 Grant. The field diagnostic process and subsequent collaborative design review work allowed stakeholders to refine the designated equipment for the farm crossings. The refined design would add farmer control panel and vehicle detection loops at each farm crossing. This will enhance the safety of the crossings, but is over and above what was included in the 2009 HSIPR funding application.

The 2010 Grant did not provide funds for private and farm crossings between Dwight and Joliet. Under Task #4, a 4-quad gate system (for private crossings) and farmer control panels and vehicle detection loops (for farm crossings) would be procured and installed from Dwight north to Joliet. The private and farm crossing improvements will increase safety on the Corridor for train crews and passengers as well as for area residents.

Figures 1.5 and 1.6 at the end of this section provide maps of the locations of the proposed Supplemental Project Task 4 – Private and Farm Crossings.

Task 5 – ROD Study

Task 5 involves conducting a lessons learned study on the ROD and related IDOT-funded high speed rail projects by RTEC/University of Illinois at Urbana-Champaign. The ROD Study will be performed to consider the three phases major phases of the Corridor Improvement Program, including:

- Phase I – Planning, to document the efforts involving service development (feasibility studies), financial, environmental and program management.
- Phase II – Design and Construction, involving a review of the process used to design, procure and construct the major capital improvement elements of the project, including trackwork, trainsets, signaling, grade crossings and stations.
- Phase III – Operations, to evaluate the resulting 110 mph high speed rail service in terms of ridership, scheduling, fare structures, railroad/operator coordination, agency coordination, documentation of initial operations and economics.

The results of this study are anticipated to provide for guidance that may result in improvements in the overall technical and administrative functions with the on-going Corridor Program, as well as providing guidance for HSR development throughout the Midwest region and the U.S.

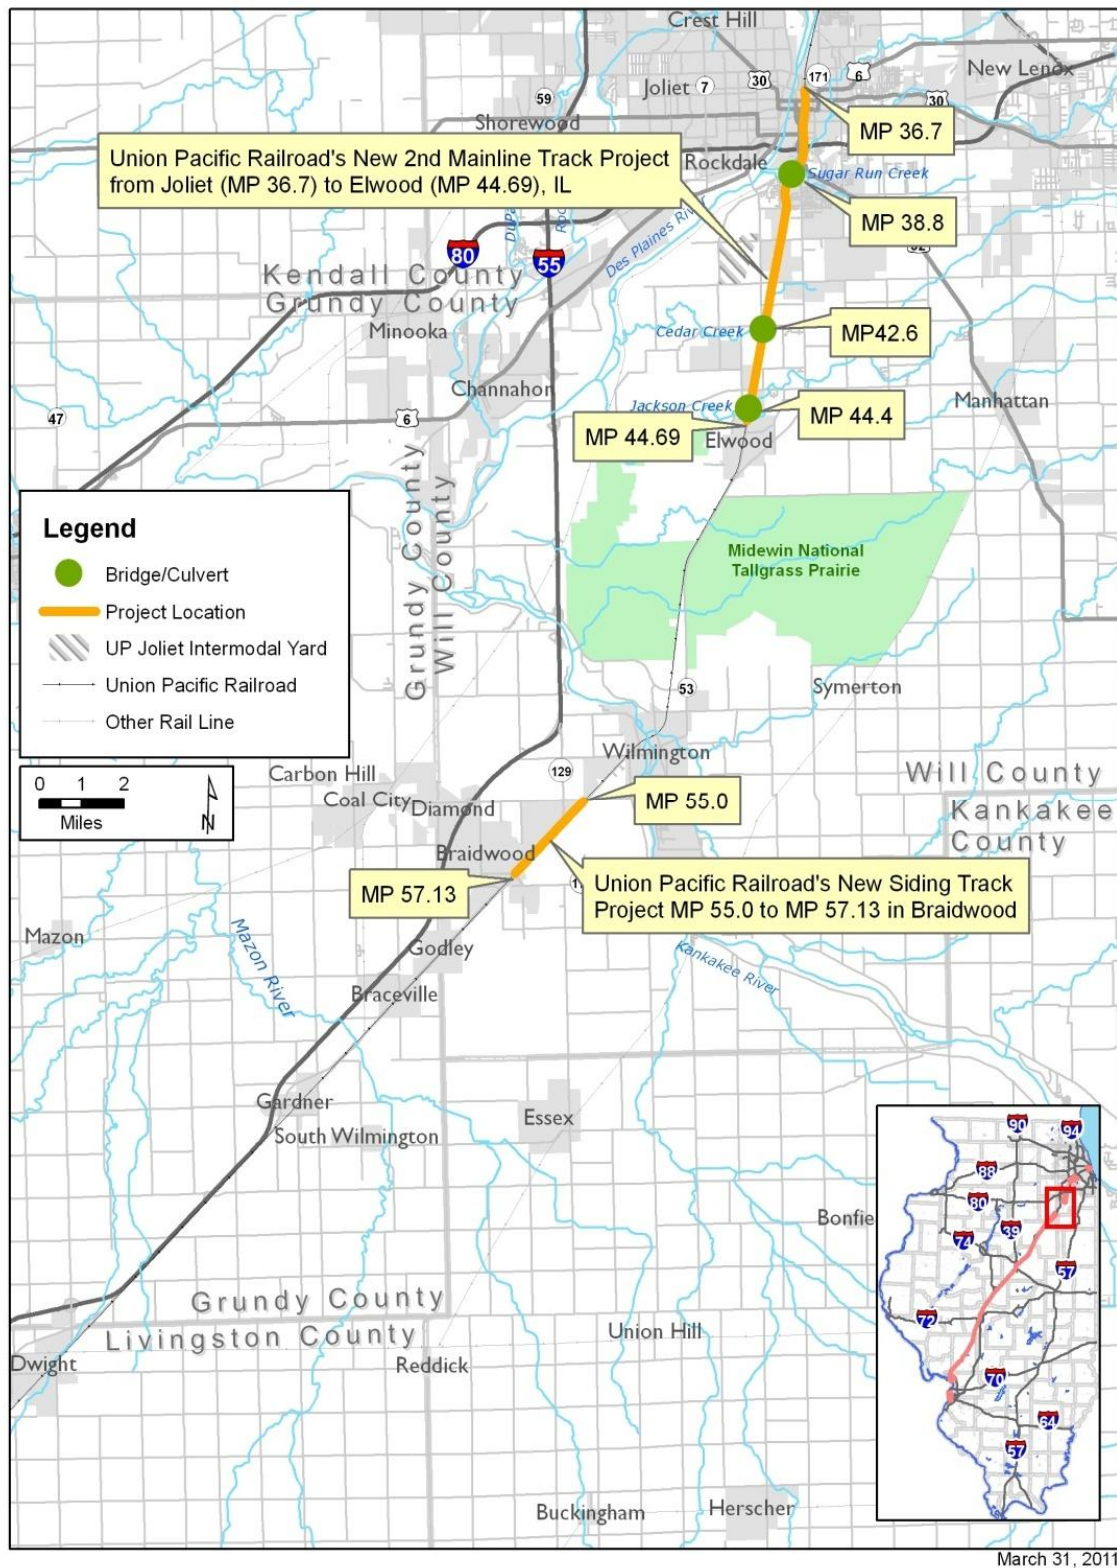

Figure 1.7 at the end of this section provides a map of the location of the proposed Supplemental Project Task 5 – ROD Study.

Task 6 - Program Management & Construction Administration

This task will provide for the program management, oversight, construction administration and quality control/quality assurance activities required to support the efforts of Tasks 1-5.

The application and supporting materials will detail the proposed study, engineering design, construction and testing/implementation schedules for the Supplemental Project tasks. For example, work on enhancing the equipment installations at the on-line private and farm crossings will follow completion of the trackwork in those areas, and is generally expected to occur in the 2013-2014 timeframe. Refer to the application and supporting materials for details on the other projects making up the corridor supplemental work, including expected durations, start dates and end dates for key phases of the work.

Task #5 – ROD Study**

1.2. Supplemental Projects Purpose and Need

The overall purpose of the Corridor Supplemental Projects is to permit trains to move more expeditiously, improve reliability and trip time, enhance grade crossing safety, improve train signaling systems, and enhance the marketability of intercity passenger rail service, which, in turn, will further support a more regionally balanced transportation system.

The existing transportation network consists of highway (automobile and bus), air and rail (Amtrak) travel. Currently, 99 percent of the 35 million annual trips made in the Chicago - St. Louis corridor are accomplished through automobile and air travel. This project intends to establish a more balanced modal use of the transportation network by improving rail service.

A key element of the project is to improve the ability of existing passenger and freight trains to meet each other by improving siding trackage, adding extended second mainline trackage, improving the construction and quality of all first main track, improving signal and safety systems, and ultimately completing the double tracking of the UP portion of the corridor between Joliet, Illinois and St. Louis, Missouri, which would reduce delay, improve schedule reliability, and increase average train speed to meet the goal of a four hour trip time between Chicago and St. Louis. The project will also improve passenger service without adversely affecting existing and future rail freight service, allowing the establishment of 110-mph high speed rail service within the corridor and enhancing the passenger transportation network. The Corridor Supplemental Projects support these objectives.

The need for the Corridor Supplemental Projects is based on the fact that the current FRA Grand/Cooperative Agreement covers only a portion of the Chicago-St. Louis Corridor. The Supplemental Projects provide for additional improvements that when combined with the current Cooperative Agreement work, will further the overall objective of completing improvements for the entire corridor.

An increase in rail passenger ridership is projected to occur as a result of the project, as the double-track mainline corridor would have more flexibility in terms of operations, particularly with regard to reducing the times required for complex moves, such as meets, overtakes, etc. Under this investment program, a reduction in rail travel time of nine minutes will be possible between the Corridor end points. In addition, improvements in the reliability (to 85%) and safety of rail service are anticipated as a result of this investment. Provision of an additional section of double-track mainline is also expected to mitigate the operating conflicts for intercity passenger services resulting from the increased rail freight traffic anticipated on the corridor on account of the new Joliet Intermodal Facility.

1.3. Challenge and Opportunity

From the perspective that auto and air intercity travel are competitors to high-speed intercity rail, they are tough competitors.

Air travel offers the advantage of time in flight but further analysis shows that travel to the airport and time required to prepare for boarding adds substantially to total trip time. The time advantage is diminished for trips under 500 miles and is reduced further for shorter trips.

The private automobile offers extreme convenience with near door-to-door service. The perception of cost also makes the auto seem more advantageous than it really is. Most

users only relate to the cost of fuel when evaluating auto usage when comparing to other modes, however other costs such as depreciation, maintenance and insurance are usually not used in a casual evaluation. It is also noted that some of these costs continue to some degree even if the auto is not used. The auto also has a time disadvantage but unlike cost, the factor is usually accurately perceived. The auto becomes more cost advantageous if a group is traveling together.

For the Chicago-St. Louis Corridor, the predominant mode of travel is by automobile. Intercity bus service is available by several carriers, including Greyhound and Megabus. Air travel is also available via three different airlines between Chicago and St. Louis, with at least one carrier providing service to Springfield. Intercity passenger rail service will not replace any of these other modes, but will supplement them as a viable cost effective option.

1.3.1. Costs of Alternatives

Intercity travel in the Midwest region is growing rapidly, and the increasing demand for travel cannot be easily met by existing modes. Regulatory, environmental and budgetary constraints are making it increasingly difficult to expand highway capacity and, in particular, to build new or expand existing highways. An analysis of the impact of congestion suggests rail demand in 2020 could be as much as ten percent higher if current congestion trends continue.

Unlike auto travel where most of its cost is deferred or hidden, air travel, like high-speed rail, is a commercial service and requires the customer to pay the cost of the service.

In the case of air travel, deregulation has resulted in the reduction of service and significant fare increases on shorter routes. The four major carriers in the region have increased their average flight length to more than 900 miles and find that flights of less than 300 miles are costlier and less efficient to operate, usually requiring cross-subsidy from longer flights. The phasing out of turboprop equipment in favor of regional turbojet aircraft intensifies this trend.

An analysis was undertaken to test the potential impact on a competitive response by the airlines to high-speed rail service. The analysis showed that if the airlines reduced their fares by 25 percent on routes served by MWRRS, high-speed rail ridership and revenue would fall by only two to three percent.

Because the air and highway modes (auto and bus) are finding it increasingly difficult to meet the regional demand for travel, high-speed rail will not be a replacement for existing travel modes but rather an enhancement and necessary alternative.

Some airlines have also started to analyze their cost structure by flight segment rather than origin-destination pairs, that is, a short feeder flight is assessed on its ability to economically support itself rather than relying on a cross subsidy from a longer distance connecting segment. Airlines could come to view a properly configured high-speed rail system as a replacement for their high-cost short-range flights.

1.3.2. Benefits and Impacts of Alternatives

There are numerous attributes that can be used to qualify and quantify the benefits and impacts of the travel alternatives available for a given corridor. These may include benefits or impacts on the public making the trip within the corridor, potential impacts to those residing within the corridor, physical environmental impacts, and economic influences on local economies. As described in the previous section, there are four

feasible travel mode alternatives; automobile, intercity bus, air travel and intercity passenger rail.

Rail service in this corridor presents the traveling public with a mode option that has certain unique characteristics. Automobile travel totally occupies the attention of the driver making the accomplishment of other tasks not possible or extremely dangerous. Commercial aviation severely curtails the choice of destinations. Intercity bus offers a wide range of destinations in the corridor but has not gained the acceptance of the economically prosperous customer base.

Recent events have highlighted the volatility in pricing of liquid petroleum fuels. The inherent low-rolling resistance of rail and its reduced energy demands can account for proportional reductions in emissions of pollutants associated with petroleum fuels.

While both intercity bus and air service offer limited seating space, rail travel offers comfortable seating configurations, a choice of intermediate destinations, and the ability for business travelers to work and communicate while enroute.

The majority of intercity automobile travel in the Corridor is concentrated on Interstate 55 (I-55), which primarily runs parallel to the Chicago - St. Louis Amtrak route. A new four-lane I-70 Mississippi River bridge has been proposed, which would provide additional highway capacity between Missouri and Illinois in the St. Louis metropolitan area, providing some congestion relief to I-55.

Direct, intercity bus service on the Corridor is provided by Greyhound and Megabus. It is assumed that the number of bus trips would increase proportionately with the projected growth of bus travel demand in the corridor. It is also assumed that the number of Corridor air service flights would increase proportionately to the projected air travel demand growth in the Corridor.

Intercity Rail

Currently, Amtrak service between Chicago and St. Louis is comprised of four "Lincoln Service" round trips and one "Texas Eagle" Service round trip. The "Texas Eagle" operates beyond St. Louis, extending to Texas and connecting to Los Angeles. Amtrak has proposed a restructuring of the "Texas Eagle" service, though this is not expected to materially affect the operation of these trains on the Chicago-St. Louis corridor.

All except one of the "Lincoln Service" trains call at all corridor stations; Summit, Joliet, Dwight, Pontiac, Bloomington-Normal, Lincoln, Springfield, Carlinville and Alton. The early (7:00 am) "Lincoln Service" departure from Chicago only calls at Joliet, Bloomington-Normal, Springfield and Alton. The "Texas Eagle" Service serves all of the Corridor stations except for Summit and Dwight.

While fares adjust depending on demand, recent search revealed round trip fares between Chicago and St. Louis ranging from \$48 to \$132, Coach Class.

FRA, IDOT and UPRR have agreed that additional capacity simulation work is beneficial. These new simulations and the refinement process (which began in late 2010 and continue into 2011) consider various additional potential travel time savings, including use of two locomotives per consist (reflected in the FRA funding application), improvements in track condition and operating control between Alton and Q Tower in East St. Louis, improvements in track condition and capacity between Joliet and Dwight and running time reductions possible due to easing of curves on the corridor.

As described elsewhere in this plan, the Chicago-St. Louis Corridor Supplemental Projects have been chosen for funding application as each of them offers substantial

benefits to the project in terms of increasing operational reliability, reducing running times and increasing public acceptance of the project. Specific benefits with regard to operational measures are included in the application and supporting materials. In addition, the partners (UPRR, IDOT and Amtrak) agree that continued investigation into these aspects, including computer-based operations simulations, etc. will continue.

Air Service

Three airline companies serve the Chicago-St. Louis market with direct flights; American, United and Southwest. A recent search performed in November 2010 showed a total of 27 departures southbound, and a similar number northbound. Both Chicago O'Hare and Chicago Midway airports had departures to St. Louis.

Springfield has direct air service from Chicago but not St. Louis. American and United service this route with six round trips per weekday. Likewise, Bloomington has direct air service from Chicago but not St. Louis. American Airlines serves Bloomington with three round trips per weekday.

While fares adjust depending on demand, a recent search revealed round trip fares between Chicago and St. Louis ranging from \$261 to \$497, Coach Class. Chicago to Springfield round trip fares ranged from \$389 to \$637, and Chicago to Bloomington round trip fares ranged from \$431 to \$1206. Fare information is current to March 24, 2011 (assuming two weeks advanced booking).

Intercity Bus

Greyhound and Megabus offer direct intercity motor coach services in the corridor. A third company, Burlington Trailways offers service to corridor cities but only by connecting service, resulting in a one-way travel time which is considerably longer than either of the direct service carriers.

Greyhound offers the most comprehensive service in the corridor with six daily schedules between Chicago and St. Louis. Round trip fares between these points range from \$ 42 to \$92. Springfield is served by two of these schedules and Bloomington by one of the schedules. Fares to Springfield are generally higher than the other cities. Megabus offers three round trips daily between Chicago and St. Louis with one of the schedules making a stop in Normal, IL. At the time of this survey (March 2011), Megabus fares were between \$21 and \$36. One-way travel times on the carrier's site were quoted between 5 hours, 30 minutes and 6 hours.

1.3.3. Risks Associated with the Alternatives

In the United States, 2008 was the first year traffic fatalities dropped below 40,000 in close to 50 years. Traffic death is the #1 cause of death in persons aged 5 to 27. Approximately 100 times the fatality rate are injured and 10 times the number are seriously injured due to crashes. Weather conditions have an adverse affect on crash rates and the lack of enforceable regulations do nothing to deter drivers from continuing travel in severe conditions.

Commercial air travel has proven to be a very safe mode. Aircraft can safely fly over, around or even through all but severe meteorological conditions, although passenger fear becomes a factor. A degree of this safety is derived from the highly-trained air crews and the professional judgment brought to bear, and also the advanced weather monitoring systems and a set of enforceable regulations that limits flight in unsafe circumstances. The experienced air traveler knows that safety has a price in delayed or

cancelled flights, unexpected stranding in mid-trip, and other inconveniences that can make air travel less than pleasant.

Passenger rail's safety record is also very good and isn't as sensitive to foul weather conditions. Rail vehicles successfully navigate all but the most severe wind, ice or flood conditions. Passengers also have a greater sense of safety in unsettled conditions. The less-than-satisfactory on-time performance of American intercity passenger rail can be almost universally attributed to the use of infrastructure designed for freight transportation rather than scheduled, lower margin passenger services. The goal of the Chicago-St Louis high-speed rail corridor improvement projects is to correct the infrastructure deficiency.

No significant risks are anticipated with this project for rail system infrastructure improvements. The rail infrastructure improvements are proposed to be mostly on existing UP property. Property acquisition may be required for some of the new passing sidings and upgraded station facilities, but there is expected to be significant community support for stations, lessening the likelihood of property acquisition issues.

The trackwork, communications and signaling and station site upgrades included with the project are not atypical or complicated for railroad infrastructure upgrade projects, and are not anticipated to present any significant construction or schedule risk.

1.3.4. Sustainability

System Sustainability

IDOT and UPRR have a significant and long-standing record of achievement in terms of making improvements to the corridor. Their commitment to initiate and complete the 2010 and 2011 (and following years) construction work on the corridor is further demonstration of this track record. See also Section 5.2 of this plan which details the many inter-party agreements which have already been executed and those where negotiations are on-going. This work is further evidence of the collaborative work the parties have undertaken to ensure the success and sustainability of the project.

IDOT supports four daily round trips of the "Lincoln Service" in the Chicago to St. Louis corridor. The high-speed rail service will largely replace this current conventional service with the ability to attract higher ridership and revenue.

IDOT has demonstrated a significant, sustained commitment to supporting and expanding rail transportation options throughout the state and on key corridors throughout Amtrak's existence. The State's recent doubling of support on three corridors has achieved substantial results in terms of increased train frequency and ridership over the past two years. IDOT also has a sustained history of having supported major capital improvements on passenger rail corridors throughout the state, including implementation of state of the art signaling and grade crossing protection systems, as well as major track improvement projects.

The High Speed Rail 2010 Construction Agreement was executed by IDOT and UPRR on July 16, 2010. This was a significant milestone for the project, as it established the work to be performed by UPRR for IDOT during 2010 to begin the process of improving the Chicago – St. Louis Corridor to accommodate the implementation of high speed intercity passenger rail.

The Service Outcomes Agreement was executed by IDOT and UPRR on December 20, 2010. This is another major milestone for the project, as it sets forth a 20-year term of agreement, whereby UPRR agrees not to abandon the rail line and to maintain access to

the line. In addition, IDOT and UPRR have agreed that service agreements will be binding on any new owner of the corridor or a lessee for partial or full sale or for assignment or lease of the line.

With regard to on-going maintenance costs, IDOT and UPRR are currently in negotiations to develop a maintenance agreement to address Corridor maintenance costs over the next 20 years. Within this agreement, IDOT will pay the incremental maintenance cost difference between Class 4 and Class 6 track. IDOT has also agreed that it will pay for maintenance in the event UPRR abandons freight operations on the corridor. IDOT has further agreed that it will pay for all maintenance cost requirements for a one-year period if it ceases passenger service. If UPRR ceases operations on the corridor, IDOT would take over as offeror or follow the relevant STB statute to maintain continuous passenger service. UPRR has committed to maintain the line following any cessation of rail service, contingent on IDOT funding. Specific provisions of the maintenance agreement are under negotiations.

Environmental Sustainability

The rehabilitation of the on-line rail stations presents opportunities for improving energy performance, minimizing water use, improving construction practices, and selecting materials with good life cycle assessments. The stations and rail facilities will be considered as whole buildings, with interrelated buildings systems that deliver high-performance. Green design principles can inform this process by guiding the designers to consider the most environmentally optimal solution for the buildings, and consider how the buildings can improve and enhance the environment they are built in.

But also, IDOT will require, where practicable, that stations and related facilities are designed and built so that they can be certified using the US Green Building Council's Leadership in Energy and Environmental Design (LEED) rating system. When identified as a goal early in development, rail facilities can achieve Silver or Gold certifications.

Design teams for the buildings associated with the high speed rail project will consider energy savings strategies for lighting, heating and cooling, in addition to organizing the project to reduce construction waste, improve water efficiency, select materials with good life cycle assessment ratings, consider natural ventilation and daylight, enhance the indoor air quality and use low VOC products.

LEED V3 has advanced the assessment of sustainability to explicitly measure important GHG reduction strategies for buildings. Design teams will design to current ASHRAE standards, and client teams will work to properly site and program building locations in order to achieve this aggressive rating standard.

Green design practices will be a part of the Corridor supplemental projects being applied for as part of the April 4, 2011 work. For example, the Metro St. Louis station will conform to these practices and will build on the conceptual design work done for the ROD package on-line stations, as well.

Outside of the buildings in the system, the rail systems themselves can be designed and delivered in a way that respects the environment through which they run. For example, the new rolling stock to be procured as part of the ROD package of improvements will feature improved emissions and fuel economy, compared to existing equipment.

In addition, the ability to electrify rail systems (though not included in either the ROD or Full-Build applications) harbors the potential for the system to move away from fossil-

based petroleum fuels and generate required power from a wide variety of sources, including those with little or no environmental impact.

1.3.5. Corridor Development Synergies

The Chicago-St. Louis HSR service will provide options for the residents of Illinois and Missouri for an alternative means of travel within Illinois for purposes of employment, business or vacation.

This service will be an integral part of the Midwest's high-speed intercity passenger rail system, providing additional connections through Chicago to other Midwest and national railroad destinations. With Chicago being the hub of the Midwest Regional Rail System, the Chicago-St. Louis service will provide connections between the cities and towns served within the corridor to the rest of the MWRRS. Thus, passenger rail travel will be available and practical between St. Louis, Springfield and other cities and communities along the Chicago – St. Louis corridor, and all other routes and destinations served by the MWRRS including Milwaukee, WI; Dubuque, IA; Detroit, MI; Cleveland, OH; Cincinnati, OH; and others.

The Chicago – St. Louis high-speed intercity passenger rail service will increase mobility choices and stimulate economic development throughout the region. The system affords the opportunity to:

- Achieve significant reductions in travel times and improve service reliability,
- Introduce an alternative to auto travel to many small towns and cities of the Midwest that lack travel choices,
- Introduce a regional passenger rail system designed to generate revenues that cover operating costs when it is fully implemented,
- Provide major capital investments in rail infrastructure to improve passenger and freight train efficiency, safety and reliability on shared rights-of-way, and
- Provide impetus for station-area development

An important feature of the corridor development is the role of the stations. Stations will be the gateway to communities and provide the “front door” to the system. At this “gateway” or “front door”, considerable joint development potential will exist. Increased train operations will encourage service industries to locate at the station, and its immediate surroundings. Such activity will generate both commercial and residential development. Industries looking for a home along the intercity passenger rail system will see it as a good “seeding” ground for business. As a result, a key output of the community analysis is the increase in property values that can be expected at station locations. These can be equated to the joint development opportunities, which will exist in and around the stations for public-private partnerships. Of the development, it is anticipated that approximately one half of the total will come from private sector investments, one quarter from state, county and municipal sources, and the final quarter from the Federal government.

The improvements to the Chicago to St. Louis corridor are expected to create significant near-term economic benefits in the corridor in addition to the State of Illinois and other regions of the United States. The Chicago to St. Louis corridor's economic benefits from the project would be driven by an increase in construction spending in the region. These project expenditures would generate a short term increase in demand for construction-related labor and material as well as engineering and technical services in the corridor. In addition, as part of the project, it is anticipated that rolling stock will be procured.

While it is not yet known where the rolling stock will be manufactured, the project would generate additional economic benefits in that region as well.

Based on the estimated capital construction expenditure, it is estimated that 5861 direct and indirect engineering, construction and other short-term jobs will be generated within the corridor as a result of this project. The associated estimated earnings for these jobs are \$92,922,000 and the projected resulting economic output is \$1,347,708,000.

For ongoing job creation, it is estimated that the annual operations and maintenance budget for the Chicago - St. Louis Corridor Intercity Passenger Rail Service will generate 407 jobs with an earnings of \$23,342,000 and an economic output of \$98,247,000.

2. OPERATIONS

2.1. Development Phasing

Throughout the remainder of this document, two phases of corridor development are referenced:

- 04ROD Phase refers to a set of corridor improvements that was environmentally cleared under a 2003 Final Environmental Impact Statement and its Record of Decision issued the following year.
- Double Track Phase is the full build-out of the corridor that provides for 110 MPH operations for most of the length of the corridor.

2.1.1. 04ROD Phase

The 04ROD Phase will provide High-Speed Rail (HSR) passenger service between Chicago and St. Louis. South of Dwight Illinois; maximum operating speed will be 110 MPH, where safe/practical. North of Dwight, the existing maximum operating speed of 79 MPH will be maintained under the current 04 ROD Phase work as approved in the Cooperative Agreement.

The Supplemental Projects work under Tasks 1, 2 and 3 will provide for an extension of 110 mph operations (where save/practical) north of Dwight to Joliet, Illinois.

Capacity simulations are required to determine the possible impacts of this service enhancement. These simulations and refinements of the results are expected to occur in late 2010-early 2011.

The statement of work for the Cooperative Agreement identifies the key milestones, responsibilities and deliverables associated with the refinement of the operating plan, achievement of the objectives as identified in the ROD funding application and the possible performance betterments to be mutually investigated and agreed-to prior to implementation.

A key aspect of the implementation of the ROD Package of Improvements is that the way to most expeditiously accomplish the track and right-of-way improvements is to shut down operation of the rail line for extended periods, allowing the UPRR Track Renewal Train (TRT) to work without interference. This was done successfully during the 2010 construction season and will be employed in each of the succeeding years (2011 through 2014) of the ROD construction program.

There are considerable operations impacts to this approach. UPRR has agreed the freight trains will not operate over the affected sections of the corridor during the times when the TRT occupies the corridor. Amtrak and UPRR also agreed that the "Texas Eagle" trains would operate via an alternate UPRR route during the construction season.

In the case of the "Lincoln Service" trains, the action taken during the TRT construction work has been to substitute express bus services. The bus substitution typically begins on or about April 1 of each year (2011 through 2014) and will extend until approximately November 30 of each construction year (2011 through 2014). There is a cost associated with providing the substitute bus service (and bus service management), which has been included in the updated ROD Financial Plan. Based on the 2010 experience, the responsibility for establishing the contractual relationship with the bus service provider and for setting the limits of the bus operation rests with Amtrak.

Certain of the Supplemental Projects will affect operational statistics/outcomes. For example, extending PTC and the limits of 110 mph passenger train operation (where safe/practical) from Dwight to Joliet (Tasks 2 and 3) will have a positive impact on travel times. Adding a siding at Mazonia and extending the second main track over a 7-mile segment between Elwood and Joliet (Task 1) can be expected to improve operating reliability (on-time performance, etc.) and will also increase operational flexibility, leading to benefits for both the passenger and freight trains on the corridor. Preliminary details with regard to these benefits are included in the Funding Applications and supplementary materials. IDOT and UPRR have agreed that detailed analysis of these improvements will be a part of the on-going collaborative operations analysis efforts.

2.1.2. Double Track Phase

This phase will build upon the currently approved work within the Cooperative Agreement and the proposed Supplemental Projects by completing the currently envisioned improvements in the Corridor to support eight high-speed round trips between Chicago and St. Louis on a 3 hour 50 minute schedule. The "Texas Eagle" also continues to operate within the corridor, but would remain a 79 mph maximum speed train.

The number and type of road/highway at-grade crossings would also be considered by this future program to identify possible closures, upgrading with more sophisticated warning systems, and/or where grade separation would be warranted. Further station facility improvements might be required for increased service levels (including grade-separated access to/from platforms), although local communities would be solicited for funding for those improvements. A maintenance facility is programmed for St. Louis under this investment program, as is a grade separation from the NS Railway at Iles crossing in Springfield.

Additionally, there will be a need for the procurement of additional train sets with the increase in service level.

2.2. Stations

The Chicago- St. Louis Corridor Improvement Program passenger stations will not be impacted by the Corridor Supplemental Projects.

2.3. Schedules

Proposed service schedules have been developed for both phases of the project and are included within the 04ROD Package of Improvements that supported the current Cooperative Agreement.

The Supplemental Projects work will result in a reduction of nine minutes in one-way time between Chicago and St. Louis. There is also an expectation of a 5% increase (to 85%) in on-time-performance for service within the Corridor. Additional details are provided in the associated Supplemental Projects FRA application form.

The UPRR is currently in the process of developing additional information to further quantify the benefits and schedule impacts for the work within the Supplemental Projects.

2.4. Rolling Stock

The rolling stock programmed for the Chicago-St. Louis Corridor Improvement Program is not impacted by the improvements proposed under the Supplemental Projects.

2.5. Operational Analyses

FRA, IDOT and the UPRR have agreed that further operational analyses and capacity simulations are required for the proposed HSR service, particularly with regard to additional improvements to the service plan and possible contributors to a reduced one-way travel time. This will also include the improvements provided by the Supplemental Projects.

Additional details are provided in the associated Supplemental Projects FRA application form.

2.6. Railroad Operation Performance

The results of the simulation and operations analysis performed for the 04ROD Package of Improvements that supported the current Cooperative Agreement reveal that performance will be improved as a result of both phases of the project. As expected, the greatest improvements will come with the completion of the Double Track Phase. Current passenger service in the Corridor requires 5 hours and 30 minutes between Chicago and St. Louis. After the completion of the 04ROD, the one-way travel time for a standard HSR train will be approximately 5 hours. When the improvements associated with the Double Track phase of the work are completed, the one-way travel time will be as low as 3 hours and 50 minutes. This is a time reduction of 1 hour and 40 minutes or 30.3%.

The Supplemental Projects are also expected to positively affect the operational performance expectations for both the freight and passenger operations on the corridor. As previously noted, the Supplemental Projects work is estimated to result in a reduction of nine minutes in one-way time between Chicago and St. Louis. A 5% increase in on-time-performance for service within the Corridor is also anticipated. Ridership is expected to increase by 21,300 riders annually starting in 2014.

Possible benefits from the Special Projects improvements can include: reduced travel time by extending limits of 110 mph operation (where safe/practical) between Dwight and Joliet; and, increases in operational reliability/flexibility by virtue of building the additional siding at Mazonia and constructing 7 miles of extended second main between Elwood and Joliet). UPRR and IDOT agree that the collaborative operations analysis process will continue over the duration of the project and will incorporate these and other possible operational impacts as they become part of the corridor improvement program.

Please refer to Section C, question 14 within the associated Supplemental Projects application form for additional documentation relative to the expectations for operations performance enhancements resulting from the Supplemental Projects.

3. CAPITAL NEEDS

The infrastructure improvements to be performed for the Chicago-St. Louis Corridor are cumulative in nature. That is, the improvements to be performed for the 04ROD Phase will provide a basis for and support the improvements proposed for the Special Projects, which in turn will support the improvements proposed for the subsequent Double Track Phase. The goal of the engineering design for infrastructure improvements is to avoid duplication of construction efforts and to minimize “rework” between Phases to the greatest extent possible.

The larger Corridor improvement program to which this application supplements, is estimated to require an investment of \$1.202 billion. The total estimated amount for the Supplemental Project tasks to the larger program is projected at \$248.5 million in 2011 dollars, as shown in Table 3-1.

Table 3.1 – Supplemental Projects Total Projected Costs (2011 Dollars)

IL-Chicago-St. Louis Corridor Supplement Program Tasks	Task Cost
Task 1 – Passenger Siding and Main	\$ 102.4 million
Task 2 – Track Upgrades	\$ 76.2 million
Task 3 – PTC	\$ 6.5 million
Task 4 – Private and Farm Crossings	\$ 23 million
Task 5 – ROD Study	\$ 0.9 million
Task 6 – Program Management and Construction Administration	\$ 39.5 million
TOTAL	\$ 248.5 million

Preliminary estimates of total Project costs (design and construction) are \$ 248.5 million (2011 dollars) and \$ 281.5 million in year of expenditure (“YOE”) dollars. The YOE dollars for the project are shown in the supporting forms work sheets attached to IDOT’s application for federal assistance.

These costs will be refined throughout the final design phase as project details become available. Costs will also be updated during the construction phase as projected costs turn into actual expenditures, and cost escalation (inflation) factors for out-year expenditures become more reliable.

These costs are based on UP’s experience, cost estimating practices and procedures to develop a rough order of magnitude quantity and unit costs for the majority of the work. These costs were reviewed by IDOT and its program manager, Parsons Brinckerhoff. These costs will be refined as the Project moves through the final design and construction, and more information becomes available on unit costs and site conditions.

4. OPERATING AND FINANCIAL RESULTS

4.1. Ridership Forecasts

The FRA funding applications for both 04ROD and Double Track Phases forecasted that passenger operations would begin in August 2014. This schedule is being driven by the acquisition of rolling stock and the installation of Positive Train Control. Infrastructure construction, with the exception of the train control system, is expected to be complete and ready well in advance of the operations date. The funding applications were prepared prior to the inception of the PRIIA Section 305 rolling stock procurement effort. The timeline for completion and adoption of the various PRIIA procurement specifications may alter the schedule by which the Chicago-St. Louis rolling stock can be designed, built and delivered.

The Supplemental Projects are forecast to increase annual ridership above that previously projected for the 04ROD by 21,300. Estimates are not yet available for future ridership above that noted in the previous paragraph.

4.2. Projected Revenue

Primary revenue sources are ticket sales and fees from station concession licenses. Other sources are profits from on-board services (food and beverage), express package services, parking fees and profits from station development.

The Supplemental Projects are not expected to significantly impact projected revenue forecasts previously developed for the 04ROD and Double Track Phases.

4.3. Operating and Maintenance Costs

Operating and maintenance costs for the Corridor were reflected in IDOT's October 2009 funding application. These cost estimates were based on the distance from Chicago to St. Louis rather than what was ultimately financed by FRA (see Grant Cooperative agreement between IDOT and FRA, December 2010). It drew on a variety of sources. Previous estimates by the Midwest Regional Rail Initiative (MWRRI) were reviewed and refined to provide updated input. It was also recognized that UPRR would have responsibility with regard to the on-going maintenance of the HSR corridor and the rail carrier engaged a specialty sub consultant to provide maintenance cost input for the mature corridor. Amtrak experience was also reflected in this process.

Operating revenues for the Corridor were forecast on the basis of anticipated demand for the service, starting from the prior MWRRI work, updated by the consultant team as part of the application process. The forecasting in the application extended only through the tenth full year of operation. To provide the required 20-year projection, the PMC prepared demand and revenue forecasts which extend out to 2035. These projections show that the Corridor may reach a state where it breaks even, between the 10th and 20th full year of operation. However, note that several simplifying assumptions have been applied to arrive at these results and a relatively crude method for extrapolating the information and are illustrated below. Many factors can change over the next five, let alone 20 years, so a continual review and refinement of ridership, revenues and costs is included in the Corridor development process to ensure that the latest data and most recent trends are reflected as the corridor matures.

UPRR is currently investigating similar subdivision with comparable freight tonnages running at Class 4 service. As these costs are accumulated and reviewed by the

stakeholders, the baseline for UPRR's commitment will be established within the Corridor. It is possible that UPRR's financial obligations to maintain the infrastructure will act as an incentive for UPRR to maximize its return on investment by increasing its freight service along the Corridor. Increased freight traffic may conflict with passenger schedule performance. These scenarios will be examined once baseline costs are established by UPRR and verified by the stakeholders. The key will be in presenting actual measured-mile type costs.

IDOT and UP are negotiating a maintenance agreement for the 2A Improvements (those subject to the 2011 construction agreement between the parties, dated March 4, 2011). The agreement will finalize the maintenance cost details. The maintenance agreement will be amended upon award of additional FRA funding, if necessary, to reflect the supplemental Corridor work. The maintenance cost participation by the parties will be based on an incremental maintenance approach. UP will be responsible for the costs associated with maintaining the track to FRA Class 4 standards. IDOT will pay the additional maintenance costs to maintain the track to FRA Class 6 standards. The parties are negotiating a cost allocation methodology where their respective costs will be derived from a formula including volume variable elements (such as forecasted ton miles and train miles) and other variable elements. A final maintenance agreement between IDOT and UP will be completed shortly.

Specific operating and maintenance costs for the Supplemental Project are being determined by UPRR.

Additional information and detail relative to the operating and maintenance costs for the Supplemental Projects is located in the associated Financial Plan and FRA application.

5. BENEFITS

5.1. User Benefits

Four feasible travel mode alternatives exist within this corridor. Automobile, intercity bus, rail and air travel are existing and available travel modes, with high-speed passenger rail proposed to replace most of the conventional rail service.

High-Speed passenger rail travel is a less stressful mode of travel than any other alternative, offering more options for travelers in terms of amenities, convenience and direct travel to city centers. For those who do not desire to drive, the new high-speed rail service will offer an option to intercity bus service or air travel. From Chicago, air service is only available to St. Louis, Springfield and Normal/Bloomington. Air service to the two intermediate cities is of limited frequency and tends to be costly.

Rail travel offers comfortable seating configurations, a wider choice of destinations, and the ability for business travelers to work and communicate while enroute. Although train travel takes longer than air, the sometimes lengthy trip to the airport and waits in airport lines can be avoided and a better use of the time can generally be made.

Non-business travelers including both individual travelers and families on vacation will also enjoy the service with the opportunity to socialize, read, use their laptops, visit the café car for a meal or snack, or to just relax and watch the scenery.

The work to be performed with the Supplementary Projects provides an incremental improvement to all the user benefits that are applicable to the Corridor.

5.2. Non-user Benefits

Those that do not use the system (non-users) will also benefit from the implementation of the high-speed passenger rail service between Chicago and St. Louis. Some of these benefits would be economic in nature, others related to improvements to safety and/or quality of life and some related to positive environmental influences.

The implementation of high-speed intercity passenger rail service within the Corridor will promote transit oriented development within the Corridor. This development is likely to be focused at or near the station locations. Because many of the stations are in downtown areas, there is an opportunity to increase pedestrian flow and traveler patronage of businesses in these areas. The resulting increased traffic for restaurants, snack shops, souvenir shops and other businesses near the station areas would foster economic growth.

The implementation of the new service is expected to result in a reduction of traffic on the highways within the corridor which will benefit those who use the roads and highways within the corridor. Replacing some portion of automobile traffic with more efficient passenger rail service will also enhance safety, benefit the environment and reduce the U.S. dependence on foreign oil.

To accommodate high-speed operations, improvements to grade crossing protection will increase safety to those using the highways. Typical improvements will include four-quadrant gates with speed and motion detection to optimize gate-down time.

Combined, these at-grade crossing improvements will enhance the safety of the entire corridor, providing safety and quality-of-life benefits to those that live in the area as well as those traveling through the area.

An additional benefit of the project is upgrade of freight trackage to maintain and improve freight services on the route.

The work to be performed with the Supplementary Projects provides an incremental improvement to all the non-user benefits that are applicable to the Corridor.

5.3. Economic Development and Stabilization

The enhancement of the existing rail service connecting Chicago and St. Louis, along with the intermediate cities along the route establishes improved mobility options for the citizens of Illinois and Missouri.

During both the 04ROD and Double Track Phases, the rail system will be the source of well-paying jobs ranging from the highest skill levels to heavy labor and service categories.

The system will support economic development, especially at intermediate cities through convenience access to markets and services. Rail systems represent an investment in a fixed route that cannot be easily relocated. The commitment in improving the rail service on a particular route represents the commitment of policy makers to those located on the route and provides stability that encourages outside investment.

5.4. Job Creation/Preservation

The improvements in the 04ROD Phase for Dwight to St. Louis are expected to create significant near-term economic benefits in the corridor, in addition to the State of Illinois and other regions of the United States. The Dwight to St. Louis corridor's economic benefits from the project would be driven by an increase in construction spending in the region. These project expenditures would generate a short term increase in demand for construction-related labor and material as well as engineering and technical services in the corridor. In addition, as part of the project, it is anticipated that rolling stock will be procured. While it is not yet known where the rolling stock will be manufactured, the project would generate additional economic benefits in that region as well.

To quantify the near-term economic benefits of this project an analysis was conducted utilizing Bureau of Economic Analysis Regional Input-Output Modeling System (RIMS II) multipliers. RIMS II multipliers classify each capital cost category according to industrial sectors, using North American Industry Classification System industry codes, and can vary widely depending on the geographic region being analyzed. This particular analysis utilizes RIMS II data for the State of Illinois and McLean County.¹ The multipliers were used to determine the quantity and industry composition of benefits generated by the project resulting in estimations of short-term job creation, earnings, and economic output as a result of the project. The multipliers estimate two types of impacts:

- **Direct Impacts:** Direct impacts represent new spending, hiring, and production by civil engineering construction companies to accommodate the demand for resources in order to complete the project.
- **Indirect/Induced Impacts:** Indirect impacts result from the quantity of inter-industry purchases necessary to support the increase in production from the

¹ The McLean County demographics were assumed to be representative of the Dwight to St. Louis corridor region. As such, only McLean County and the State of Illinois RIMS II multipliers were utilized. RIMS II industry codes 7 (*Construction*), 47 (*Professional, Scientific, and Technical Services*), and 16 (*Other Transportation Equipment Manufacturing*) were utilized in this analysis.

construction industry experiencing new demand for its goods and services. All industries that produce goods and services consumed by the construction industry will also increase production and help preserve or create new jobs to meet the additional demand. The level of inter-industry trade within the area will determine the size of the indirect impact. Induced impacts stem from the re-spending of wages earned by workers benefitting from the direct and indirect activity within area. For example, if an increase in demand leads to new employment and earnings in a set of industries, workers in these industries will spend some proportion of their increased earnings at local retail shops, restaurants, and other places of commerce, further stimulating economic activity.

In addition to measuring the effects of the project on the Dwight to St. Louis corridor economy, the economic impacts of the project that will be realized in other areas were also quantified. These impacts, referred to as “spillover” benefits, reflect the inter-county trade that occurs with supply industries.

Job creation specifically applicable to the Supplemental Projects is estimated to include an additional 475 jobs during the construction period. The total final design and construction job creation is anticipated to be 1,910 jobs.

6. PROGRAM IMPLEMENTATION PLAN

6.1. Schedules

The program schedule for the Chicago-St. Louis Corridor Improvement Program under the current FRA Grant/Cooperative Agreement provides for a project performance period of 05/01/2010 through 12/31/2015.

The proposed Supplementary Projects work will be completed within the existing Cooperative Agreement schedule, so all Tasks within the Supplementary Projects will be completed by 12/31/2015. The estimate timeline for each of the Supplementary Projects tasks is as follows in Table 5.1:

Table 6.1 – IL-Chicago-St. Louis Corridor Supplementary Projects Timeline

Task No. and Description	Estimated Timeline
Task 1 – Passenger Siding and Main	01/2013 to 12/2014
Task 2 – Track Upgrades	04/2012 to 06/2015
Task 3 – PTC	Immediately to 12/2015
Task 4 – Private and Farm Crossings	Immediately to 12/2014
Task 5 – ROD Study	04/2011 to 03/2014
Task 6 – Program Management and Construction Administration	Immediately to 12/2015

6.2. Project Management Approach

IDOT's Bureau of Railroads is responsible for the overall project management for the development and implementation of the Chicago-St. Louis service. Key stakeholders that have been deeply involved throughout the project development and implementation process have included the FRA, the Illinois Commerce Commission (ICC), the operator of the service (Amtrak), the host railroads --Union Pacific Railroad (UPRR) and Canadian National Railway (CN), KCS, and TRRA and key representatives for the communities and cities along the corridor.

Beginning February 2010, Parsons Brinckerhoff was retained by IDOT as the Project Management Consultant (PMC) to assist IDOT with the development, design, public involvement and implementation of the new service. Once the service has been implemented, the primary responsibility for on-going operations will be by Amtrak/Contract Service Providers.

The PMC assisted IDOT in preparing a Project Management Plan (PMP) for the Chicago-St. Louis Corridor Improvement Program. The PMP was issued on November 30, 2010 and has been accepted by FRA. The Supplementary Projects work will abide by the same Project Management Plan.

6.3. Financial Plan

A Financial Plan for the Supplementary Projects is provided under separate cover. For completeness of this document, portions of the Supplementary Projects Financial Plan are duplicated or summarized in this section.

The purpose of the Financial Plan is to document the recent and forecasted financial condition of IDOT (and other partners) that will provide capital or operating funding for project development and/or implementation.

6.3.1. IDOT Financial Overview

IDOT is funded through a combination of Federal and State resources. IDOT's ability to access those resources is provided by appropriations passed by the General Assembly and signed by the Governor. Table 6.2 – IDOT State Budget Appropriations presents the Illinois State Budget appropriations for IDOT.

Table 6.2 – IDOT State Budget Appropriations²

Fund Category	Appropriations (\$ Thousands)		
	FY 2010 Actual	FY 2011 Enacted	FY 2012 Recommended
General Funds	\$78,041.6	\$79,034.6	\$11,471.6
Other State Funds	\$2,430,253.0	\$2,469,788.5	\$2,662,503.8
Federal Funds	\$2,873.1	\$3,969.2	\$4,191.7
TOTAL	\$2,512,167.7	\$2,552,792.3	\$2,678,167.1
	Actual	Estimated	Recommended
Headcount (FTE)	5,201.0	5,771.0	5,861.0

An appropriation does not provide funds to spend; it simply represents an upper limit on IDOT's authority to spend the money contained in the various identified accounts. Because overall needs typically outstrip revenue resources the amount of appropriation requested by IDOT starts with an analysis of the amount of money that will become available from state and federal sources within the fiscal year.

Federal transportation funds are authorized and appropriated by Congress and allocated to Illinois by the USDOT. The federal funds that are available to IDOT are supplied through the following sources:

- Federal Highway Trust Fund – Highway Account
- Federal Highway Trust Fund – Transit Account
- Federal Airport and Airway Trust Fund
- Federal Rail Freight Loan Repayment Fund
- Federal General Fund

² Source: Illinois State Budget, Fiscal Year 2012

State funds that are appropriated to IDOT by the General Assembly for highways and bridges come from the Road Fund, State Construction Fund, and Series A Bond Fund. State funds that are appropriated to IDOT by the General Assembly for transit, airports and rail come from the General Revenue Fund (GRF), Series B Bond Fund, Public Transportation Fund, Downstate Public Transportation Fund, Metro East Public Transportation Fund, Federal Mass Transit Fund, Federal Airport Fund, Federal Rail Freight Fund, State Rail Freight Fund and High Speed Rail Fund. Revenue for the General Revenue Fund is derived from all of the tax and fee sources that feed into that fund. The various public transportation funds are funded through GRF transfers. The federal funds are funded from federal sources. A summary of all IDOT funding sources is shown in Table 6.3.

The transportation network in Illinois is a collection of modal systems: highways, transit, airports, and railroads. The challenge for IDOT and all the Illinois transportation providers and implementers is to integrate these systems into a seamless network that effectively and efficiently moves people and goods.

The state highway system consists of more than 16,000 miles and includes 2,050 miles of interstate roads (which includes 282 miles of tollway). This is part of the 138,000-mile network of state, county, municipal, township, and toll roads that is the third largest system in the nation. IDOT also provides technical assistance and administers state and federal funding to 52 public transit systems throughout the state to serve an average of 600 million passengers a year. Among these is the Regional Transportation Authority in Chicago, which oversees the second largest public transportation system in the nation. In addition, Illinois' airport system is the second largest in the nation and includes 138 airports, 280 heliports, and nine balloon ports. Among the airports for general public service is O'Hare International in Chicago, which is the second busiest airport in the United States and serves more than 76 million passengers annually.³

Rail services, both freight and passenger, are funded primarily by user fees. In support of intercity rail passenger services, the General Assembly provides funds from the general revenue fund for operating subsidies and capital improvements.

In 2009, the State passed the Illinois Jobs Now Capital bill which included \$400 million for High speed Rail, \$150 million for Amtrak and \$300 million for the CREATE project. These Series B Bond funds will be used to match successful ARRA applications and also future federal authorizations for both High Speed/Passenger and Rail Freight programs.

Passenger rail service in Illinois is strongly supported. In 2005, ridership increased by 11 percent on all routes supported by the state. Recognizing the increased demand for the service, Illinois increased state funding from \$12 million in FY 2006 to \$24 million in FY 2007. Enacted appropriations of State support for Amtrak in both 2009 and 2010 was \$28 million.⁴ The enacted appropriation for 2011 is \$26 million. This additional funding allowed Illinois to triple the number of state-supported trains on the Chicago-St. Louis route (now with three Lincoln Service trains), and double the state-supported trains from one to two for service on the Chicago-Carbondale (Illini and Saluki) and Chicago-Quincy (Illinois Zephyr and Carl Sandburg) routes, and expanded daily service between Chicago and the downstate communities of Springfield, Quincy and Carbondale. In addition, this increase in funding has allowed the state to increase the share of support it

³ Source: Airports Council International

⁴ Source: IDOT, Executive Budget for 2011

provides to the Chicago-Milwaukee Hiawatha Service, which provides seven daily trains and is also supported by the Wisconsin Department of Transportation.

Table 6.3 – IDOT Funding Sources by Major Transportation Mode⁵

Major Transportation Type	Funding Source	Type of Fund	Amount/Comments
Highways	Federal	Highway Trust Fund – Highway Account	18.4 cents per gallon of gasoline; 24.3 cents per gallon diesel tax; 12.9 cents per gallon tax on gasohol; and other user fees (excise taxes on tires and auto parts, state portion determined by formula)
	State	Motor Fuel Tax	19 cents per gallon; 2.5 cents per gallon differential for diesel fuel
		State Vehicle Registration Fees	\$78 - automobiles, pickup trucks; \$138-\$2,790 – heavy trucks (based on weight); \$65 – titles*
Transit	Federal	Highway Trust Fund – Transit Account	A portion of the revenue is used for capital projects
		General Fund	Capital and operating assistance
	State	General Revenue Fund and Series B Bond Fund	Includes reduced fare reimbursement, state operating assistance for some transit agencies, and some capital assistance for projects that do not qualify for bond funding
Aeronautics	Federal	Federal Airport and Airway Trust Fund	Aviation user fees
	State	General Revenue Fund and Series B Bonds	
Rail	Federal	Highway Trust Fund	
		Rail Freight Loan Repayment Fund	Federal loans that are repaid to the state and placed into an interest-bearing account
	State	General Revenue Fund and Series B Bonds	Amtrak service
		State Rail Freight Loan Repayment Fund	State loans that are repaid to the state and placed into an interest-bearing account

Ridership on trains in the Chicago-St. Louis Corridor was up 55.8% for FY2006 to FY2007 and up 16.5% from FY2007 to FY2008. Ridership on the Chicago-St. Louis Corridor in 2009 was up 6.3% from 2008.⁶ In 2010, ridership on the Chicago-St. Louis Corridor was up 13.1% over FY2009. For the Chicago-Carbondale route, ridership was

⁵ Source: *Transportation Plan Special Report: Transportation Funding*. Issued by IDOT, June 2007. Since the issuance of this report, the Secretary of State's fees were modified. Pickup truck registration (Class D) is now \$158. Registration for trucks (Class Z) is now \$3,191. Also, per P.A. 96-34, effective with the 2010 registration year, the registration for automobiles is now \$98 and title fees were increased to \$95.

⁶ Source: Amtrak Illinois Fact Sheet, Fiscal Year 2010

up 41.4% from FY2006 to FY2007 and up 18.5% from FY2007 to FY2008 and up 2% from 2009 to 2010. Ridership on the Chicago-Quincy route was up 41.4% from FY2006 to FY2007, up 19.8% from FY2007 to FY2008, and up 3.4% from FY2009 to FY2010. For the Chicago-Milwaukee service, ridership grew 2.6% from FY2006 to FY2007, up 25.9% from FY2007 to FY2008, and up 6.1% from FY 2009 to FY2010.

The freight program provides grants and low interest financing to capital rail projects that benefit economic development in Illinois. Projects are evaluated based on a benefit/cost ratio.

Another element of IDOT's efforts to support freight and passenger rail service is the Chicago Region Environmental and Transportation Efficiency (CREATE) program. CREATE is a partnership between the state of Illinois, the city of Chicago, and six major national freight rail carriers (BNSF Railway, Canadian Pacific Railway, CN, CSX Transportation, Norfolk Southern Corporation, and Union Pacific Railroad). The proposed CREATE program will invest an estimated \$1.5 billion in capital projects to improve transportation efficiency in the region.

On July 13, 2009, a \$31 billion State capital bill, "Illinois Jobs Now!" was signed into law. This bill includes \$400 million for high-speed rail, \$150 million for conventional intercity passenger rail, and \$322 million for the CREATE program. Funding for the Illinois Jobs Now! will be provided by issuing 20-year bonds financed by various fee increases for Secretary of State Services (certificate of title fees, transfer of registration fees, passenger and truck B registration fees, driver's license fees, and fines for overweight trucks), tax revenue enhancements (sales tax on candy, sales tax on sweetened tea, coffee, grooming and hygiene products, and volume tax on wine, spirits, and certain beer products), and video gaming terminals.

6.3.2. Amtrak Service

Amtrak, the National Railroad Passenger Corporation, provides intercity rail passenger service to the general public in the United States. Amtrak was incorporated in 1971 and is authorized to operate a system of passenger rail transportation pursuant to the federal Rail Passenger Service Act of 1970. Amtrak receives annual appropriations from the federal government to operate the passenger rail system and maintain the underlying infrastructure. Amtrak has seen record ridership, with numbers rising to 28.7 million in fiscal year 2008 accompanied by record ticket revenues of \$2.45 billion.

A section of the act creating Amtrak allowed states to contract with the carrier for additional service beyond what was provided in the "basic" system. Illinois was first to take advantage of this provision in 1971 with the Illinois Zephyr service to Quincy. It has continued its support of intercity rail service, adding trains in a number of other corridors over the years, leading Midwestern states in amount of service. Administered by IDOT's Division of Public and Intermodal Transportation, Bureau of Railroads, the program is now second only to California's state-supported passenger rail network.

At the end of October 2006, the State of Illinois increased funding for eight additional trips to the existing state-supported services. The scheduling of the new trains is of particular significance on both the Carbondale and the Quincy corridors. By providing a morning southbound and an evening northbound departure on each route, the state-supported program now allows a one-day trip in either direction. Previously, it was not possible to use the train for a day trip to Carbondale or to Quincy (or to intermediate downstate destinations). With a morning departure at either end of a corridor, the attractiveness of train travel for quick trips is greatly enhanced. The four new trains on

the Chicago-St. Louis corridor also increase travel options, providing more frequent departures and greater convenience from both terminals at the start and end of the operating day. The additional departures give travelers an extended day in either Chicago or St. Louis or intermediate destinations. The morning express train from Chicago makes business travel to downstate a viable option. Introduction of high-speed operations to this corridor will further enhance the marketability and convenience.

The improvements proposed with the Supplemental Projects will further improve the operational flexibility of Amtrak and UPRR within the Corridor, reduce passenger train travel time, improve reliability and enhance train and grade crossing safety.

In FY2010, Amtrak expended \$61,181,301 for goods and services in Illinois. In FY 2010 Amtrak employed 1,479 Illinois residents, with total FY 2010 wages of \$89,177,268.⁷

6.3.3. Capital Cost Estimate

The larger Corridor Improvement Program, to which this application supplements, is estimated to require an investment of \$1.202 billion. The total estimated amount for the Supplemental Project tasks to the larger program is projected at \$248.5 million in 2011 dollars. Section 3 of this document and the associated Financial Plan and FRA Application documents provide additional capital cost detail and information.

6.3.4. Capital Cost Inflation Effects

The Chicago-St. Louis Project will be designed and constructed over several years, as described in Section 6.1. The breakout of construction costs is provided in the HSIPR Program Application Supporting Forms, specifically the Annual Capital Cost Budget form.

Due to inflation, changes in commodity prices, and other factors, the YOE dollar estimate may change during project implementation. An inflation rate of 4.5% per year was assumed for preparing the YOE estimate and is included in the application's General Information Form.

6.3.5. Operating and Maintenance Cost Estimate

IDOT and UP are negotiating a maintenance agreement for the 2A Improvements (those subject to the 2011 construction agreement between the parties, dated March 4, 2011). The agreement will finalize the maintenance cost details. The maintenance agreement will be amended upon award of additional FRA funding, if necessary, to reflect the Supplemental Corridor work.

6.3.6. Current Revenue Estimates

Ticket revenue for the first year of operation for the high-speed Chicago-St. Louis corridor after improvement for both phases is complete is \$52,707,000. This revenue is expect to ramp up and is estimated at \$56,900,000 by the third year of operation. Including other sources of operating revenue, the first and third year total revenues are estimated \$55,297,000 and \$59,695,000 respectively. Completion of only the Phase 04ROD improvements would result in lower revenue numbers.

⁷ Source: Amtrak Illinois Fact Sheet Fiscal Year 2010

The Supplemental Projects is anticipated to result in an additional \$600,000 in revenue on an annual basis, due to the estimated nine minute reduction in one-way travel time within the Corridor.

This subject is discussed in Section 4.1 Ridership Forecasts and Section 4.2 Projected Revenue.

6.3.7. Operating Funding Sources

With the award of ARRA funds for the Chicago-St. Louis corridor, Illinois intends to amend its operating agreement in place with Amtrak to provide operational support for the proposed operation. Illinois funds the Intercity Passenger Rail program with State General Revenue Funds. Illinois has a long history supporting rail passenger operations in the interest of the citizens. With both phases implemented, projections indicate the operation will be near self-supporting.

If the improvements proposed for the Supplemental Projects are approved, this will also be considered when the operating agreement with Amtrak is amended.

6.3.8. Federal Capital Funding Sources

The Supplemental Projects will be financed through a combination of Federal and State sources. The Federal sources are anticipated to come from the FRA.

The FRA issued the March 2011 Notice of Funding Availability for Service Development Programs for High Speed Intercity Passenger Rail (HSIPR) programs. In response, IDOT is preparing an application for funding under FRA's HSIPR Service Development Program for the Supplemental Projects.

6.3.9. Other Funding Sources

UPRR will contribute to the Supplemental Projects providing the use of its existing freight railroad right-of-way for the purposes of double tracking, grade crossings and other improvements. This contribution will equal \$4 million at no additional cost to the project. Additionally, the UPRR will provide a cash contribution to the project totaling \$15.7 million.

The State of Illinois', pending appropriation authority, will provide or arrange to provide the remaining local match to total 25% to federal funds.

6.4. Risk Management

IDOT will perform its own risk analysis of the project in order to identify project risks, especially those pertinent to IDOT functions. IDOT will perform risk assessments systematically throughout the project development at significant milestones.

One of the project deliverables that will serve to mitigate risk is the development of a System Safety Program Plan (SSPP). The SSPP will be developed in cooperation with the host railroads, Amtrak, the FRA and the ICC. Significant coordination activities will be required and technical analyses are expected to include risk analysis, collision hazard analysis and related tasks. The Final version of the SSPP will be used by UPRR to obtain Class 6 passenger rail classification.

A Risk Management Plan will be developed by the IDOT Project Manager, in conjunction with the consultant/contractors and IDOT Project team personnel. The Risk

Management Plan (RMP) will identify potential risks, the likelihood of occurrence, and the impact to the project. The RMP will be updated annually.

The IDOT Project Manager will coordinate this effort with FRA and UPRR.

The RMP methodology is anticipated to include the following:

6.4.1. Step 1: Identify Risks

Use a well thought-out and consistent approach to identify a comprehensive list of potential risk events. Be specific when identifying and describing the risk. Some techniques to identify risk are brainstorming and expert interviews.

6.4.2. Step 2: Quantify Risks

Develop a risk management matrix with all the risks grouped in categories. Assign the risk to the owner, contractor or other parties (to be agreed) and show on the matrix.

Determine the probability of the occurrence and impact to cost and/or schedule for each risk and show on the matrix using qualitative designations. (i.e. Low, Medium, High)

Use this matrix to compare the probability to the level of impact for each risk.

6.4.3. Step 3: Analyze and Prioritize Risks

Identify the top 20% of the risks based on the risk exposure (probability and impact) that must be monitored using the matrix. Identify the estimated dollar value and/or length of delay for each monitored risk. Prioritize the monitored risks using dollar estimates and time schedule delays. A technique to prioritize is paired comparison, which takes into account the degree of control the project team has over the risk event followed by the timing of the risk event. (i.e., High Probability-Medium Impact). Identify the responsible party for each risk.

6.4.4. Step 4: Planning for Risks

Create risk response strategies for each monitored risk. Evaluate and select a primary response. Incorporate options into the risk and project plans.

6.5. Quality Assurance/Quality Control Program

The safety, reliability, maintainability and human factor considerations within High-Speed Rail related projects or programs demand that systematic, consistent, and authoritative process controls be implemented during the design, procurement and construction process. This objective will be attained through the development and implementation of a comprehensive Quality Assurance /Quality Control (QA/QC) Program to support the project.

The controls necessary for preserving the integrity of the quality activities and the documentation of the results of these activities are categorized into three general areas:

- Review of design, contract and procurement documents, as well as testing, operating and maintenance procedures to verify that quality aspects have been considered.
- Surveillance and/or witness of manufacturing, construction installation and integrated testing activities for adherence to design, contract, and operational requirements.

- Audits of Quality Management Systems for adequacy and compliance with requirements.

In compliance with these objectives, the PMC prepared a Quality Management System (“QMS”) to support the activities of the ROD project. The QMS provides for the development, implementation and oversight of Quality Assurance / Quality Control (QA/QC) manuals, procedures and compliance audits to support the HSR Program in order to help provide for a high level of quality throughout the Program. The QMS includes a Quality Assurance Manual and associated Quality Procedures that will define the quality system objectives, responsibilities, on-going quality control requirements and quality assurance oversight and audit requirements. The associated quality procedures are also being developed. These documents are “living documents” and will continue to be updated as necessitated by the project, and will be used to support the Supplemental Projects.

The QA/QC activities supporting the ROD project work that has been performed to date has focused on track construction materials and processes, as they comprise nearly all work performed thus far for the Chicago-St. Louis Corridor improvements. Specific attention has been given to confirming whether the following material items conform to UPRR and/or applicable industry standards:

- concrete ties
- ballast
- running rail
- turnouts
- rail welds
- rail clips/fasteners
- concrete grade crossing panels
- track construction processes

Particular emphasis has been placed on QA/QC oversight of the concrete ties used for the project due to their importance to the success and longevity of the capital improvements. In this regard, the PMC has retained the services of independent firms to provide expert review of concrete tie manufacturing facilities for production and QA/QC compliance with UPRR specifications. Sampling of concrete ties intended to be used in the Chicago – St. Louis Corridor were gathered throughout the construction process and sent to an independent testing laboratory for analysis to determine conformance to pre-production and structural/material test requirements. These QA/QC processes must be repeated for each concrete tie manufacturer and plant location.

The above referenced trackwork related QA/QC activities (including the concrete tie QA/QC process) will also be applied to the proposed Supplemental Projects.

As the ROD project work continues forward, additional QA/QC attention will be given to other aspects of the program as they commence, including (as applicable) design, procurement and construction of the following:

- station facilities
- culverts, bridges, retaining walls and other structural elements
- rolling stock
- signal, grade crossings and PTC systems

In a similar context, these QA/QC procedures (as applicable) will be applied to the work to be performed with the Supplemental Projects.

Record of Decision (upload #9)

RECORD OF DECISION

CHICAGO - ST. LOUIS HIGH-SPEED RAIL PROJECT

FHWA-IL-EIS-99-01

I. DECISION

The Federal Highway Administration (FHWA), Federal Railroad Administration (FRA) and Illinois Department of Transportation (IDOT) have completed the environmental review process for the Chicago – St. Louis High-Speed Rail (HSR) Project, as mandated by the National Environmental Policy Act and related laws and regulations, and have selected the Preferred Alternative as described in the Final Environmental Impact Statement (FEIS) for implementation in this corridor. The Preferred Alternative uses the current Chicago – St. Louis Amtrak route and involves high-speed rail service consisting of three round trips per day, with estimated one-way end-to-end travel times between four hours and four hours and 30 minutes. HSR trains will stop at all of the stations currently served by the existing Chicago - St. Louis Amtrak route (i.e., Chicago Union Station, Summit, Joliet, Dwight, Pontiac, Bloomington/Normal, Lincoln, Springfield, Carlinville, Alton, and St. Louis). South of Dwight, maximum operating speed will be 110 mph (177 kph). North of Dwight, the existing maximum operating speed of 79 mph (127 kph) will be maintained. No physical improvements and no changes in operating characteristics (i.e., number and speed of trains) will be made north of Dwight. IDOT will carry out the HSR Project and will make improvements as funding becomes available. The three Agencies have selected this Alternative because it best satisfies Purpose and Need and poses the least impacts to the natural and human environment, and can be accomplished with available or likely to become available funding resources. This decision is based upon full consideration of information contained in the Draft Environmental Impact Statement (DEIS) approved by the FHWA, FRA and the IDOT in May 2000, public hearings held in July/August 2000, the Final Environmental Impact Statement (FEIS) approved by the FHWA, FRA and IDOT in January 2003, public and agency comments pertaining to the proposed action, the other alternatives considered, the respective environmental consequences, and issues related to the proposed action.

Approval of the Project by the FHWA and FRA involves limited Federal actions at this time. Operations at speeds of 110 mph (127 kph) will be made possible by the completion of the North American Joint Positive Train Control Program (NAJPTC), a demonstration project jointly funded by the Association of American Railroads (AAR), IDOT and the FRA. This program is installing a system to support revenue-service high-speed operations and to demonstrate flexible-block operation using movement authority commands. These commands will be radioed to each train on a 123-mile track segment of Union Pacific Railroad's Chicago - St. Louis Corridor and will establish industry-wide standards for control system interoperability. The FRA has provided approximately \$39 million through fiscal year 2002 for this demonstration project. Total project cost to date is estimated at \$80 million. The selected alternative supports the implementation of the NAJPTC for revenue service. IDOT envisions possible future Federal financial support for other aspects of implementing the Selected Alternative, however, no existing Federal grant program funds general capital investments in high-speed rail development. However, a number of proposals are pending in Congress to create such a program.

Existing track will be utilized for the proposed action throughout the project area. However, provision of HSR service will require construction of 20 kilometers (12 miles) of double track; 35 kilometers (22 miles) of freight siding; and one grade-separated highway-railroad grade crossing; and installation of enhanced warning devices at 174 grade crossings.

The primary purpose of this proposal is to enhance the passenger transportation network in the Chicago - St. Louis corridor, resulting in a more balanced use of its components. The existing network consists of highway (automobile and bus), air and rail (Amtrak) travel. Currently, 99 percent of the 35 million trips made annually in the Chicago - St. Louis corridor are accomplished through automobile and air travel. This proposal is intended to lead to a more balanced use of the network by diverting trips made by automobile and air. A more balanced use of the network will also provide benefits to the human environment over the existing network use.

The proposed action is described in greater detail in Section 3.2 of the Final EIS. The Final EIS is available for review at the Illinois Department of Transportation Office in Springfield.

II. ALTERNATIVES CONSIDERED

Alternatives Selected for Evaluation in the EIS: Two alternatives were evaluated in the EIS: 1) the No-Build Alternative; and 2) the Build (High-Speed Rail) Alternative. (See Section 3.1 of the Final EIS for a full description of these alternatives).

No-Build Alternative: The No-Build Alternative consisted of the existing plus committed improvements to the existing intercity passenger rail system and the complementary intercity highway and aviation services and facilities in the Chicago - St. Louis corridor. As part of this alternative existing Amtrak service would be maintained. Passenger service would operate on the current Chicago - St. Louis Amtrak route between Union Station in Chicago and the Amtrak Station in St. Louis. Service between Chicago and St. Louis would consist of three daily round trips with scheduled one-way trip times of between five hours and 25 minutes and five hours and 40 minutes. No changes in station stops, equipment, or grade crossing treatments would occur with this alternative. Additionally, only regular maintenance and rehabilitation would occur in the project area.

The No-Build Alternative will not meet the purpose and need of the project because it will not enhance the passenger transportation network in the Chicago - St. Louis corridor. To achieve this, a new or improved transportation mode must be introduced with shorter travel times and enhanced reliability and safety. The No-Build Alternative would be a continuation of existing Amtrak service and would not provide any operational or service improvements. Without reductions in travel time or improvements to reliability and safety, the viability of rail passenger service as an alternative to air and automobile travel would not increase, and subsequently, travelers would not divert from those two modes. Therefore, the No-Build Alternative was not considered an adequate solution to meet the existing and anticipated transportation needs of the corridor.

Build (High-Speed Rail) Alternative: The High-Speed Rail Alternative was evaluated in the EIS as an alternative to current Amtrak service that would address the existing rail passenger service problems in the corridor and that would serve as a more viable alternative to intercity automobile, air, and bus travel between Chicago and St. Louis. This alternative would help provide a more balanced use of the passenger transportation network in the corridor, resulting in benefits to the human environment. These benefits to the human environment include reductions in pollutant emissions and energy consumption associated with intercity travel in the Chicago - St. Louis HSR corridor.

The HSR Alternative evaluated in the Draft EIS consisted of provision of passenger service between Chicago and St. Louis, operating at top speeds of 110 mph (177 kph) through most of the project area, except for a 29-kilometer (18-mile) segment between Lincoln and Springfield where 125 mph (200 kph) was considered. Service levels consisted of eight round trips per day, with one-way end-to-end travel times of approximately 3.5 hours. Between Chicago and Dwight, three alternative alignments were evaluated in the Draft EIS. One of the alignments — the Canadian National-Illinois Central/Union Pacific — is the current Amtrak route. Another would utilize Canadian National-Illinois Central mainline and Norfolk Southern (formerly Conrail) track via Kankakee to provide a better route of entry into Chicago and would provide access to the proposed South Suburban Airport site in Peotone. This alignment is referred to as the Norfolk Southern alignment. The third alignment, referred to as the Rock Island District alignment, would utilize Metra Rock Island District track between Chicago and Joliet and Union Pacific track between Joliet and Dwight. South of Dwight, one alternative alignment — matching the existing Amtrak route — was evaluated. As part of the High-Speed Rail Alternative, double track and freight siding, grade crossing treatment, station, and equipment improvements were also evaluated.

Selected Alternative: The Agencies have concluded that implementation of high-speed rail service will meet the purpose and need defined for this project. This fact, coupled with the consideration of public and resource agency comments, led to the determination that the overall benefits of providing HSR service outweigh the potential environmental impacts and that HSR service should be provided in the Chicago - St. Louis corridor to the extent practicable.

The Selected Alternative as described in Section I and based upon the Preferred Alternative included in the FEIS consists of provision of high-speed rail passenger service with a maximum operating speed of 110 mph (177 kph) in certain portions of the corridor. However, between Chicago and Dwight, the existing maximum operating speed of 79 mph (127 kph) will be maintained and no physical improvements will be made north of Dwight. Although three alignments were considered between Chicago and Dwight, IDOT does not wish to select a new alignment at this time. Currently, there are several other projects being considered between Chicago and Dwight that could influence the selection of an alternative alignment. Some of these projects include:

- the South Suburban Airport near Peotone;
- the reinstitution of the Grand Crossing, which would provide the Norfolk Southern alignment access to Union Station; and
- the switching of Southwest Metra service to Rock Island District track near 79th Street.

Final decisions on how these projects will proceed have not been made. Therefore, IDOT decided that selection of an alternative alignment between Chicago and Dwight would not be prudent at this time. In the interim, the current Amtrak route will be used north of Dwight.

For the Selected Project, service will consist of three round trips per day, matching existing Amtrak service. Ultimately, a “full-build” HSR Alternative in the Chicago - St. Louis corridor could consist of eight round trips per day. However, prior to expanding service beyond three round trips per day, it will be necessary to select a final alternative alignment between Chicago and Dwight. As part of this selection and service enhancement, supplemental environmental and operational reviews will have to be conducted. Additional coordination with the other freight and passenger operators in the corridor will also be undertaken.

The HSR Alternative evaluated in the Draft EIS assumed greater investment in infrastructure and more trains than is now contemplated with the Selected Alternative. Even though the improvements associated with provision of HSR service have been reduced from those presented in the Draft EIS, the Selected Alternative will address the three needs identified for this project. A summary of the effectiveness of the Selected Alternative at meeting the purpose and need is provided below.

Reduced Travel Time and Improved Service Reliability: Rail passenger travel time between Chicago and St. Louis will decrease to between four hours and four hours and 30 minutes. Rail communication and signal systems will be upgraded, improving reliability and on-time performance.

Safety: Overall passenger safety in the corridor will increase as travelers divert from automobile to rail since rail is a safer mode of travel.

Human Environment: Volatile organic compound, carbon monoxide, and nitrogen oxide emissions from passenger transportation sources in the corridor will be reduced. Total annual energy consumption for all passenger travel in the corridor will also be lower.

III. SECTION 4(f)

The Selected Alternative will not impact any publicly owned land from a park, recreation area, wildlife/waterfowl refuge, or historic site of national, state, or local significance.

IV. MEASURES TO MINIMIZE HARM

All practical measures to minimize the potential environmental impacts caused by the Selected Alternative will be taken by IDOT in implementing the Selected Alternative. The mitigation measures proposed for this project are summarized in Section S.4 and described in detail in Section 5 of the Final EIS. During final design, efforts will be made to avoid or minimize the impacts of this project to the extent reasonable. In areas where impacts are unavoidable, best management practices (BMP) will be incorporated into the design. General construction mitigation measures will include the continuation of public utility service; minimization of existing vegetation removal; control of the disposal of surplus or unsuitable material; minimization of construction noise, vibration impacts, and air pollution; and the control of erosion and sedimentation during construction.

Social/Economic: The Selected Alternative will require the acquisition of 0.2 hectares (0.4 acres) of commercial property at Pontoon Road (MP 272.70), where a grade separation is proposed. This improvement will also result in the displacement of one commercial outbuilding. Just compensation will be provided for the property acquisition that will be required.

Twenty-four grade crossings along the Selected Alternative are proposed for closure. Fourteen of these crossings serve pedestrian traffic only. In all instances where crossing closures are proposed, adequate reserve capacity exists on the adjacent crossings to handle the diverted traffic. No crossings will be closed without the consent of the local community or the property owner involved.

IDOT will contact each community in the Chicago - St. Louis High-Speed Rail corridor south of Dwight to discuss the possibility of fencing along the railroad tracks. If a community is interested in having fencing installed, IDOT will coordinate with that community to determine the location, style, and height of the

proposed fencing as well as whether the fencing will be on one or both sides of the railroad tracks. If an agreement can be reached, fencing will be installed. Fencing will not be installed unless agreed to by the local community.

Water Resources: Short-term impacts to water quality and aquatic biota could occur with the Selected Alternative. Twenty-eight streams and small tributaries could be affected. To minimize potential impact, erosion, sedimentation and bank stabilization measures will be employed, consistent with IDOT's Bureau of Design and Environment Manual.

Wetlands: The FHWA, FRA and IDOT have determined that there is no practical alternative to the construction of the Selected Alternative in wetlands and that all practical measures to minimize impacts to wetlands will be taken. The Selected Alternative will require the loss of 0.36 hectares (0.89 acres) of wetland. Wetland impacts will be mitigated through a wetland mitigation plan approved by the Illinois Department of Natural Resources. Compensation for wetland impacts will be provided through the purchase of credits in an approved wetland mitigation bank. Coordination will be conducted with the U.S. Army Corps of Engineers in conjunction with the Section 404 Permit of this project to determine the availability of suitable wetland banks.

If an approved wetland bank is not available at the time of permitting, wetland impact mitigation will be provided through the conversion of non-wetland areas into wetlands. The actual acreage of created wetland required for mitigation will vary depending on where the mitigation is constructed relative to the wetlands impacted and will range from 0.57 hectares (1.41 acres) to 0.73 hectares (1.79 acres). Design and implementation will be conducted in cooperation with the U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service and the Illinois Department of Natural Resources.

Monitoring will occur for all wetland compensation areas of 0.10 hectares (0.25 acres) or greater. Monitoring will be performed according to IDOT's Wetlands Action Plan and any conditions stipulated by the U.S. Army Corps of Engineers. Greater details on the monitoring program will be developed as part of the conceptual wetland mitigation plan.

Natural Resources: The Selected Alternative will require the loss of 34 hectares (85 acres) of upland vegetation. Seventy-four percent of this will be agricultural land, pasture, developed land or farmland. Restoring and enhancing environmental quality is proposed for all impact areas. All disturbed areas not occupied by project facilities will be immediately revegetated and mulched to stabilize disturbed soils, minimize erosion, and enhance the productivity and aesthetics.

The Selected Alternative will require the loss of 0.25 hectares (0.61 acres) of native vegetation. Unavoidable impacts to native communities will be mitigated through a prairie mitigation plan. Unless a higher ratio is required due to presence of high quality wetland flora, etc., compensation for direct adverse impacts (temporary and permanent) to prairies of grade C+ and higher will occur at a 1:1 ratio. Further, compensation will occur in-kind (i.e., wet prairie for wet prairie, mesic prairie, sand prairie, dolomitic prairie, etc.).

Monitoring will occur for each created or enhanced prairie area of 0.10 hectares (0.25 acres) in size or greater. Monitoring will involve photographic documentation from the same vantage point each year for a three-year period or until 80 percent ground cover by native, perennial prairie plants is achieved (whichever is later). Monitoring will be done by the Illinois Natural History Survey for IDOT, and the annual report will be coordinated and reviewed with the IDNR.

Management practices for prairie areas will focus on prescribed burn management and removal of invasive plants. Annual monitoring and long-term maintenance will identify whether removal of invasive plants will be performed by manual or chemical methods. The decision will be based on the growth characteristics of the species targeted for removal and the extent of invasion.

For long-term management, interagency agreements will be required to establish cooperative management for each created, preserved, and enhanced prairie. These agreements will allow access to and management of the existing C+ and higher prairie areas within the railroad right-of-way as well as lower grade prairies being managed to improve vegetative quality by IDOT, IDNR, or their designated representative.

No threatened or endangered species were found during field surveys of the project area of the Selected Alternative. Therefore, no impacts to threatened or endangered species are anticipated. Coordination has been conducted with the U.S. Fish and Wildlife Service and the Illinois Department of Natural Resources regarding the potential for the project to affect Federal or state threatened or endangered species. This coordination and consultation will continue as appropriate in order to assure that appropriate mitigation measures are incorporated into the project so that impacts to protected plant and animal species are minimized or avoided.

Floodplains: One construction project associated with the Selected Alternative would occur in areas where 100-year floodplains have been identified. However, no work should be performed below the 100-year flood elevation, and as a result, this improvement will not encroach upon the base floodplain. Therefore, there will be no impacts to floodplains.

Special Waste: No CERCLIS sites will be involved or impacted by this project. Preliminary Environmental Site Assessments (PESAs) for special waste were conducted by IDOT, Bureau of Railroads. The assessments concluded that the Selected Alternative could involve other special waste sites. Further investigations should be conducted to determine risks and liabilities of the involvement prior to land acquisition.

Permits: Section 404 permits will be needed from the U.S. Army Corps of Engineers for wetlands where filling occurs. In addition, a Section 401 water quality certification will have to be obtained from the Illinois Environmental Protection Agency. Permits from the Illinois Department of Natural Resources, Office of Water Resources, will be required for construction activity in and around streams and floodplains.

It is anticipated that this project will result in the disturbance of 0.4 or more hectares (one or more acres) of total land area. Therefore, it will be subject to the requirement of a National Pollutant Discharge Elimination System (NPDES) permit for stormwater discharges from construction sites. Permit coverage for the project will be obtained either under the Illinois Environmental Protection Agency General Permit for Stormwater Discharges from Construction Site Activities (NPDES Permit No. ILR10) or under an individual NPDES permit.

To control local air pollution impacts, a permit may be required for portable bituminous and concrete plants used in project construction.

V. MONITORING AND ENFORCEMENT PROGRAM

Monitoring and enforcement of the project commitments and impact minimization/mitigation measures will be accomplished by IDOT through standard procedures to assure compliance. Specifically, IDOT will provide those individuals responsible for preparing the construction plans and those overseeing and monitoring their work with a copy of this Record of Decision, the Draft EIS, and the Final EIS to assure that required environmental avoidance and mitigation measures are included in the plans and specifications prepared for the project. The Resident Engineers overseeing the construction of the project will also receive a copy of these documents and will be responsible for assuring that all commitments are met. IDOT will regularly monitor the compliance efforts of these project participants and will report any deficiencies (and its efforts to enforce the project commitments with respect to such deficiencies) without delay to the FRA and FHWA.

VI. COMMENTS ON THE FINAL EIS

The Notice of Availability of the Final EIS was published in the *Federal Register* on January 31, 2003. The notice specified March 10, 2003 as the end of the wait period. By written request, this period was extended to April 15, 2003 for Kankakee County.

The following is a summary of the comments received on the Final EIS.

U.S. Department of Agriculture, Natural Resources Conservation Service: In a letter dated February 25, 2003, the U.S. Department of Agriculture Natural Resources Conservation Service stated that they completed the Farmland Conversion Impact Rating Form AD-1006 on this project in May 2000 and had no further comment.

Response to Comment: No response is required. A copy of the Impact Rating Form is provided in Appendix C (p. C-28) of the Final EIS.

U.S. Environmental Protection Agency: In a letter dated February 21, 2003, the U.S. Environmental Protection Agency (EPA) stated that they had no significant environmental concerns with the proposed action. After reviewing the Draft EIS, the U.S. EPA had raised objections to two of the three alternative alignments considered north of Dwight. However, since the Selected Alternative consists of no action north of Dwight, the issues raised in their previous objections are no longer applicable.

Response to Comment: No response is required.

Illinois Department of Natural Resources: In an e-mail communication dated February 28, 2003, the Illinois Department of Natural Resources (IDNR) raised concerns about potential impacts to Timber Creek (near Funks Grove in McLean County) and Kickapoo Creek (in Logan County). Timber Creek was adopted as an INAI stream in January 2002, and it is likely that Kickapoo Creek will become an INAI stream as well.

The IDNR also stated that in terms of wetland impacts, all of the information required by the Interagency Wetlands Policy Act was provided. They concurred with the proposed mitigation ratios and the recommendation that compensation for wetland impacts be provided through the purchase of credits in an approved wetland mitigation bank.

Response to Comment: As part of the Selected Alternative, no impacts were identified at either Timber Creek (MP 136.55) or Kickapoo Creek (MP 149.50) because they are located outside of the proposed construction areas.

Illinois Environmental Protection Agency: In a letter dated March 3, 2003, the Illinois Environmental Protection Agency stated that they had no objections to the project. They also noted that a National Pollutant Discharge Elimination System (NPDES) Construction Permit would be required for the project and Section 401 water quality certification would be required for any permit required by Section 404 of the Clean Water Act.

Response to Comment: The need for the NPDES Permit and the water quality certification was identified in the Final EIS (p. S-10) and is reiterated in this Record of Decision.

City of Kankakee: In a letter dated March 7, 2003, the City of Kankakee wrote in support of the Norfolk Southern alignment between Chicago and Dwight. Reasons for their support of this alignment included:

- It has no formal opposition.
- It would serve an area underserved today.
- It is safer because there are fewer grade crossings.
- It would provide access to the proposed airport in Peotone.
- It is the least expensive.

Accompanying the City's letter was additional correspondence in support of the Norfolk Southern alignment from the Village of Beecher, the Village of New Lenox, the South Suburban Mayors and Managers Association, and Congressman Jessie Jackson, Jr.

Response to Comment: As noted in the Final EIS, an alignment between Chicago and Dwight has not been selected. Under the Selected Alternative, the current Amtrak route – through Joliet – will be used. Passenger service would consist of three round trips per day (matching existing conditions). Maximum operating speed will remain unchanged between Chicago and Dwight and will increase to 110 mph (177 kph) between Dwight and St. Louis. Ultimately, a “full-build” HSR Alternative could consist of eight round trips per day. Prior to expanding service beyond three rounds trips per day, it will be necessary to select a final alternative alignment between Chicago and Dwight. As part of that selection process and service enhancement, supplemental environmental and operational reviews will be conducted. The Norfolk Southern alignment remains a viable alternative between Chicago and Dwight and will be considered further prior to selection of a final alternative alignment through that area.

As a matter of clarification, preliminary cost estimates developed for the Draft EIS indicated that the Norfolk Southern alignment would cost the most of the three alternative alignments considered.

Kankakee County: In a letter dated April 8, 2003, Kankakee County wrote in support of the Norfolk Southern alignment between Chicago and Dwight.

Response to Comment: As noted above, an alignment between Chicago and Dwight has not been selected. Prior to expanding service beyond three rounds trips per day, it will be necessary to select

a final alternative alignment between Chicago and Dwight. As part of that selection process and service enhancement, supplemental environmental and operational reviews will be conducted. The Norfolk Southern alignment remains a viable alternative between Chicago and Dwight and will be considered further prior to selection of a final alternative alignment through that area.

City of Granite City: In a letter dated March 5, 2003, the City of Granite City, citing public safety concerns, recommended that the grade crossings at 25th Street, 20th Street, and Neidringhaus Avenue be equipped with four quadrant gates.

Response to Comment: The identified crossings are currently equipped with conventional two quadrant gates. The Illinois Commerce Commission (ICC) has requested that all public grade crossings where speeds will exceed 90 mph (145 kph) be equipped with four quadrant gates. It is estimated that the maximum operating speed at these three crossings in Granite City will be 60 mph (97 kph) which is well below the 90 mph requested by the ICC as the threshold for providing four quadrant gates. For this reason, no changes to the existing grade crossing treatment devices are recommended.

Illinois Farm Bureau: In a letter dated February 28, 2003, the Illinois Farm Bureau stated that with the exception for the potential added difficulty in negotiating gated crossings with large farm equipment, the Preferred Alternative appears to pose little environmental impact to agriculture and generally satisfies the three key policies of their organization regarding the High-Speed Rail Project.

Response to Comment: Prior to the installation of gates at private crossings, coordination with the crossing owners will take place to address their concerns to the extent practicable.

Main Street Lockport: In a letter dated February 27, 2003, Main Street Lockport, a non-profit organization that supports revitalization and restoration, expressed concerns regarding high-speed rail passenger service through Lockport. Their concerns consisted of the following:

- impacts to the leafy prairie clover found in Big Run Seep;
- impacts to cultural resources;
- public safety; and
- noise.

Response to Comment: As part of the Selected Alternative, no action is proposed through Lockport. Trains will continue to operate at existing speeds, and no new trains will be added. Additionally, no construction is proposed through this area. Therefore, this project will not result in any direct impacts in the Lockport area.

As noted above, an alignment between Chicago and Dwight has not been selected. Prior to expanding service beyond three round trips per day, it will be necessary to select a final alternative alignment between Chicago and Dwight. As part of that selection process and service enhancement, supplemental environmental and operational reviews will be conducted. The concerns raised by Main Street Lockport, including speed limits, will be reviewed at that time.

Additional Public Comment: A few comments were received that provided general support or disapproval of the proposed action. One comment came from a couple who stated that high-speed rail service would have a negative impact on their community (Godfrey) and questioned whether the

existing track could handle high-speed trains. Additional communication from the public included requests for the Final EIS and clarification on specific grade crossing treatments.

Response to Comment: As documented in the Final EIS, potential negative community impacts are minimal. Less than one acre of right-of-way and one displacement is required for the Selected Alternative. Additionally, no noise, vibration, or air quality impacts were identified.

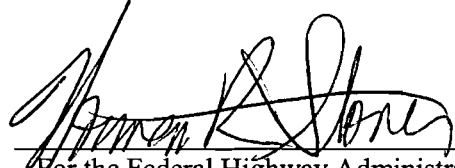

As necessary, track maintenance and improvements will be made so that high-speed trains can operate safely.

VII. CONCLUSION

The FHWA, FRA and IDOT have reached their decision based upon information and analysis contained in the FEIS and outlined in this document. The decision concludes that the Selected Alternative, the Build (High-Speed Rail) Alternative, as described in this document: 1) best satisfies Purpose and Need, 2) poses the least impacts to the natural and human environment, 3) has been selected based on processes in compliance with NEPA and other applicable requirements, and 4) may be advanced.

Federal Railroad Administration (FRA) CATEGORICAL EXCLUSION WORKSHEET

Note: The purpose of this worksheet is to assist proposal sponsors in gathering and organizing materials for environmental analysis required under the National Environmental Policy Act (NEPA), particularly for proposals, which may qualify as Categorical Exclusions and to assist the FRA in evaluating requests from project sponsors for categorical exclusion determinations. Categorical Exclusions are categories of actions (i.e. types of projects) that the FRA has determined, based on its experience, typically do not individually or cumulatively have a significant effect on the human environment and which generally do not require the preparation of either an environmental impact statement or an environmental assessment.

Submission of the worksheet by itself does not meet NEPA requirements. FRA must concur in writing with the proposal sponsor's Categorical Exclusion recommendation for NEPA requirements to be met. Please complete this worksheet using compatible word processing software and submit and transmit the completed form in electronic format.

I. PROPOSAL DESCRIPTION

Proposal Sponsor Illinois Department of Transportation	Date Submitted 4/3/11	FRA Identification Number (if any)
Proposal Title Dwight-St. Louis High Speed Rail Grade Crossing Enhancement Project		
Location (Include Street Address, City or Township, County, and State) JRTC Suite 6-600, 100 W. Randolph, Chicago, IL 60601		
Contact Person George Weber	Phone 312.793.4222	E-mail Address george.weber@illinois.gov
<p>Note: Fully describe the proposal including specifics that may be of environmental concern such as: widening an embankment to stabilize roadbed; repairing or replacing bridge piers foundations, including adding rip-rap in a waterway; earthwork and altering natural (existing) drainage patterns and creating new water discharge; contaminated water needing treatment; building a new or adding on to a shop building; fueling or collection of fuel or oil and contaminated water; building or extending a siding; and building or adding on to a yard.</p>		

Description of Proposal

The Dwight-St. Louis High Speed Rail Grade Crossing Enhancement Project is a continuation to the Chicago-St. Louis High Speed Rail Corridor Project ("Original Project") approved by FRA under the Final Environmental Impact Statement (EIS) dated January 2003 (Record of Decision, ROD, dated January 8, 2004). As established in the ROD of January 2004 for the Chicago-St. Louis HSR project, on-line private crossings on the corridor were planned to receive two-quadrant gates without vehicle detection. By agreement with the Illinois Commerce Commission (ICC) and the FRA-Office of Safety, these crossings are now required to have four-quadrant gate installations and vehicle detection equipment. Improvements to the safety equipment are proposed at the 33 private at-grade crossing locations. This request was done in order to bring the gate designs in line with FRA recommendations that were made subsequent to the issuance of the EIS and ROD on the Original Project.

The collaborative process of performing grade crossing diagnostics along the Chicago-St. Louis HSR Corridor began in 2010 and has included representatives of Illinois Department of Transportation (IDOT), the ICC and the Union Pacific Railroad (UPRR). In addition, weekly conference calls to discuss design details and determine specifics of installations has included all of the above-listed stakeholders, as well as the FRA. Consensus was reached with regard to the private crossings as described below. This approach will enhance the safety of each of these installations, as well as the overall project. Adopting these enhancements prior to construction of the improved private crossing installations is the most cost-effective approach.

Twenty-three (23) of the 33 private crossings are located on farms, and are known as farm to farm or field to field crossings. These are used primarily to move farming equipment from one field to another on farms that are bisected by rail lines. The proposed design accommodates crossings for large farm equipment. The remaining ten crossings, are other privately-owned auto crossings. Five of these privately-owned crossings have some public characteristics. The other five do not have public characteristics and are residential, but all ten private crossings are to be treated with the same type of safety enhancements as public road crossings. Appendix A lists the 33 crossings with their identifying characteristics and milepost locations. Ground level photos also appear in Appendix A. Maps of the crossings are in Appendix B.

The gates at the 23 field to field crossing locations, which were originally designed as a simple two-gate system, will, under this modification project, be "an active gate system that has the characteristics of a locked, reduced-access gate system," including vehicle detection loops. Detailed designs are shown in Appendix C. The gates at the ten private crossings, which formerly were proposed as conventional two-quadrant gates, will all be upgraded to a four-quadrant gate system with vehicle detection under this modification project. This project does not require any new right-of-way (ROW) beyond that of the approved Original Project. The gate improvements at all 33 locations are being proposed in the same locations as proposed in the Original Project. The gates will all be constructed on existing railroad right-of-way, and they will be constructed using the same equipment. The locked gate system for field to field crossings will increase safety by appearing to be a permanently closed road or closed gate to a public motorist. Only land-owners and Emergency Medical Services will have access to unlock the gate for use of farm equipment access during appropriate times. These gates also provide other safety features such as extended advance audible train signal to accommodate the length of large farm equipment.

Purpose and Need of Proposal

The need for the proposed modification to the Original Project is to comply with recommendations from the Illinois Commerce Commission to improve crossing gate safety treatments (see Appendix C for the original correspondence from ICC).

The purpose of the modifications is to ensure compliance with current federal and state safety requirements, and in general to achieve a higher level of safety for trains that will be traveling at speeds as high as 110 MPH, as well as for farming equipment and other vehicles that may be traveling over these private crossings.

II. NEPA CLASS OF ACTION

Answer the following questions to determine the proposal's potential class of action.

A. Will the proposal substantially impact the natural, social and / or human environment?

☐ YES (Contact FRA)

☒ NO (Continue)

Actions that will significantly impact the environment require preparation of an Environmental Impact Statement. These proposals typically include construction or extension of rail lines or rail facilities including passenger, high speed, or freight rail activities.

B. Is the significance of the proposal's social, economic or environmental impacts unknown?

☐ YES (Contact FRA)

☒ NO (Continue)

C. Does Section 4(f) of the Department of Transportation Act apply? (i.e. proposal requires the use of publicly owned land of a public park, recreation area, or wildlife and waterfowl refuge of national, State, or local significance, or land of an historic site of national, State, or local significance, as determined by the Federal, State, or local officials having jurisdiction over the park, area, refuge, or site.)

☐ YES (Contact FRA)

☒ NO (Continue)

D. Is the proposal likely to require detailed evaluation of more than a few potential impacts?

☐ YES (Contact FRA)

☒ NO (Continue)

E. Is the proposal likely to generate intense public discussion or concern, even though it may be limited to a relatively small subset of the community?

☐ YES (Contact FRA)

☒ NO (Continue)

F. Is the proposal inconsistent with any Federal, State, or local law, regulation, ordinance, or Judicial or administrative determination relating to environmental protection?

☐ YES (Contact FRA)

☒ NO (Continue)

G. Is the proposal an integral part of a program of current Federally supported actions which, when considered separately, would not be classified as major actions, but when considered together may result in substantial impacts?

☐ YES (Contact FRA)

☒ NO (Continue)

If the answer to any of the questions B through G is "YES", contact the FRA to determine whether the proposal requires preparation of an Environmental Assessment.

H. Is the proposal consistent with one of the following potential Categorical Exclusions?

FRA Procedures for Considering Environmental Impacts, 64 FR 28545 (May 26, 1999)

☒ YES (Mark category and continue as indicated)

☐ NO (Contact FRA)

- ☐ Financial assistance or procurements solely for planning or design activities that do not commit the FRA or its applicants to a particular course of action affecting the environment. (*stop and submit to FRA*)
- ☐ State rail assistance grants for acquisition. (*Continue to Part III*)
- ☐ Operating assistance to a railroad to continue existing service or to increase service to meet demand, where the assistance will not result in a change in the effect on the environment. (*stop and submit to FRA*)
- ☐ Acquisition of existing railroad equipment, track and bridge structures, electrification, communication, signaling or security facilities, stations, maintenance of way and maintenance of equipment bases, and other existing railroad facilities or the right to use such facilities, for the purpose of conducting operations of a nature and at a level of use similar to those presently or previously existing on the subject properties. (*Complete Part III, Sections H, I, U, & V and submit to FRA*)
- ☐ Research, development and/or demonstration of advances in signal, communication and/or train control systems on existing rail lines provided that such research, development and/or demonstrations do not require the acquisition of substantial amounts of right-of-way, and do not substantially alter the traffic density [or operational] characteristics of the existing rail line. (*Continue to Part III*)
- ☐ Temporary replacement of an essential rail facility if repairs are commenced immediately after the occurrence of a natural disaster or catastrophic failure. (*Continue to Part III*)
- ☒ Changes in plans for a proposal for which an environmental document has been prepared, where the changes would not alter the environmental impacts of the action. (*Continue to Part III describing the full consequences of the changes only*)
- ☐ Maintenance of: existing railroad equipment; track and bridge structures; electrification, communication, signaling, or security facilities; stations; maintenance-of-way and maintenance-of-equipment bases; and other existing railroad-related facilities. ("Maintenance" means work, normally provided on a periodic basis, which does not change the existing character of the facility, and may include work characterized by other terms under specific FRA programs) (*Continue to Part III*)
- ☐ Financial assistance for the construction of minor loading and unloading facilities, provided that proposals are consistent with local zoning, do not involve the acquisition of a significant amount of land, and do not significantly alter the traffic density characteristics of existing rail or highway facilities. (*Continue to Part III*)
- ☐ Minor rail line additions including construction of side tracks, passing tracks, crossovers, short connections between existing rail lines, and new tracks within existing rail yards, provided that such additions are consistent with existing zoning, do not involve acquisition of a significant amount of right of way, and do not substantially alter the traffic density characteristics of the existing rail lines or rail facilities. (*Continue to Part III*)
- ☐ Improvements to existing facilities to service, inspect, or maintain rail passenger equipment, including expansion of existing buildings, the construction of new buildings and outdoor facilities, and the reconfiguration of yard tracks. (*Continue to Part III*)
- ☐ Environmental remediation through improvements to existing and former railroad track, infrastructure, stations and facilities, for the purpose of preventing or correcting environmental pollution of soil, air or water. (*Continue to Part III*)
- ☐ Replacement, reconstruction, or rehabilitation of an existing railroad bridge, including replacement with a culvert, that does not require the acquisition of a significant amount of right-of-way. (*Continue to Part III*)

III. **PROPOSAL INFORMATION FOR CATEGORICAL EXCLUSIONS**

Complete Part III unless indicated otherwise in Part II and submit to FRA.

For work to fixed facilities, maps displaying the following, as applicable, are required to be attached for FRA review:

- Proposal vicinity
- Proposal Site Plan indicating the USGS Quadrangle and Section
- Other Information as necessary to complete Part III

A. **Describe how the proposal satisfies the purpose and need identified in Part I:**

The need for the project is to meet the terms of an agreement

established amongst the Illinois Commerce Commission and the FRA-Office of Safety (provided in Appendix C) to change the design of 23 field to field crossings to utilize only locked gates with vehicle detection and 10 private grade crossings to utilize four-quadrant gates with vehicle detection. This project proposes to do exactly that - no other changes are proposed.

The purpose of the project, in addition to satisfying the multiparty agreement, is to enhance safety at private crossings. This purpose is satisfied at the ten private crossing locations by replacing the two-arm gate designs which were proposed by the Original Proposal with four-quadrant gates at private crossings. Four-quadrant gates with vehicle detection prevents vehicles from crossing rail tracks while the crossing arms are in the down position (which can be accomplished under the two-arm design by zig-zagging around the arms). Further, field to field farm crossings will utilize locked crossing gates with vehicle detection for farm use only, restricting access and providing other safety features.

- B. Location & Land Use:** *For fixed facilities, attach a map or diagram, at an appropriate scale, identifying the location of the proposal site and if applicable, the surrounding land uses and zoning of the site and surrounding properties. If the proposal would require many pages of maps or diagrams, include only a location map and contact FRA to determine if additional information is required. A map or diagram that identifies locations of critical resource areas, wetlands, potential historic sites, or sensitive noise receptors such as schools, hospitals, and residences should be included if there is the potential for impacts to these resources.*

Briefly describe the existing land use of the proposal site and surrounding properties and resources.

The gate locations are all on existing railroad right of way. Appendix A and B contains a map of the locations, as well as a table providing information on surrounding land uses and resources. Land uses adjacent to the 33 crossings include residential property, industrial areas and agricultural land.

- C. Historic Resources:** *If any cultural, historic, or archaeological resources are located in the immediate vicinity of the proposal, check and describe the resource(s) and then describe any potential effect of the proposal on the resource(s). Consultation with the SHPO is necessary when these resources are potentially affected.*

☐ Cultural:

☐ Historical:

☐ Archaeological:

Has consultation with the State Historic Preservation Officer occurred? If so, describe and attach relevant correspondence.

☒ Consultation with SHPO: The SHPO concurred on 9/6/2002 with there being no impact on historic resources resulting from the Original Project. Correspondence from the SHPO is attached in Appendix D.

Because the Dwight-St. Louis High Speed Rail Grade Crossing Enhancement Project will be built in existing railroad ROW, no physical impact to historical resources is expected. Further, because the proposed crossing improvements would be in the same location as the crossing improvements proposed in the Original Project, visual impacts to historical resources are unlikely, as the provision of these upgraded warning devices physically complement and mirror those warning devices

that were planned as part of the approved Original Proposal.

The SHPO will be provided the 30% preliminary engineering plans for all crossings and given the opportunity to comment on the proposed design as it relates to any historic resources.

D. Public Notification: *Briefly describe any public outreach efforts undertaken on behalf of the proposal, if any. Indicate opportunities the public has had to comment on the proposal (e.g., Board meetings, open houses, special hearings).*

For the overall Chicago to St. Louis High Speed Rail Program, public meetings have been conducted which welcomed public comment on the general progress of the overall program.

Public outreach efforts undertaken for the Original Proposal are described in Section 8: Comments and Coordination of the 2003 Chicago-St. Louis High-Speed Rail Project FEIS. As part of the Original Project, individual property owners have been contacted regarding the treatment of the crossings, and ICC worked with the Illinois Farm Bureau to develop the agreed-upon recommendations for grade crossing designs on farms and in rural areas which meet the needs of farmers.

Additionally, public scoping meetings took place for the Chicago to St. Louis Tier 1 Environmental Impact Statement at the following locations and dates: March 1, 2011: Joliet, IL; March 2, 2011: Bloomington-Normal, IL; March 3, 2011: Springfield, IL; March 8, 2011: Carlinville, IL; and March 9, 2011: Alton, IL. These public meetings did not explicitly address the scope of this Grade Crossings CE, however overall high-speed rail programmatic issues were covered.

For the Dwight-St. Louis High Speed Rail Grade Crossing Enhancement Project, stakeholders have been notified via a letter regarding the grade crossing diagnostic investigation related to this project. Stakeholders include county engineers and other municipal officials, as well as individual property owners of the 33 crossings. Property owners will be contacted individually before any construction would begin. Correspondence is in Appendix F, along with a list of the recipients.

The ROD specifically states that "Prior to the installation of gates at private crossings, coordination with the crossing owners will take place to address their concerns to the extent practicable." Further, the property owners of the field to field crossings will need some instruction on how to activate the revised gate design. The locked gate design was prepared in cooperation with the Illinois Farm Bureau

No outreach efforts to the general public are required for this project (a modification to the Original Proposal), as no new impacts will occur and no new right of way is required. Further, because the crossings where the design changes are proposed are private crossings, the public does not have access to many of them, though some private crossings exhibit public characteristics. However, per this project, all private crossings, including those with public roadway attributes, will receive the same grade crossing safety enhancement as public grade crossings in the Original Project.

Indicate prominent concerns expressed by agencies or the public regarding the proposal, if any.

The collaborative process of performing grade crossing diagnostics along the Chicago-St. Louis HSR Corridor began in 2010 and has included representatives of IDOT, the ICC and the UPRR. In addition, weekly conference calls to discuss design details and determine specifics of

installations has included all of the above-listed stakeholders, as well as the FRA. The consensus reached with regard to the private crossings has been that four-quadrant gates with vehicle-detection equipment are required. This approach will enhance the safety of each of these installations, as well as the overall project. Adopting these enhancements prior to construction of the improved private crossing installations is the most cost-effective approach.

There have been no public comments on this project. The 2004 ROD for the Original Proposal contains the following comment regarding farm-to-farm crossings: "In a letter dated February 28, 2003, the Illinois Farm Bureau stated that with the exception for the potential added difficulty in negotiating gated crossings with large farm equipment, the Preferred Alternative appears to pose little environmental impact to agriculture and generally satisfies the three key policies of their organization regarding the High-Speed Rail Project."

Farmers/landowners will be informed of proposed safety enhancements by letter prior to construction. The design for farm-to-farm crossings have been developed to accommodate the concerns of farmers as conveyed by the Illinois Farm Bureau. Primary concerns regarded longer advance warning for large farm equipment, a design feature that has been incorporated.

Individual property owners will also be notified if there will be any temporary closure of their private drives during construction.

E. Transportation: *Would the proposal have a detrimental effect on other railway operations or impact road traffic, or increase demand for parking?*

☒ No (continue) ☐ Yes, describe potential transportation, traffic, and parking impacts, and address capacity constraints and potential impacts to existing railroad and highway operations. Include maps or diagrams indicating any impacts and any proposed modifications to existing railways or roadways or parking facilities. Also, summarize any consultation that has occurred with other railroads or highway authorities whose operations this project will impact.

F. Noise and Vibration: *Are permanent noise or vibration impacts likely?*

☒ No (continue) ☐ Yes, describe how the proposal will involve noise impacts. If the proposal will result in a change in noise sources (number or speed of trains, stationary sources, etc.) and sensitive receptors (residences, hospitals, schools, parks, etc.) are present, apply screening distances for noise and vibration assessment found in FRA noise impact assessment guidance manual (and FTA's manual as needed) and compare proposal location with nearest receptor(s). If the screening distance is not achieved, attach a "General Noise and/or Vibration Assessment."

Noise ☐ Vibration ☐

As a result of the general assessment(s) are there noise or vibration impacts?

☐ No (continue) ☐ Yes (Describe and provide map identifying sensitive receptors):

G. Air Quality: *Does the proposal have the potential to increase concentrations of ambient criteria pollutants to levels that exceed the NAAQS, lead to the establishment of a new non-attainment area, or delay achievement of attainment?*

☒ No (continue) ☐ Yes, attach an emissions analysis for General Conformity regarding Carbon Monoxide (CO), Ozone (O₃), Particulate Matter (PM₁₀), Nitrous Oxides (NO_x), and Carbon Dioxide (CO₂), and include a hot spot analysis if indicated. Describe any substantial impacts from the proposal.

Is the proposal located in a Non-Attainment or Maintenance area?

☐ No (continue) ☐ Yes, for which of the following pollutants:

☐ Carbon Monoxide (CO) ☐ Ozone (O₃) ☐ Particulate Matter (PM₁₀)

H. Hazardous Materials: *Does the proposal involve the use or handling of hazardous materials?*

☒ No (continue) ☐ Yes, describe use and measures that will mitigate any potential for release and contamination.

I. Hazardous Waste: *If the proposal site is in a developed area or was previously developed or used for industrial or agricultural production, is it likely that hazardous materials will be encountered by undertaking the proposal?* (Prior to acquiring land or a facility with FRA funds, FRA must be consulted regarding the potential presence of hazardous materials)

☒ No, explain why not and describe the steps taken to determine that hazardous materials are not present on the proposal site and then continue to question I.

Potential hazardous material affected sites near the private grade crossings were identified. In March of 2011, Environmental Data Resources (EDR) performed an electronic search of local, state and federal environmental databases at grade crossing locations and provided an associated report of their findings. The databases and search distances were in accordance with U.S. EPA's All Appropriate Inquiries (AAI) regulations and ASTM E1527-05. Numerous sites were identified within these areas; the EDR search reports are included in Appendix E. Using the information in the EDR reports, the sites within critical databases that were proximate to the grade crossing locations were identified.

Sites selected for evaluation primarily focused on those included in the EDR reports in Appendix E. Although EDR reports identify the sites within the distances required by the All Appropriate Inquiries and ASTM standards, the evaluation was narrowed for some databases so that it focused on facilities within reduced distances that better reflect the common extent of contaminant movement associated with the likely contaminants. NPL sites were searched within a 1-mile buffer of the private grade crossings; CERCLIS sites were searched within 0.5 mile; and all other databases were evaluated within one-eighth mile of the grade crossings.

The EDR Reports summarize the facility name, location, and environmental databases that were evaluated for those facilities in proximity to the grade crossings. Each facility has an EDR map identification number that is referenced in the attached EDR reports. The findings for each grade crossing are detailed in Appendix E. When facilities were identified as being within the search distance, they were included and mapped in the EDR reports. Several facilities in the EDR reports are unmapped due to an incomplete address, an inaccurate address, or a street address that could not be accurately identified. Where possible, the locations of the unmapped sites were ascertained,

and evaluated the potential effect of these sites to the grade crossings.

The rehabilitation/reconstruction of the private grade crossings are expected to consist of shallow, near surface, excavation activities. The crossing rehabilitation/reconstruction project is not expected to introduce new contaminants to the environment.

If contaminants do exist in soil or groundwater in the vicinity of the grade crossings, no change in the movement of contaminants would be expected. It is anticipated that the project would not affect nor be affected by hazardous materials; however, wastes from unknown sites could be found and may need to be addressed in accordance with Federal and State Laws and Regulations. Furthermore, if regulated solid or hazardous wastes are found unexpectedly during construction activities, work will cease at the suspect site and the construction inspector will contact the appropriate environmental agencies. The environmental agency, UPRR, and the contractor will develop a plan for sampling, remediation if necessary, and continuing project construction.

Additionally, the Original Project 2003 FEIS included information regarding Preliminary Environmental Site Assessments (PESAs) for man-made hazards in the HSR project area conducted in accordance with A Manual for Conducting Preliminary Environmental Site Assessments for Illinois Department of Transportation (IDOT) Highway Projects. No subsurface investigation was authorized since it was unlikely that the testing would be valid by the time of construction.

A total of ten PESAs were conducted and documented in the Draft EIS; the sites were numbered from one to ten. Sites one through eight are now outside of the project area. Sites 9 and 10 are within the area of the Original Project. None of the 33 crossings is located in or near Site 10. One of the crossings is located in Site 9, and the other is located near it.

Site 9 is located in Madison County between St. Louis Avenue (MP 259.05) and Illinois Route 143/Madison Avenue (MP 262.90). Two gas stations were formerly located in the vicinity of the Illinois Route 143 crossing. When the property was vacated, the underground storage tanks (USTs) were removed; this site is not on the most recent UST list. Several CERCLIS and leaking underground storage tank (LUST) sites are also listed in this area.

No additional assessment is necessary at this time, as the project will be completed within existing railroad right-of-way.

Prior to construction, each site will be evaluated to determine if there have been any changes from conditions reported in the FEIS. If there has been a change, appropriate action will be taken, in accordance with requirements of the Illinois Department of Transportation, Bureau of Railroads.

Furthermore, if suspected contaminated soils are found during construction, appropriate measures will be taken to ensure the safety of both the construction workers and the general public.

☐ Yes, complete a Phase I site assessment and attach.

If a Phase I survey was completed, is a Phase II site assessment recommended?

☐ No (continue) ☐ Yes, describe the mitigation and clean-up measures that will be taken to remediate any hazardous materials present and what steps will be taken to ensure that the local community is protected from contamination during construction and operation of the proposal.

- J. Property Acquisition:** *Is property acquisition needed for the proposal?*
☒ No (continue) ☐ Yes, indicate whether the acquisition will result in relocation of businesses or individuals. **Note:** *To ensure eligibility for Federal participation, grantees may not acquire property with either local matching or Federal funds prior to completing the NEPA process and receiving written FRA concurrence in both the NEPA recommendation and property appraisals.*
- K. Community Disruption and Environmental Justice:** *Does the proposal present potentially disruptive impacts to adjacent communities?*
☒ No (continue) ☐ Yes, provide a socio-economic profile of the affected community. Indicate whether the proposal will have a disproportionately high and adverse effect on minority or low-income populations. Describe any potential adverse effects and any community resources likely to be impacted. Describe outreach efforts targeted specifically at minority or low-income populations.
- L. Impacts On Wetlands:** *Does the proposal temporarily or permanently impact wetlands or require alterations to streams or waterways?*
☒ No (continue) ☐ Yes, show wetlands and waters on the site map and classification. Describe the proposal's potential impact to on-site and adjacent wetlands and waters and attach any coordination with the State and US Army Corps of Engineers.

 See Appendix B for an environmental resources map for each crossing.
- M. Floodplain Impacts:** *Is the proposal located within the 100-year floodplain or are regulated floodways affected?*
☒ No (continue) ☐ Yes, describe the potential for impacts due to changes in floodplain capacity or water flow, if any. If impacts are likely, attach scale maps describing potential impacts and describe any coordination with regulatory entities.

 See Appendix B for an environmental resources map for each crossing.
- N. Water Quality:** *Are protected waters of special quality or concern, essential fish habitats, or protected drinking water resources present at or directly adjacent to the proposal site?*
☒ No (continue) ☐ Yes, describe water resource and the potential for impact from the proposal, and any coordination with regulatory entities.
- O. Navigable Waterways:** *Does the proposal cross or have effect on a navigable waterway?*
☒ No (continue) ☐ Yes, describe potential for impact and any coordination with US Coast Guard.
- P. Coastal Zones:** *Is the proposal in a designated coastal zone?*
☒ No (continue) ☐ Yes, describe coordination with the State regarding consistency with the coastal zone management plan and attach the State finding if available.
- Q. Prime and Unique Farmlands:** *Does the proposal involve the use of any prime or unique farmlands?*
☒ No (continue) ☐ Yes, describe potential for impact and any coordination with the Soil Conservation Service of the US Department of Agriculture.
- R. Ecologically Sensitive Areas And Endangered Species:** *Are any ecologically sensitive natural areas, designated wildlife or waterfowl refuges, or designated critical habitat areas*

(woodlands, prairies, wetlands, rivers, lakes, streams, and geological formations determined to be essential for the survival of a threatened or endangered species) within or directly adjacent to the proposal site?

☒ No (continue) ☐ Yes, describe them and the potential for impact. Describe any consultation with the State and the US Fish and Wildlife Service about the impacts to these natural areas and on threatened and endangered fauna and flora that may be affected. If required prepare a biological assessment and attach.

S. Safety And Security: *Are there safety or security concerns about the proposal?*

☒ No (continue) ☐ Yes, describe the safety or security concerns and the measures that would need to be taken to provide for the safe and secure operation of the proposal after its construction.

T. Construction Impacts: *Are major construction period impacts likely?*

☒ No (continue) ☐ Yes, describe the construction plan and identify impacts due to construction noise, utility disruption, debris and spoil disposal, and address air and water quality impacts, safety and security issues, and disruptions of traffic and access to property and attach scale maps as necessary.

The construction impacts resulting from the installation of the upgraded gates would be very similar to those of the gate designs included in the Original Proposal. A discussion of the construction phase impacts is in the signed FEIS dated January 2003, as follows:

Railroad Operations Impacts - Section 4.2.3

Vehicular Traffic Impacts - Section 4.3.5

Air Quality Impacts - Section 5.4.3.1

Noise Impacts - Section 5.5.4.1

Note that the discussions in the FEIS cover the construction-phase impacts for the entire HSR project, including private crossings, public crossings, track improvements, and overpass construction.

The 33 crossings will be built entirely within existing railroad ROW, and construction-phase disturbance is expected to take place entirely within existing railroad ROW. Furthermore, the traffic impacts for most of these private and farm crossings will be minimal, given the very low traffic levels on these crossings, some of which carry less than one vehicle per day.

U. Cumulative Impacts: *Are cumulative impacts likely?*

A "cumulative impact" is the impact on the environment that results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions. Cumulative impacts may include ecological (such as the effects on natural resources and on the components, structures, and functioning of affected ecosystems), aesthetic, historic, cultural, economic, social, or health, whether direct, indirect, or resulting from smaller actions that individually have no significant impact. Determining the cumulative environmental consequences of an action requires delineating the cause-and-effect relationships between the multiple actions and the resources, ecosystems, and human communities of concern.

☒ No (continue) ☐ Yes, describe the reasonably foreseeable:
(a) Direct impacts, which are caused by the action and occur at the same time and place.

(b) Indirect impacts, which are caused by the action and are later in time or farther removed in distance, but are still reasonably foreseeable. Indirect impacts may

include growth inducing effects and other effects related to induced changes in the pattern of land use, population density or growth rate, and related effects on air and water and other natural systems, including ecosystems.

- V. Related Federal, State, or Local Actions:** *Indicate whether the proposal requires any of the following actions (e.g., permits) by other Agencies and attach copies of relevant correspondence. It is not necessary to attach voluminous permit applications if a single cover Agency transmittal will indicate that a permit has been granted. Permitting issues can be described in the relevant resource discussion in sections B-S above.*

☐ **Section 106** *Historic and Culturally Significant Properties*

☐ **Section 401/404** *Wetlands and Water*

☐ **USCG 404** *Navigable Waterways*

☐ **Executive Orders** *Wetlands, Floodplains, Environmental Justice*

☐ **Clean Air Act** *Air Quality*

☐ **Endangered Species Act** *Threatened and Endangered Biological Resources*

☐ **Magnuson-Stevens Fishery Conservation and Management Act** *Essential Fish Habitat*

☐ **Safe Drinking Water Act**

☒ **Other State or Local Requirements** (Describe) The following plans/permits are also required: Soil Erosion and Sediment Control Plan per the Section 404 permit; county Engineering Site Development Permits (or equal) permits may be required; county stormwater permit may be required; A temporary construction entrance permit will be required from IDOT for construction access from the state highways.

- X. Mitigation:** Describe mitigation measures which address identified impacts and have been incorporated into the proposal, if any.

As noted above in Section I, each site will be evaluated prior to construction to determine if there have been any changes from conditions reported in the FEIS. If there has been a change, appropriate action will be taken, in accordance with requirements of the Illinois Department of Transportation, Bureau of Railroads. Furthermore, if suspected contaminated soils are found during construction, appropriate measures will be taken to ensure the safety of both the construction workers and the general public.

Other than precautions regarding the potential presence of contaminated soil, no mitigation is required for this project because no additional impacts are expected other than those presented in the FEIS approved in January 2003.

STATE OF ILLINOIS

ILLINOIS COMMERCE COMMISSION TRANSPORTATION DIVISION / RAIL SAFETY SECTION

Michael E. Stead

Rail Safety Program Administrator

March 17, 2010

To Whom It May Concern:

I am pleased to provide the enclosed document, entitled "Four Quadrant Gates in Illinois", which includes the history, requirements, and typical layouts for four quadrant gate installations at public highway-rail grade crossings in the State of Illinois.

The document serves to outline practices on previous four quadrant gate installations. In addition, the document is meant to provide guidance for the development of new installations, emerging technology, and modifications to train operations. As technological improvements or new installations are brought forward, it is this office's intention to update the document.

I trust that this information will be helpful. If you have any questions, or need additional information, please contact me at (217) 557-1285 or mstead@icc.illinois.gov.

Very truly yours,

A handwritten signature in black ink, appearing to read "Michael E. Stead".

Michael E. Stead
Rail Safety Program Administrator

Enclosure

Four Quadrant Gates in Illinois

History of Four Quadrant Gates in Illinois

While the earliest use of an active four quadrant gate system in the United States was 1952, the State of Illinois' modern experience with four quadrant gate systems began in 2001. During this time, the Rail Safety Section of the Illinois Commerce Commission (ICC) worked with the Illinois Department of Transportation (IDOT) and the Union Pacific Railroad Company (UP) to install four quadrant gate systems at 69 public highway-rail grade crossing locations; each system was equipped with vehicle presence detection. In most cases, the crossings were located in smaller towns or rural areas with a single track layout. The "Exit Gate Management System" (EGMS) developed by Railroad Controls Limited (RCL), and special inductance pre-formed presence detection loops developed by Reno AE, were utilized to provide vehicle detection and exit gate control equipment offering adaptability to varying conditions. Extensive design and testing was conducted by RCL, UP, and the ICC to insure a reliable system. As further confirmation of the performance, The Volpe National Transportation Systems Center (VOLPE), a part of the U.S. Department of Transportation's Research and Innovative Technology Administration, conducted an independent "Reliability Assessment Study." The study showed that "the four quadrant gate and vehicle detection equipment had a minimal direct impact on the frequency and duration of grade crossing malfunctions."

In 2003, the ICC partnered with CSX Transportation, IDOT, and the City of Chicago to complete a demonstration project with the installation of four quadrant gates systems at 10 double-track public highway-rail grade crossings located in an urban area. This project further demonstrated the solid performance and low maintenance needs associated with EGMS and in-pavement vehicle detection.

Currently, the ICC is partnering with the BNSF Railway and the Village of Hinsdale on a demonstration project to install a four quadrant gate system at a triple-track public highway-rail crossing that has more than 140 trains per day. While the EGMS and loop detection have performed very well, with this train volume, a critical commuter rail schedule, and an urban environment with the potential for highway traffic queuing, a back-up vehicle detection system is being pursued.

Many items remain consistent with what was originally developed in 2001. However, as new locations, applications, and requirements are identified, the ICC's Rail Safety Section is committed to revisiting the operating criteria and typical design to continue to allow for safe installations. The following information includes the latest requirements of the ICC's Rail Safety Section for the installation of four quadrant gates systems at public highway-rail grade crossings in the State of Illinois.

Four Quadrant Gate Criteria

Four quadrant gate systems should consist of front lights and back lights, as well as bells on each signal mast. Crossing activation shall result in all lights activating simultaneously. The system shall also include a drive mechanism and fully retro-reflectorized red and white striped gate arms with lights, which in the down position, extend individually across the approaching and exit lanes of highway traffic. Gate arm design, colors, and lighting requirements should be in accordance with the standards contained in Section 8 of the Manual on Uniform Traffic Control Devices (MUTCD).

All four quadrant gate systems shall be equipped with vehicle detection capabilities to prevent vehicles from becoming trapped between the entrance and exit gates. The vehicle detection system should consist of pre-formed inductive loops with self-test capabilities, located under the surface of the roadway and adjacent to the crossing surface(s) as shown on the attached typical layouts. To reduce the detection area, the entrance and exit gates should generally be installed parallel to the tracks. All four quadrant gate systems should also be equipped with remote monitoring and alarm capabilities.

Dynamic Mode with Vehicle Detection (Inductive Detection Loops & Ability to Utilize Back-up Detection)

1. The gate arms for the entrance lanes of traffic shall start their downward motion not less than 3 seconds after the flashing-light signals start to operate.
2. Exit gates shall be designed to fail in "up" position.
3. All four quadrant gate systems shall be designed to utilize vertical and horizontal gate contacts.
4. All systems shall have the capability to apply a programmable vehicle detector call delay on all detectors when all gates are horizontal; as a programmable feature, all systems shall have the ability to ignore an individual detector once all gates are horizontal.
5. All systems shall have the capability to extend vehicle calls.
6. All systems shall be designed such that each individual detector loop will only raise its associated exit gate. And, after a programmable timer expires, the opposite exit gate should also rise.
7. Normally, vehicle detection shall be disabled when the train enters the island circuit and exit gates should lower, or remain lowered.
8. In the event there is a stopped train near the island circuit (crossing not active), the system shall delay the exit gates, through the use of a programmable timer, if a vehicle call is present and the train proceeds into the island circuit.
9. All systems shall be designed such that if the entrance gate does not reach its horizontal position within a programmable time, the associated exit gates should raise.
10. All gate arms shall remain down as long as the train occupies the highway-rail crossing.
11. When the train clears the crossing, and no other train is detected, exit and entrance gates shall ascend to their upright position in not more than 12 seconds, following which the flashing lights and the lights on the gate arms should cease operation.
12. With no trains present within the approach circuits, if an exit gate is not vertical the entrance gates shall lower to horizontal.
13. Exit gates shall descend after entrance gates move off vertical contact unless a vehicle is detected within the crossing zone. All systems shall also provide a programmable timer to provide additional exit gate delay time, as necessary.
14. When required, the four quadrant gate system shall have the capability for a back-up detection system. The back-up detection shall have self-test capabilities. With the presence of a failed detector loop, all remaining healthy detector loops should remain active, and the system shall be manually cutover to the back-up detection. The system shall also have the ability to automatically utilize the back-up vehicle detection in lieu of the failed detector. The failed detector shall result in an alarm. In addition, the system shall have the option, as user programmed, to apply a gate delay to the exit gates in the event of a detector failure, even if gate delay is not utilized during normal operation when all primary detectors are functioning.

Four Quadrant Gate Special Considerations

All four quadrant gates systems shall address the type of rail operations present, maintenance protocol, pedestrian utilization, interface with other railroad equipment and other special considerations.

High Speed Rail Corridors

On High Speed Rail Corridors where passenger train will operate at speeds between 80 mph and 110 mph, all four quadrant gate systems shall be equipped with a presence detection system that is interfaced with the Positive Train Control System (PTC), per the Federal Railroad Administration's "Highway-Rail Crossing Guidelines for High-Speed Passenger Rail" published November 2009. Commands to reduce train speed to restricted speed (20 mph) shall be transmitted to passenger trains through the PTC system when any of the following conditions are **not** met:

1. Confirmation the warning system health is ok.
2. Confirmation the Exit Gate Management System (EGMS) health is ok.
3. Confirmation that all crossing gates are in a fully-lowered position and no vehicles are detected by the presence/intrusion detection system.

The PTC system command shall be made in time for passenger trains to reduce speed to restricted speed (i.e. approximately 20 mph) or stop before reaching the crossing. Freight train operations in the corridor will not be governed by this information.

Pedestrians

As part of the necessary Diagnostic Review, pedestrian warning devices and/or other treatments shall be reviewed. A separate pedestrian gate is necessary for the exit side of the crossing.

Detector Loop Layout

Prior to ordering the detector loops, a field layout should be completed with the ICC and Railroad to finalize dimensions, lead-in, and home-run cable lengths. The current induction loop utilized is Reno A&E PLC for Railway Applications, and the exit gate control is completed by the "Exit Gate Management System" now owned by Invensys Rail (fka Safetran).

TALKING POINTS ON IL HSR GRADE CROSSING PROPOSALS

Conference Call

March 11, 2011

4 Quadrant Gates

- Concerned about 2 different activations times
 - “normal” time for trains under 79 mph – CWT
 - “extended” time for HSR - ~90 seconds
 - Driver expectation
- ITCS activation
 - Radio based vs. cab signals as in MI
 - Must be approved under FRA processor-based train control rule (49 CFR Part 236, Subpart H)

Farm to Farm Crossings

- Definition – is this strictly field to field or does it include access to field from public roadways?
- FRA is not in favor of using flashing lights and gates for non-standard operation
- Other options?

Private Crossings

- FRA is in favor of 4 quadrant gates

Crossing Closure

- How actively will closures be pursued?

IDOT Grade Crossing Treatments

Illinois Department of Transportation

Bureau of Railroads, Room 339

2300 South Dirksen Parkway / Springfield, Illinois / 62764

December 23, 2010

Wendy L. Messenger
Office of Railroad Policy & Development
Federal Railroad Administration
1200 New Jersey Avenue, SE
Washington, DC 20590

SUBJECT: Chicago to St. Louis HSR Grade Crossing Treatments

Dear Mrs. Messenger:

The Illinois Department of Transportation (IDOT), in conjunction with the Union Pacific Railroad, Amtrak and the Illinois Commerce Commission, have completed a collaborative review process that defines proposed treatments for the various types of HSR at-grade roadway crossings within the Chicago – St. Louis corridor. Additionally, this process takes into account the proposed treatments outlined in the 2003 EIS and the 2004 ROD.

Attached please find a crossing treatment concurrence report and an examples exhibit your review and concurrence which is the result of the above mentioned review process. We ask that FRA support the proposed method outlined for treatments of the HSR portion of the entire corridor as documented in the concurrence report

Please note that the report does not result in a final recommendation to treat private crossings. IDOT respectfully requests FRA's direction in this matter.

If you have any questions or need additional information, please feel free to contact me.

Respectfully,

A handwritten signature in blue ink that reads "Michael R. Garcia".

Michael R. Garcia, P. E.

Crossing Treatment Definition Confirmation Request

CHICAGO–ST. LOUIS CORRIDOR
HIGH-SPEED INTERCITY PASSENGER
RAIL SERVICE

CORRIDOR IMPROVEMENT PROGRAM
22 December 2010

**ILLINOIS HIGH SPEED INTERCITY PASSENGER RAIL
CROSSING TREATMENT DEFINITION CONFIRMATION REQUEST
CHICAGO-ST. LOUIS
CORRIDOR IMPROVEMENT PROGRAM**

December 22, 2010

I. Background

The State of Illinois (State) and the Federal Railroad Administration (FRA) are about to finalize an amendment to Grant/Cooperative Agreement (Agreement), number FR-HSR-0015-11-01-00, for the construction of the overall Corridor Improvement Program. The Corridor Improvement Program will allow for high-speed passenger rail service at a maximum speed of 110 mph on the Corridor, with a reduction in trip time. The improved trip time will enhance the marketability of intercity passenger rail service and will support a more regionally and modally balanced transportation system. It will also benefit existing and future medium- and long-distance Amtrak service between Chicago, Illinois and St. Louis, Missouri. The State, Amtrak and the Union Pacific Railroad (UPRR) will partner to implement the Corridor service improvements.

The initial, general description of crossings was included both in the EIS and 2004 Record of Decision (ROD). The proposed methods to provide protection to each type of crossing within the project limits are summarized in this document. These suggested crossing treatment definitions are the result of a collaborative effort between the Illinois Department of Transportation, the Illinois Commerce Commission, the Union Pacific Railroad and Amtrak (Group), and are based on their collective agreement.

II. Description of Work

A. Public Crossings

- Treatment - All public crossings will be equipped with four quad gates, vehicle detector loops and hazard feedback to high speed trains.
- **Proposed Definition - The EIS does not provide for the interconnection of crossing conditions with the rail vehicle. In the case of train operation above 79 MPH on the Corridor, the Group requests that hazard feedback be provided to the train operator to allow for appropriate action. The Group proposes that the ITCS system provide this feedback as further depicted in the power point document (which summarized the ROD and EIS crossing requirements) used by the Group during discussions on crossings, attached hereto; in particular, see examples 15, 16 and 17 of the power point document.**

B. Pedestrian Gates

- Treatment - Pedestrian gates will be included at all roadways and walkways. Each will be equipped with pedestrian escape systems.
- **Proposed Definition - Pedestrian gate treatment was not defined in the EIS or the ROD. The Group proposes that each pedestrian pathway crossing that is registered with an DOT Number or a sidewalk at an existing roadway crossing be equipped with an automatic gate warning system coupled with an emergency exit system as outlined in examples 6, 7 and 8 of the power point document.**

**ILLINOIS HIGH SPEED INTERCITY PASSENGER RAIL
CROSSING TREATMENT DEFINITION CONFIRMATION REQUEST
CHICAGO-ST. LOUIS
CORRIDOR IMPROVEMENT PROGRAM**

C. Farm to Farm Private Crossings

- Treatment - Farm to farm private crossings will be equipped with a gate down system, including hazard feedback to high speed trains but without exit management system for stuck vehicles.
- **Proposed Definition-** The current EIS requires a simple two gate system for field to field crossing. In order to meet FRA's recommendation of a 'locking gate system' for such crossings, the Group proposes to install an active gate system that has the characteristics of a locked, reduced-access gate system that would more be in line with the FRA recommendation. This system is described in examples 1, 2, 3, 4, and 5 of the power point document.

D. Private Only Crossings

- Treatment - Private only crossings will be either equipped with a two gate system with vehicle detector loops and hazard feedback to high speed trains, or four quad gates with vehicle detector loops and hazard feedback to high speed trains.
- **Proposed Definition -** The Group could not reach agreement on the manner to provide crossing warning for private crossings and therefore have provided the two suggested approaches for the FRA to review and comment upon. It requests that FRA provide guidance on which recommendation would best satisfy the FRA's desires on this type of crossing. The UPRR has indicated that the use of a two gate system with hazard warning system is adequate for the protection at all private crossings within the corridor. This version is shown in the examples (numbers 9, 10 and 11 of the power point presentation attached hereto). The Illinois Commerce Commission, while understanding that it has no jurisdiction for the protection at private crossings, stated that it prefers that all motorists be provided with the same presentation at all crossings within the Corridor. The ICC proposes that a four quadrant system be installed as indicated in examples 12, 13 and 14 of the power point document.

The Group requests that the FRA provide direction on private only crossings.

E. Private Crossings with Public Roadway Attributes

- Treatment – The ROD states that private crossings can be treated as private crossings even if they have public roadway attributes.
- **Proposed Definition –** In accordance with the FRA guidelines established subsequent to the issuance of the EIS and the ROD, FRA has directed that all private crossings that have public roadway attributes be treated as if each was a public roadway. Therefore each will be so treated

F. Crossing Closures

- Treatment - No crossing closures will take place without full agreement with all responsible stakeholders for that roadway. Include the possibility to redirect signal and or crossing

**ILLINOIS HIGH SPEED INTERCITY PASSENGER RAIL
CROSSING TREATMENT DEFINITION CONFIRMATION REQUEST
CHICAGO-ST. LOUIS
CORRIDOR IMPROVEMENT PROGRAM**

modification funding on a case by case basis for crossing closure if approach is agreed by all parties.

- **Proposed Definition -** The closure of crossings is a sensitive subject that involves the agreement of the interested parties. Therefore, to address the concerns of the private and public owners and the general public, the Group suggests that a cost benefit analysis be conducted to determine whether a crossing should be mitigated (i.e. closed, grade separated, re-routed, etc.) or treated (install crossing equipment). If the mitigation costs are within the value of the treatment costs, it will be in the best interest of overall safety to use the construction costs for such mitigation. The cost benefit analysis will be based on an analytical model created by IDOT. All funded property acquisitions will comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended and applicable State of Illinois real estate acquisition law.

G. Roadway Profile Adjustments

- Treatment - Roadway profile adjustments both on the direct approach to the crossing and possibility on adjacent roadways were not discussed in the ROD.
- **Proposed Definition-** Roadway pavement adjustments will be required to ensure that all vehicle users have proper approach and to allow for safe handling of each vehicle at the crossings. It will be necessary in some cases to modify grade and or width on roadways within the near area of the crossing. In some cases the adjacent roadways could require modifications to tie into the primary roadway to meet current MUTCD/IDOT/ICC regulations.

H. Short Vehicle Storage

- Treatment - Short Vehicle Storage Concerns may require the addition of Roadway Traffic Control including Traffic Signal and Railroad Signal Interconnect.
- **Proposed Definition-** No provision for the modification or addition of traffic roadway control was indicated in the EIS/ROD. The addition of traffic control will be a necessary component for handling issues such as short storage as will be encountered at many locations within the corridor. In addition at many urban crossings, the proper control of traffic is an essential component of the handling of motor vehicles at the roadways adjacent to crossings. In most cases the interconnection of traffic controls adjacent to most crossings will be required.

IDOT requests that FRA review these items and provide concurrence to each item listed and to include these actions as part of the overall project.

CROSSING TREATMENT MODIFICATION REQUEST FOR CHICAGO-ST. LOUIS

PROPOSED CROSSING TREATMENT DEFINITION EXAMPLES 22 DECEMBER 2010

C-17

TABLE OF CONTENTS

- Field to Field Crossing: Examples 1, 2, 3, 4, and 5.
- Public Crossings with Pedestrian Gate Escape System: Examples 6, 7 and 8
- Private Crossing:
 - Option 1: (2 Quad Gates) – Examples 9, 10 and 11.
 - Option 2: (4 Quad Gates) – Examples 12, 13 and 14
- Public Crossing and Private with Public Characteristics: Examples 15, 16, and 17.

Example 1 – Field to Field Crossing General Overview (No Train Approaching)

NOTE 1: THE 'CROSSING REQUEST' AND 'CROSSING CANCEL' PUSH BUTTONS ARE ONLY FUNCTIONAL WHEN THE 'XING AVAILABLE WHEN LIT' INDICATION LAMP IS LIT.

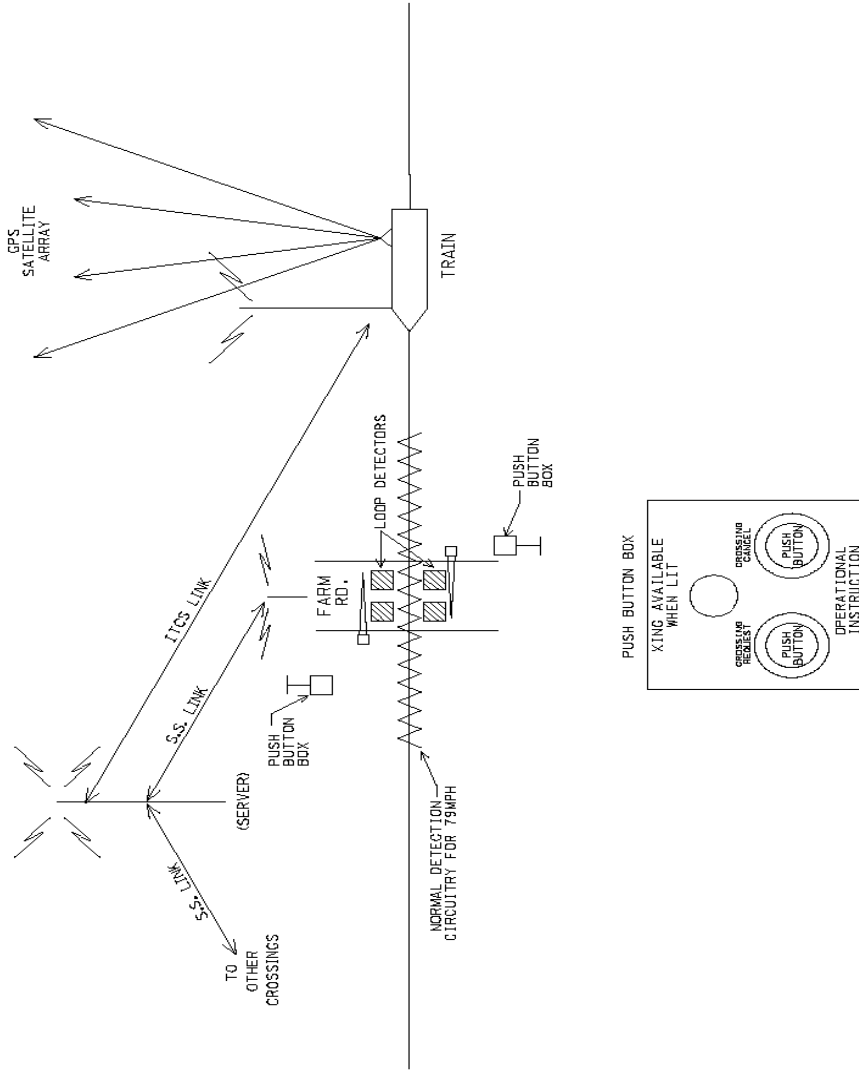

1. THE FARM CROSSING GATES ARE NORMALLY IN THE HORIZONTAL POSITION WITH A SINGLE POST FOLDING SUPPORT LEG. THE GATE ARM LIGHTS AND MAST MOUNT MOUNTED FLASHING LIGHTS WILL USE LED BULBS.
 - A. THE GATE ARMS WILL COVER 75% OF TOTAL ROADWAY WIDTH.
 - B. THE GATE MASTS WILL BE PLACED 10'6" FROM THE EDGE OF ROADWAY AS MEASURED AT A RIGHT ANGLE TO THE ROADWAY.
 - C. AN OUTWARD FACING INFORMATIONAL SIGN WILL BE MOUNTED ON EACH GATE WITH LETTERING AND MESSAGE WORDING TO BE DETERMINED, INDICATING THAT THE CROSSING IS NOT A PUBLIC ROADWAY. THE SIGN SHOULD NOT EXCEED 9 INCHES TALL BY 54 INCHES LONG.
2. THE APPROVED USER WILL HAVE A PUSH BUTTON INTERFACE.
 - . EACH FIELD TO FIELD CROSSING WILL HAVE TWO PUSH BUTTON LOCATIONS, ON OPPOSITE SIDES OF THE TRACK.
 - A. EACH BOX WILL CONSIST OF ONE LIGHT AND TWO PUSH BUTTONS WITH MOMENTARY CLOSE CONTACTS.
 - B. THE INDICATION LIGHT WILL BE NORMALLY LIT WHEN THE CROSSING IS READY AND ABLE TO REGISTER A REQUEST FOR OPERATION VIA THE PUSH BUTTON.
 - C. IF THE INDICATION LIGHT IS NOT LIT, THE CROSSING WILL NOT ALLOW A REQUEST TO BE MADE.
 - D. TO PLACE THE CROSSING INTO SERVICE, THE 'CROSSING REQUEST' BUTTON WILL BE MOMENTARILY PUSHED, AND TO CANCEL A REQUEST THE 'CROSSING CANCEL' BUTTON WILL BE MOMENTARILY PUSHED.

Crossing Operation When Not Requested By Farm User

(Train Approaching and Warning Devices Are Not

Illinois Department
of Transportation

1. WHEN A TRAIN IS ON THE APPROACH TO CROSSING AND WARNING DEVICES ARE NOT YET ACTIVE. THE 'XING AVAILABLE WHEN LIT' LIGHT WILL GO OUT AND THE USER WILL BE UNABLE TO ACTIVATE THE CROSSING.

NOTE 1: THE 'CROSSING REQUEST' AND 'CROSSING CANCEL' PUSH BUTTONS ARE ONLY FUNCTIONAL WHEN THE 'XING AVAILABLE WHEN LIT' INDICATION LAMP IS LIT.

NOTE 2: TRAINS NOT USING ITC SYSTEM WILL UTILIZE STANDARD CROSSING WARNING CIRCUITRY. DURING A SLOWER THAN 80 MPH MOVEMENT, ALL OTHER FUNCTIONALITY WILL OPERATE AS DESCRIBED IN EXAMPLE 1.

Example 3 – Field to Field

Crossing Operation When Not Requested By Farm User

(Train Approaching Warning Devices Activated)

1. WHEN IN THE NORMAL ("NOT REQUESTED" STATE) AND A TRAIN IS DETECTED BY THE CROSSING WARNING SYSTEM, THE GATES WILL REMAIN IN THE HORIZONTAL POSITION AND ONLY THE MAST LIGHTS, GATE LIGHTS, AND BELL WILL FUNCTION.
2. WHEN A TRAIN HAS COMPLETED A MOVEMENT ACROSS THE CROSSING, THE GATES WILL REMAIN IN THE HORIZONTAL POSITION. ALL LIGHTS AND BELL WILL STOP FUNCTIONING.
3. IF A METALLIC OBJECT IS DETECTED OVER ANY OR ALL OF THE VEHICLE PRESENCE DETECTION LOOPS AND A HIGH SPEED TRAIN IN ON THE APPROACH, A NOTICE OF THAT CONDITION WILL BE SENT VIA THE ITC'S LINK CAUSING THE APPROACHING TRAIN TO REDUCE SPEED. THESE CROSSINGS WILL NOT HAVE AN EXIT MANAGEMENT SYSTEM FOR STUCK VEHICLES.

NOTE 1: THE 'CROSSING REQUEST' AND 'CROSSING CANCEL' PUSH BUTTONS ARE ONLY FUNCTIONAL WHEN THE 'XING AVAILABLE WHEN LIT' INDICATION LAMP IS LIT.

NOTE 2: TRAINS NOT USING ITC'S SYSTEM WILL UTILIZE STANDARD CROSSING WARNING CIRCUITRY. DURING A SLOWER THAN 80 MPH MOVEMENT ALL OTHER FUNCTIONALITY WILL OPERATE AS DESCRIBED IN EXAMPLE 1.

Example 4 – Field to Field Farm User Requesting Crossing to Operate in Farm User Mode

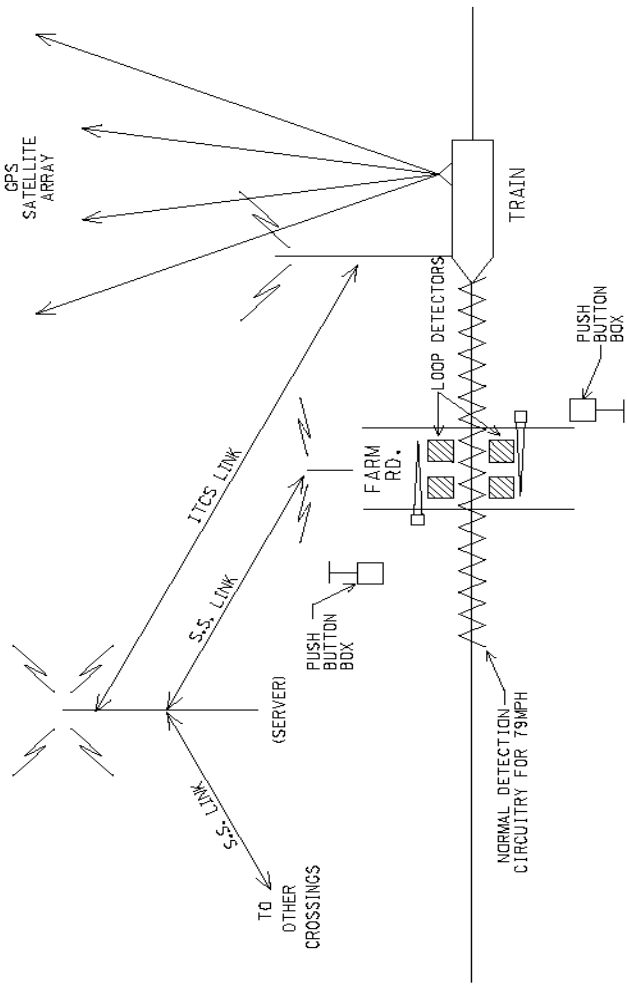

(No Train Approaching)

1. ONCE THE 'CROSSING REQUEST' BUTTON IS MOMENTARILY PUSHED, AND IF THE INDICATION LAMP IS LIT, THE GATES WILL OPERATE TO THE VERTICAL POSITION AND BEGIN TO FUNCTION AS A NORMAL CROSSING FOR A PERIOD OF NO LONGER THAN 8 HOURS.
2. DURING THIS 8 HOUR PERIOD THE MAST MOUNTED FLASHING LIGHTS, GATE LIGHTS, AND THE BELL WILL CONTINUE TO OPERATE ON TRAIN DETECTION. THE GATES WILL OPERATE AS NORMAL CROSSING GATES ON TRAIN APPROACH AND DETECTION.
3. AFTER THE 8 HOUR OPERATIONAL TIME HAS EXPIRED, OR IF THE USER ELECTS TO CANCEL THE REQUEST VIA THE CANCEL BUTTON, THE GATES WILL RETURN TO THE HORIZONTAL POSITION. THE MAST MOUNTED FLASHING LIGHTS, GATE LIGHTS, AND BELL WILL OPERATE TO WARN OF THIS GATE ARM MOVEMENT EVEN IN THE ABSENCE OF TRAIN MOVEMENT.

NOTE 1: THE 'CROSSING REQUEST' AND 'CROSSING CANCEL' PUSH BUTTONS ARE ONLY FUNCTIONAL WHEN THE 'XING AVAILABLE WHEN LIT' INDICATION LAMP IS LIT.

Example 5 – Field to Field Crossing in Farm User Mode (Warning System Activated By Train Approaching)

1. WHEN TRAIN APPROACH DETECTION IS REGISTERED, THE MAST MOUNTED FLASHING LIGHTS, GATE LIGHTS, AND BELL WILL OPERATE FOR 15 SECONDS PRIOR TO GATE ARM LOWERING. THIS LONGER TIME THAN NORMAL IS TO ALLOW SLOWER AND LARGER FARM EQUIPMENT TO CLEAR THE CROSSING RAIL AREA.
2. ONCE A TRAIN MOVEMENT HAS CLEARED THE ROADWAY PORTION OF THE CROSSING, THE GATES WILL REVERT TO THE VERTICAL POSITION AND THE MAST MOUNTED FLASHING LIGHTS, GATE ARM LIGHTS, AND BELL WILL STOP OPERATING. THE 8 HOUR OPERATIONAL TIME FRAME WILL NOT BE EXTENDED OR REDUCED BY TRAIN OPERATIONS.
3. IF A METALLIC OBJECT IS DETECTED OVER ANY OR ALL OF THE VEHICLE PRESENCE DETECTION LOOPS AND A HIGH SPEED TRAIN IN ON THE APPROACH, A NOTICE OF THAT CONDITION WILL BE SENT VIA THE ITCS LINK CAUSING THE APPROACHING TRAIN TO REDUCE SPEED. THESE CROSSINGS WILL NOT HAVE AN EXIT MANAGEMENT SYSTEM FOR STUCK VEHICLES.

NOTE 1: THE 'CROSSING REQUEST' AND 'CROSSING CANCEL' PUSH BUTTONS ARE ONLY FUNCTIONAL WHEN THE 'XING AVAILABLE WHEN LIT' INDICATION LAMP IS LIT.

NOTE 2: TRAINS NOT USING ITCS SYSTEM WILL UTILIZE STANDARD CROSSING WARNING CIRCUITRY. DURING A SLOWER THAN 80 MPH MOVEMENT ALL OTHER FUNCTIONALITY WILL OPERATE AS DESCRIBED IN EXAMPLE 1.

Example 6 – Public Crossing With Pedestrian Gates with Escape System

General Overview

1. PUBLIC CROSSINGS WILL BE EQUIPPED WITH FOUR QUAD GATES WITH VEHICLE DETECTOR LOOPS AND HAZARD FEEDBACK TO HIGH SPEED TRAINS. PEDESTRIAN GATES WILL BE INCLUDED AT ALL SIDEWALKS AND PATHWAYS WITH AN ASSIGNED AAR/DOT NUMBER. EACH WILL BE EQUIPPED WITH PEDESTRIAN ESCAPE SYSTEMS. (EXAMPLE SHOWN BELOW)
 - A. THE GATE ARM LIGHTS AND MAST MOUNTED FLASHING LIGHTS WILL USE LED BULBS. PEDESTRIAN GATES WILL NOT HAVE GATE ARM LIGHTS.
 - B. WARNING SYSTEM WILL BE ACTIVATED EITHER BY CONVENTIONAL CROSSING STARTS FOR TRAINS TRAVELING AT SPEEDS LESS THAN 80MPH OR ITCS FOR OPERATING SPEEDS BETWEEN 80MPH AND 110MPH.

Escape System Example

Example 7 - Public Crossing With Pedestrian Gates With Escape System High Speed Train Operation (ITCS)

1. WHEN HIGH SPEED TRAINS ARE APPROACHING CROSSING ITCS WILL START CROSSING WARNING EQUIPMENT.
2. AN EXTENDED WARNING TIME WILL BE DEVELOPED, TO ALLOW FOR SAFE STOPPING DISTANCE FOR HIGH SPEED PASSENGER TRAINS (80MPH TO 110 MPH). THIS TIME IS YET TO BE DETERMINED, ALTHOUGH IT WILL BE A MINIMUM OF 80 SECONDS.
3. IF PASSENGER TRAINS EQUIPPED WITH ITCS AND ARE OPERATED AT A SPEED OF LESS THAN 80MPH, THE ITCS SYSTEM WILL BE UTILIZED FOR THE CROSSING FAULT REPORTING FUNCTION AND TO PROVIDE FOR CROSSING FEEDBACK TO THE TRAIN.
4. IF A METALLIC OBJECT IS DETECTED OVER ANY OR ALL OF THE VEHICLE PRESENCE DETECTION LOOPS AND A HIGH SPEED TRAIN IN ON THE APPROACH, A NOTICE OF THAT CONDITION WILL BE SENT VIA THE ITCS LINK CAUSING THE APPROACHING TRAIN TO REDUCE SPEED.

Example 8 - Public Crossing With Pedestrian Gates With Escape System Train Operation (Conventional Start)

1. THE CONSTANT WARNING TIME CIRCUITS WILL PROVIDE A CONVENTIONAL OPERATION BASED ON THE MAXIMUM SPEED OF ALL NON-ITCS EQUIPMENT, NOT TO EXCEED 79MPH. THE DISTANCE FROM THE ISLAND PORTION OF THE CROSSING AND THE MINIMUM STARTING TIME IS YET TO BE DETERMINED.

C-26

Example 9 – Private Crossing

Option #1 (2 Quad Gates)

General Overview

1. PRIVATE CROSSINGS WITHOUT PUBLIC CHARACTERISTICS
WILL BE EQUIPPED WITH A TWO QUAD GATE SYSTEM WITH
VEHICLE DETECTOR LOOPS AND HAZARD FEEDBACK TO
HIGH SPEED TRAINS.
 - A. THE GATE ARM LIGHTS AND MAST MOUNTED FLASHING LIGHTS
WILL USE LED BULBS
 - B. WARNING SYSTEM WILL BE ACTIVATED EITHER BY
CONVENTIONAL CROSSING STARTS FOR TRAINS
TRAVELING AT SPEEDS LESS THAN 80MPH OR ITCS FOR
OPERATING SPEEDS BETWEEN 80MPH AND 110MPH.

Example 10 – Private Crossing Option #1 (2 Quad Gates) High Speed Train Operation (ITCS)

1. WHEN HIGH SPEED TRAINS ARE APPROACHING CROSSING ITCS WILL START CROSSING WARNING EQUIPMENT.
2. AN EXTENDED WARNING TIME WILL BE DEVELOPED, TO ALLOW FOR SAFE STOPPING DISTANCE FOR HIGH SPEED PASSENGER TRAINS. THIS TIME IS YET TO BE DETERMINED (MINIMUM WARNING TIME 80 SECONDS)
3. IF PASSENGER TRAINS EQUIPPED WITH ITCS AND ARE OPERATED AT A SPEED OF LESS THAN 80MPH, THE ITCS SYSTEM WILL BE UTILIZED FOR THE CROSSING FAULT REPORTING FUNCTION AND TO PROVIDE FOR CROSSING FEEDBACK TO THE TRAIN.

C-28

Example 12 – Private Crossing Option #2 (4 Quad Gates) General Overview

1. PRIVATE CROSSINGS WITHOUT PUBLIC CHARACTERISTICS WILL BE EQUIPPED WITH FOUR QUAD GATES WITH VEHICLE DETECTOR LOOPS AND HAZARD FEEDBACK TO HIGH SPEED TRAINS.
 - A. THE GATE ARM LIGHTS AND MAST MOUNTED FLASHING LIGHTS WILL USE LED BULBS
 - B. WARNING SYSTEM WILL BE ACTIVATED EITHER BY CONVENTIONAL CROSSING STARTS FOR TRAINS TRAVELING AT SPEEDS LESS THAN 80MPH OR ITCS FOR OPERATING SPEEDS BETWEEN 80MPH AND 110MPH.

C-30

Example 13 – Private Crossing Option #2 (4 Quad Gates) High Speed Train Operation (ITCS)

1. WHEN HIGH SPEED TRAINS ARE APPROACHING CROSSING ITCS WILL START CROSSING WARNING EQUIPMENT.
2. AN EXTENDED WARNING TIME WILL BE DEVELOPED, TO ALLOW FOR SAFE STOPPING DISTANCE FOR HIGH SPEED PASSENGER TRAINS. THIS TIME IS YET TO BE DETERMINED. (MINIMUM WARNING TIME 80 SECONDS)
3. IF PASSENGER TRAINS EQUIPPED WITH ITCS AND ARE OPERATED AT A SPEED OF LESS THAN 80MPH, THE ITCS SYSTEM WILL BE UTILIZED FOR THE CROSSING FAULT REPORTING FUNCTION AND TO PROVIDE FOR CROSSING FEEDBACK TO THE TRAIN.

C-31

Example 14 – Private Crossing Option #2 (4 Quad Gates) Train Operation (Conventional Start)

1. THE CONSTANT WARNING TIME CIRCUITS WILL PROVIDE A CONVENTIONAL OPERATION BASED ON THE MAXIMUM SPEED OF ALL NON-ITCS EQUIPMENT, NOT TO EXCEED 79MPH. THE DISTANCE FROM THE ISLAND PORTION OF THE CROSSING AND THE MINIMUM STARTING TIME IS YET TO BE DETERMINED.

C-32

Example 15 – Public Crossings & Private with Public Roadway Attributes (4 Quad Gates)

General Overview

1. PUBLIC CROSSINGS WILL BE EQUIPPED WITH FOUR QUAD GATES WITH VEHICLE DETECTOR LOOPS AND HAZARD FEEDBACK TO HIGH SPEED TRAINS.
 - A. THE GATE ARM LIGHTS AND MAST MOUNTED FLASHING LIGHTS WILL USE LED BULBS
 - B. WARNING SYSTEM WILL BE ACTIVATED EITHER BY CONVENTIONAL CROSSING STARTS FOR TRAINS TRAVELING AT SPEEDS LESS THAN 80MPH OR ITCS FOR OPERATING SPEEDS BETWEEN 80MPH AND 110MPH.

C-33

Example 16 – Public Crossings & Private with Public Roadway Attributes

High Speed Train Operation (ITCS)

1. WHEN HIGH SPEED TRAINS ARE APPROACHING CROSSING ITCS WILL START CROSSING WARNING EQUIPMENT.
2. AN EXTENDED WARNING TIME WILL BE DEVELOPED, TO ALLOW FOR SAFE STOPPING DISTANCE FOR HIGH SPEED PASSENGER TRAINS. THIS TIME IS YET TO BE DETERMINED. (MINIMUM WARNING TIME 80 SECONDS)
3. IF PASSENGER TRAINS EQUIPPED WITH ITCS AND ARE OPERATED AT A SPEED OF LESS THAN 80MPH, THE ITCS SYSTEM WILL BE UTILIZED FOR THE CROSSING FAULT REPORTING FUNCTION AND TO PROVIDE FOR CROSSING FEEDBACK TO THE TRAIN.

C-34

Example 17- Public Crossing & Private with Public Roadway Attributes

Train Operation (Conventional Start)

1. THE CONSTANT WARNING TIME CIRCUITS WILL PROVIDE A CONVENTIONAL OPERATION BASED ON THE MAXIMUM SPEED OF ALL NON-ITCS EQUIPMENT, NOT TO EXCEED 79MPH. THE DISTANCE FROM THE ISLAND PORTION OF THE CROSSING AND THE MINIMUM STARTING TIME IS YET TO BE DETERMINED.

Historic Preservation Agency
Union Station Floor 1
Springfield, IL 62701

RE: High Speed Rail – Project IHPA # 99101²00052WSW

Dear Ms. Haaker:

This letter is in response to your comments, dated October 13, 2000, on the Chicago – St. Louis High-Speed Rail Project Draft Environmental Impact Statement. In that letter, you requested the following be provided as part of concluding the Section 106 process:

1. A definition of the area of potential effects (APE);
2. A table documenting potential historic properties identified within the APE and the National Register status of each;
3. The criteria of adverse effect as defined in 36 CFR part 800.5 and an explanation of which do or do not apply and the reasons for this finding; and
4. A summary of efforts made to seek comment from the public concerning their views on possible effects on historic resources.

Since issuance of the Draft EIS and conclusion of additional work, a Preferred Alternative has been selected. The Preferred Alternative is a combination of the No-Build and High-Speed Rail Alternatives presented in the Draft EIS. As part of the Preferred Alternative, no action is proposed between Chicago and Dwight. Passenger trains will continue to operate on the current Amtrak route; however, through this area, no additional trains will operate, and existing maximum speeds will be maintained. South of Dwight, the existing service level is maintained while train speeds up to 110 mph will be allowed. Physical improvements associated with the Preferred Alternative include:

- Provision of 12.3 miles of double track;
- Provision of 21.9 miles of freight siding;
- Provision of enhanced warning devices at 172 existing grade crossings; and
- Provision of one grade separation at Pontoon Road in Granite City.

Ms. Anne E. Haaker
August 5, 2002
Page 2

With the exception of the one grade separation, all of the proposed improvements will occur within existing right-of-way. Additional information regarding construction for the Preferred Alternative is provided on the map from Section 3 of the FEIS.

Appendix B identifies those crossings where warning device upgrades are proposed. There are two sets of crossing device upgrades. The first are for those crossings that have only crossbucks or no protection. Upgrades for these crossings that remain open would be movable two mast gates with flashing signals or quad gates. The latter warning device has flashing signals and movable mast arms that are supported on pedestals in all four quadrants of the crossing. These crossings are in areas where there are no historic structures present in the crossing environs.

The other set of crossings with proposed improvements are those that currently have flashing lights with or without movable two-mast gate protection. Upgraded improvements to these crossings would be quad gates. This improvement would consist of in-place replacement of the existing pedestal, signals and gates supplemented with construction of the pedestals, signals and gates in the crossing quadrants where none currently exist. The resultant improvement would be the provision of additional warning devices physically complementing and mirroring those currently in place.

The area of potential effect (APE) as defined for the Chicago-St. Louis High-Speed Rail Project is limited to the footprint of the proposed physical improvements. Since all of the improvements are in context with the surrounding environs, no potential visual impacts were identified, thereby limiting the APE to the improvement footprint. The one exception is the Pontoon Road grade separation where additional right of way is required. However, no historic resources were identified in the vicinity of the Pontoon Road crossing. In addition, no noise or vibration impacts are projected as a result of the project, again limiting the reach of the APE.

No historic resources were identified within the APE. Therefore, it has been determined that this project does not have the potential to cause effects on historic properties as outlined in 36 CFR part 800.

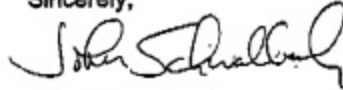

Public Hearings for this project were held in July and August of 2000. The National Trust for Historic Preservation and the Canal Corridor Association requested to become consulting parties because of their interest in historic resources in the Lockport area. As noted, Lockport is located within the no action area of this project. Therefore, it is not appropriate to consult with these organizations at this time.

Ms. Anne E. Haaker
August 5, 2002
Page 3

During project implementation, IDOT will contact each community in the Chicago - St. Louis High-Speed Rail corridor south of Dwight to discuss the possibility of fencing along the railroad tracks. If a community is interested in having fencing installed, IDOT will coordinate with that community to determine the location, style, and height of the proposed fencing as well as whether the fencing will be on one or both sides of the railroad tracks. If an agreement can be reached, fencing will be installed. Fencing will not be installed unless agreed to by the local community. Finally, fencing will not be provided if it is determined that visual impacts to historic resources would result.

We would like to conclude the Section 106 process with the Environmental Impact Statement and trust that this documentation will be sufficient. Please contact me at 217.782.2835 if you have any questions or would like to discuss this project further.

Sincerely,

John Schwalbach
Chief, Bureau of Railroads

High Speed Rail Project
St. Louis to Chicago
IHPA #9910190052WSW

October 13, 2000

Mr. Merrill L. Travis
Chief, Bureau of Railroads
Illinois Department of Transportation
2300 South Dirksen Parkway
Springfield, Illinois 62764

Dear Mr. Travis:

We have reviewed the Draft Environmental Impact Statement for the Chicago-St. Louis High Speed Rail Project.

For purposes of compliance with the National Environmental Protection Act, the statement on page s-11 of the summary stating that coordination with the SHPO is continuing will be sufficient with the addition of a reference to section 106 of the National Historic Preservation Act of 1966, as amended (the Act).

However, if your department intends to utilize this study for purposes of meeting the documentation and consultation requirements of the Act and its implementing regulation 36 CFR part 800, "Protection Of Historic Properties", further documentation and analysis must be included this report when it is published in final form. Documentation to be included:

1. a definition of the area of potential effects (APE)
2. a table documenting the potential historic properties identified within the APE (much like the one included for natural resources) and the National Register status of each
3. the criteria of adverse effect as defined in 36 CFR part 800.5 and an explanation of which do or not apply and the reasons for this finding
4. a summary of efforts made to seek comment from the public concerning their views on possible effects to historic resources

Please inform us if you wish to include the above documentation with the body of the final EIS statement or if we will conclude the section 106 process in a separate format.

Thank you for this opportunity to comment at this time.

Sincerely,

Anne E. Haaker
Deputy State Historic Preservation Officer

APPENDIX E: Hazardous Waste Documentation

Hazardous Waste Crossing Information

Detailed information on each crossing is found below, followed by Environmental Data Resource maps.

MP 94.4

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 96.7

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 99.61

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 104.24

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 107.6

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 114.82

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 134.93

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 136.95

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 144.47

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 179.53

No potential sites of concern were identified within the evaluated search distances for this private grade crossing with the exception of “Joe Carter” leaking underground storage tank site. The “Joe Carter” main complex is approximately 750 feet northwest of the grade crossing; however, the nearest structure, which may be associated with “Joe Carter” is about 150 feet northwest. According to EDR, the LUST incident was a fuel oil release and a No Further Action letter was issued in 2006.

MP 195.78

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 196.58

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 196.9

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 201.24

No potential sites of concern were identified within the evaluated search distances for this private grade crossing with the exception of “Auburn Township Garage” LUST and UST facility approximately 680 feet north-northeast of the grade crossing. A gasoline UST was removed in the mid-1990s and a No Further Action letter was issued in 1995.

MP 201.7

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 202.08

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 221.37

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 226.27

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 227.45

No potential sites of concern were identified within the evaluated search distances for this private grade crossing with the exception of an ERNS (spill) incident, which occurred near MP 227. The 2007 incident involved the release of 200 gallons of diesel fuel from a locomotive.

MP 228.6

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 230.09

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 235.57

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 236.82

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 237.24

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 237.57

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 240.71

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 246.87

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 250.18

No potential sites of concern were identified within the evaluated search distances for this private grade crossing.

MP 258.29

No potential sites of concern were identified within the evaluated search distances for this private grade crossing with the exception of the Olin Corporation facility complex. The Olin Corporation complex is immediately east of the grade crossing and is listed in several databases including NPDES, LUST, SRP, RCRA-TSDF, CERC-NFRAP, CORRACTS, TRIS, FINDS, RAATS, and MANIFESTS.

MP 262.05

Several potential areas of concern were identified in the EDR report. Dome Railway Service is a LUST facility immediately east of the grade crossing. Six ERNS spill incidents were reported within the railyard in 1993 and 1994 near MP 262 and near the grade crossing. Spill incidents included a leaking fuel oil pipeline flange (minor), 100 pounds of benzene, 25 drums of sulfuric acid, 1 drum of diesel fuel, five drums of diethanolomine (affecting 77 cubic yards of soil) and 6,432 pounds of diethanolomine. In addition to the railyard, Watco Mechanical Services is a CERC-NFRAP facility east of the railyard.

MP 265.22

No potential sites of concern were identified within the evaluated search distances for this private grade crossing; however, 2010 aerial imagery from Google Earth identifies several bulk oil storage/refineries in the area, including one within 750 feet west-southwest of the grade crossing.

MP 266.24

No potential sites of concern were identified within the evaluated search distances for this private grade crossing with the exception of Chemetco, Inc. The Chemetco, Inc. facility is approximately 4,000 feet west-northwest of the grade crossing. This facility is on the National Priority List (NPL) and is also listed in the Proposed NPL, CERCLIS, CORRACTS, and LUST databases.

MP 268.29

No potential sites of concern were identified within the evaluated search distances for this private grade crossing; however, the Chemetco, Inc (NPL facility, as discussed above) is just over a mile northwest of the grade crossing.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

State and tribal Brownfields sites

BROWNFIELDS: Municipal Brownfields Redevelopment Grant Program Project Descriptions

The Illinois Municipal Brownfields Redevelopment Grant Program (MBRGP) offers grants worth a maximum of \$240,000 each to municipalities to assist in site investigation activities, development of cleanup objectives, and performance of cleanup activities. Brownfields are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Number of Days to Update: 41	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

IMPDMENT: Surface Impoundment Inventory

Statewide inventory of industrial, municipal, mining, oil & gas, and large agricultural impoundment. This study was conducted by the Illinois EPA to assess potential for contamination of shallow aquifers. This was a one-time study. Although many of the impoundments may no longer be present, the sites may be contaminated.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

Date of Government Version: 01/14/2011	Source: Illinois EPA

Number of Days to Update: 48	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 02/04/2011	Source: EPA Region 8
Date Data Arrived at EDR: 02/04/2011	Telephone: 303-312-6137
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/31/2011
Number of Days to Update: 45	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Quarterly

INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 02/11/2010	Source: EPA Region 5
Date Data Arrived at EDR: 02/11/2010	Telephone: 312-886-6136
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 60	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Varies

INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 11/01/2010	Source: EPA Region 7
Date Data Arrived at EDR: 12/02/2010	Telephone: 913-551-7003
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 02/03/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Varies

INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 02/03/2011	Source: EPA Region 6
Date Data Arrived at EDR: 02/04/2011	Telephone: 214-665-7591
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/31/2011
Number of Days to Update: 45	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

INDIAN UST R1: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 09/01/2010	Source: EPA, Region 1
Date Data Arrived at EDR: 11/05/2010	Telephone: 617-918-1313
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 02/03/2011
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/16/2011

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/11/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/18/2011
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/03/2010
Date Data Arrived at EDR: 12/30/2010

Local Land Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 11/09/2010	Source: Environmental Protection Agency

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal Brownfields sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

BROWNFIELDS: Municipal Brownfields Redevelopment Grant Program Project Descriptions

The Illinois Municipal Brownfields Redevelopment Grant Program (MBRGP) offers grants worth a maximum of \$240,000 each to municipalities to assist in site investigation activities, development of cleanup objectives, and performance of cleanup activities. Brownfields are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Biennially

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604
Date Made Active in Reports: 04/07/2010	Last EDR Contact: 02/04/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/16/2011

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288
Date Made Active in Reports: 07/15/2009	Last EDR Contact: 06/10/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

IL NIPC: Solid Waste Landfill Inventory

Solid Waste Landfill Inventory. NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites which previously had never been identified largely because there was no obligation to register such sites prior to 1971.

Date of Government Version: 08/01/1988	Source: Northeastern Illinois Planning Commission
Date Data Arrived at EDR: 08/01/1994	Telephone: 312-454-0400
Date Made Active in Reports: 08/12/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CCDD: Clean Construction or Demolition Debris

Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.

Date of Government Version: 01/10/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/03/2011	Telephone: 217-524-3300
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/31/2011

State and tribal leaking storage tank lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LUST: Leaking Underground Storage Tank Sites

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 01/21/2011	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 02/01/2011	Telephone: 217-782-6762
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 03/10/2011
Number of Days to Update: 16	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA
Date Data Arrived at EDR: 12/01/2010	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/18/2011
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2009

Date Data Arrived at EDR: 07/06/2010

Date Made Active in Reports: 07/26/2010

Number of Days to Update: 20

Source: Department of Natural Resources

Telephone: N/A

Last EDR Contact: 03/21/2011

Next Scheduled EDR Contact: 07/04/2011

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA

Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Illinois Environmental Protection Agency's Category List.

A review of the SHWS list, as provided by EDR, and dated 11/29/2010 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SANGAMON VALLEY LANDFILL	RR 9 SANDHILL RD	S 1/2 - 1 (0.918 mi.)	2	7

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the LUST list, as provided by EDR, and dated 01/21/2011 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F017
Waste name: Not Defined

Waste code: F018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704

Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604
Date Made Active in Reports: 04/07/2010	Last EDR Contact: 02/04/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Annually

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288
Date Made Active in Reports: 07/15/2009	Last EDR Contact: 06/10/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

IL NIPC: Solid Waste Landfill Inventory

Solid Waste Landfill Inventory. NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites which previously had never been identified largely because there was no obligation to register such sites prior to 1971.

Date of Government Version: 08/01/1988	Source: Northeastern Illinois Planning Commission
Date Data Arrived at EDR: 08/01/1994	Telephone: 312-454-0400
Date Made Active in Reports: 08/12/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CCDD: Clean Construction or Demolition Debris

Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.

Date of Government Version: 01/10/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/03/2011	Telephone: 217-524-3300
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/31/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/16/2011

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

Date of Government Version: 01/14/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/01/2011	Telephone: 217-782-6762

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2009

Date Data Arrived at EDR: 07/06/2010

Date Made Active in Reports: 07/26/2010

Number of Days to Update: 20

Source: Department of Natural Resources

Telephone: N/A

Last EDR Contact: 03/21/2011

Next Scheduled EDR Contact: 07/04/2011

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA

Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011

	Data Release Frequency: Annually

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288
Date Made Active in Reports: 07/15/2009	Last EDR Contact: 06/10/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

IL NIPC: Solid Waste Landfill Inventory

Solid Waste Landfill Inventory. NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites which previously had never been identified largely because there was no obligation to register such sites prior to 1971.

Date of Government Version: 08/01/1988	Source: Northeastern Illinois Planning Commission
Date Data Arrived at EDR: 08/01/1994	Telephone: 312-454-0400
Date Made Active in Reports: 08/12/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CCDD: Clean Construction or Demolition Debris

Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.

Date of Government Version: 01/10/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/03/2011	Telephone: 217-524-3300
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/31/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/16/2011

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 06/27/2011
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the LUST list, as provided by EDR, and dated 01/21/2011 has revealed that there are 7 LUST sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AUBURN TOWNSHIP NFA/NFR Letter: 09/28/1995	14758 KENNEDY RD.	NNE 1/4 - 1/2 (0.360 mi.)	A3	8
AUBURN TIRE & SERVICE CLOUSER SHELL SERVICE NFA/NFR Letter: 08/24/1995	402 WEST JACKSON 231 WEST JACKSON	N 1/2 - 1 (0.858 mi.) NNE 1/2 - 1 (0.876 mi.)	8 9	18 19

BEATTY IMPLEMENT CO. ORA REDFORD SEARLS GUARDINSHIP NFA/NFR Letter: 05/07/1991	RT. 104 & 4 113 SOUTH 5TH ST.	NW 1/2 - 1 (0.922 mi.) N 1/2 - 1 (0.964 mi.)	C11 13	21 22

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GREEN OIL COMPANY	310 EAST JACKSON	NNE 1/2 - 1 (0.934 mi.)	12	21

LUST TRUST: In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

A review of the LUST TRUST list, as provided by EDR, and dated 01/14/2011 has revealed that there is 1 LUST TRUST site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CLOUSER SHELL SERVICE	231 WEST JACKSON	NNE 1/2 - 1 (0.876 mi.)	9	19

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the UST list, as provided by EDR, and dated 02/03/2011 has revealed that there is 1 UST

EXECUTIVE SUMMARY

site within approximately 0.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AUBURN TOWNSHIP GARAGE	14759 KENNEDY RD	NNE 1/4 - 1/2 (0.359 mi.)	A1	7

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 TRIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DICKEY-JOHN CORP.	5200 DICKEY-JOHN RD.	NE 1/4 - 1/2 (0.383 mi.)	B6	18

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there are 3 FINDS sites within approximately 0.5 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006

Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F007

Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F008

Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F009

Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F017

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

Data Release Frequency: Biennially

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604
Date Made Active in Reports: 04/07/2010	Last EDR Contact: 02/04/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/16/2011

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288
Date Made Active in Reports: 07/15/2009	Last EDR Contact: 06/10/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

IL NIPC: Solid Waste Landfill Inventory

Solid Waste Landfill Inventory. NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites which previously had never been identified largely because there was no obligation to register such sites prior to 1971.

Date of Government Version: 08/01/1988	Source: Northeastern Illinois Planning Commission
Date Data Arrived at EDR: 08/01/1994	Telephone: 312-454-0400
Date Made Active in Reports: 08/12/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CCDD: Clean Construction or Demolition Debris

Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.

Date of Government Version: 01/10/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/03/2011	Telephone: 217-524-3300
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/31/2011

State and tribal leaking storage tank lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LUST: Leaking Underground Storage Tank Sites

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 01/21/2011	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 02/01/2011	Telephone: 217-782-6762
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 03/10/2011
Number of Days to Update: 16	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/11/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA
Date Data Arrived at EDR: 12/01/2010	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Telephone: 312-886-6186
Last EDR Contact: 01/06/2011
Next Scheduled EDR Contact: 04/18/2011
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2010	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 01/05/2011	Telephone: 202-366-4555
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 01/05/2011
Number of Days to Update: 51	Next Scheduled EDR Contact: 04/18/2011
	Data Release Frequency: Annually

SPILLS: State spills

A listing of incidents reported to the Office of Emergency Response.

Date of Government Version: 01/18/2011	Source: Illinois EPA
Date Data Arrived at EDR: 01/21/2011	Telephone: 217-558-1677
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/17/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 05/02/2011
	Data Release Frequency: Varies

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency

	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 06/27/2011
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/29/2010	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 12/09/2010	Telephone: 217-524-4826
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 01/31/2011
Number of Days to Update: 8	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604
Date Made Active in Reports: 04/07/2010	Last EDR Contact: 02/04/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Annually

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A

Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/11/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/18/2011
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

CAT: Category List

Sites on this list are: Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

Date of Government Version: 06/01/1997	Source: Illinois EPA
Date Data Arrived at EDR: 07/07/1997	Telephone: N/A
Date Made Active in Reports: 08/14/1997	Last EDR Contact: 02/26/2001
Number of Days to Update: 38	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

State- and tribal - equivalent CERCLIS

SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

LF WMRC: Waste Management & Research Center Landfill Database

The Waste Management & Research Center Landfill Database includes records from the Department of Public Health, Department of Mines & Minerals, Illinois Environmental Protection Agency, State Geological Survey, Northeastern Illinois Planning Commission and Pollution Control Board.

Date of Government Version: 12/31/2001	Source: Department of Natural Resources
Date Data Arrived at EDR: 10/06/2006	Telephone: 217-333-8940
Date Made Active in Reports: 11/06/2006	Last EDR Contact: 09/18/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: No Update Planned

SWF/LF: Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject to State Surcharge

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2008	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2010	Telephone: 217-785-8604
Date Made Active in Reports: 04/07/2010	Last EDR Contact: 02/04/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Annually

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA
Date Data Arrived at EDR: 06/17/2009	Telephone: 217-782-9288
Date Made Active in Reports: 07/15/2009	Last EDR Contact: 06/10/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

IL NIPC: Solid Waste Landfill Inventory

Solid Waste Landfill Inventory. NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites which previously had never been identified largely because there was no obligation to register such sites prior to 1971.

Date of Government Version: 08/01/1988	Source: Northeastern Illinois Planning Commission
Date Data Arrived at EDR: 08/01/1994	Telephone: 312-454-0400
Date Made Active in Reports: 08/12/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CCDD: Clean Construction or Demolition Debris

Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.

Date of Government Version: 01/10/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/03/2011	Telephone: 217-524-3300
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 01/31/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Varies

State and tribal leaking storage tank lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LUST: Leaking Underground Storage Tank Sites

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 01/21/2011	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 02/01/2011	Telephone: 217-782-6762
Date Made Active in Reports: 02/17/2011	Last EDR Contact: 03/10/2011
Number of Days to Update: 16	Next Scheduled EDR Contact: 05/16/2011
	Data Release Frequency: Semi-Annually

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

Date of Government Version: 01/14/2011	Source: Illinois EPA
Date Data Arrived at EDR: 02/01/2011	Telephone: 217-782-6762
